Introduction	1
1 Approaches to the Balance of Payments and the Exchange Rate: The Case of Capital Immobility	5
1.1 Introduction	5
1.2 The accounting framework of the balance of payments	6
1.3 The elasticities approach to the balance of payments and the exchange rate	9
1.4 The absorption approach to the balance of payments and the exchange rate	13
1.5 The monetary approach to the balance of payments and the exchange rate	24
2 The Asset Approach to the Exchange Rate: Monetary Models of the Exchange Rate	32
2.1 Introduction	32
2.2 Monetary models of the exchange rate: the case of flexible prices	33
2.3 Monetary models of the exchange rate: full employment and sticky prices	39
2.4 Monetary models of the exchange rate: demand-determined outputs and sticky prices	49
2.5 Concluding remarks	58
3 The Asset Approach to the Exchange Rate: Portfolio Balance Models of the Exchange Rate and the Current Account	60
3.1 Introduction	60
3.2 A mean-variance analysis of portfolio choice	61
3.3 Monetary policy, expectations and the exchange rate	63
3.4 Monetary policy and the degree of asset substitution	71

3.5	The exchange rate, the current account and expectations	73
3.6	Responses of the exchange rate and the current account to sterilised and non-sterilised, unanticipated, open-market operations	76
3.7	Concluding remarks	83
4	Exchange Rates, Expectations and the Current Account	85
4.1	Introduction	85
4.2	A description of the model: setting the agenda	87
4.3	Short-run equilibrium responses under exogenous expectations	89
4.4	Impact, dynamic and steady-state adjustments under static expectations	94
4.5	The nominal exchange rate and the current account under perfect foresight	100
4.6	Concluding remarks	109
5	The Cost of Disinflation in a Floating Exchange Rate Regime	111
5.1	Introduction	111
5.2	The basic Buiter–Miller model	112
5.3	The cost of disinflation when non-sterilised intervention takes place	121
5.4	Conclusion	124
6	The Exchange Rate and the Current Account when Prices Evolve Sluggishly: A Simplification of the Dynamics and a Reconciliation with the Absorption Approach	126
6.1	Introduction	126
6.2	An extended version of a Mundell–Fleming model and the current account	128
6.3	A reconciliation with the absorption approach	135
6.4	A phase diagram analysis of the saddle path: an illustration	138
6.5	Concluding remarks	142
7	Growth and the Balance of Payments under Alternative Exchange Rate Regimes: The Case of a Small Economy	144
7.1	Introduction	144
7.2	A growth model of an open economy with capital immobility and fixed exchange rates	146
7.3	A growth model of an open economy with perfect capital mobility and fixed exchange rates	152
7.4	A growth model of an open economy with perfect capital mobility and flexible exchange rates	156
7.5	Secular and cyclical movements in the balance of payments	158

7.6	Seigniorage and the foreign exchange regime	158
8	Economic Stability under Fixed, Flexible and Managed Exchange Rates	160
8.1	Introduction	160
8.2	A symmetric two-country model	161
8.3	The solution of the exchange rate under pure floating	170
8.4	Solving the model under alternative exchange rate regimes	172
8.5	Reporting and commenting on results	176
8.6	Concluding remarks	181
9	International Interdependence and Macroeconomic Policy Coordination (<i>by Frederick van der Ploeg</i>)	183
9.1	Introduction	183
9.2	Monetary interdependence under floating exchange rates	187
9.3	International policy coordination under floating exchange rates	191
9.4	Managed exchange rates	195
9.5	Interpretation of results and comparison with monetary union	198
9.6	Can international policy coordination be counterproductive?	200
9.7	Rational expectations and wage-price dynamics	205
9.8	Idiosyncratic supply shocks and the case for monetary union	208
9.9	Concluding remarks	213
10	Monetary and Portfolio Balance Models: Which does the Empirical Evidence Support? (<i>by Ronald MacDonald</i>)	217
10.1	Introduction	217
10.2	Uncovered and risk-adjusted uncovered interest rate parity	219
10.3	Evidence for a risk premium from the literature on the optimality of the forward rate as a predictor of the future exchange rate	222
10.4	Reduced-form exchange rate modelling: some in-sample and out-of-sample evidence	228
10.5	The out-of-sample forecasting performance of asset approach reduced forms	232
10.6	Explanations for the poor performance of asset approach reduced forms	233
10.7	Tests of forward looking monetary and portfolio balance models	235
10.8	Purchasing power parity: a review of the recent evidence	238
10.9	Concluding remarks	242
	<i>Mathematical Appendix</i>	245
	<i>Bibliography</i>	254
	<i>Index</i>	264

List of Tables and Figures

Tables

8.1	Asymptotic variances under fixed exchange rates	177
8.2	Asymptotic variances under pure float	177–8
8.3	Asymptotic variances under managed floating: insulating aggregate demand from the real exchange rate without requiring a fixed real exchange rate	179–80
8.4	Asymptotic variances under managed floating: the Miller–Williamson proposals of fixing the real exchange rate	181
9.1	Policy responses to a common adverse supply shock under alternative exchange-rate regimes	207
9.2	Effects of an idiosyncratic adverse supply shock under alternative exchange-rate regimes	210
9.3	Policy responses to an idiosyncratic adverse supply shock under alternative exchange-rate regimes	212

Figures

1.1a	A stable foreign exchange market	12
1.1b	A stable foreign exchange market	12
1.1c	An unstable foreign exchange market	12
1.2	Balance of payments adjustments to a devaluation when resources are underemployed: the absorption approach	17
1.3	Adjustments to a devaluation at full employment	18
1.4	Policies for internal and external balance	19
1.5	Internal balance, external balance and the real exchange rate	22
1.6	The path of output, of domestic prices and of the nominal exchange rate	23
1.7	Balance of payments adjustments to a devaluation: the monetary approach	27

2.1a	A permanent and unanticipated increase in m_d	37
2.1b	A permanent and unanticipated increase in $(\pi - \pi^*)$	38
2.2	Deriving the perfect foresight path	41
2.3	Adjustments in the real exchange rate and in relative liquidity to monetary disturbances	45
2.4a	A permanent and unanticipated increase in m_d : adjustments in e and in p_d when prices are sticky and when prices are flexible	47
2.4b	An unanticipated increase in $(\pi - \pi^*)$: adjustments in e and in p_d when prices are sticky and when prices are flexible	48
2.5	Adjustments to unanticipated monetary disturbances	51
2.6	Adjustments to monetary disturbances: a case of undershooting	53
2.7a	Exchange rate adjustments in a sticky-price, underemployment model – a case of overshooting: $k\delta + \psi\gamma - 1 < 0$	56
2.7b	Exchange rate adjustments in a sticky-price, underemployment model – a case of undershooting: $k\delta + \psi\gamma - 1 > 0$	57
3.1a	Portfolio balance loci in $((r_b)^*, E)$ space	65
3.1b	Portfolio balance responses to a rise in F	66
3.1c	Portfolio balance responses to a rise in M	67
3.1d	Portfolio balance responses to a rise in B : the case where foreign and domestic bonds are (relatively) close substitutes	68
3.1e	Portfolio balance responses to an open-market increase in M in exchange for B ($dM + dB = 0$)	69
3.1f	Portfolio balance responses to an open-market increase in F in exchange for B ($dB + EdF = 0$)	70
3.1g	Portfolio balance responses to an increase in the expected rate of depreciation of the exchange rate when bonds are 'close' substitutes	72
3.2	Portfolio balance and the exchange rate in a single-bond world	73
3.3	The current account and the exchange rate under rational expectations: deriving the saddle path	77
3.4	The current account and the exchange rate under rational expectations: responses to an unanticipated open-market purchase of domestic bonds for money	80
3.5a	Current account and exchange rate responses (under rational expectations) to an unanticipated open-market purchase of domestic bonds for foreign bonds: the 'close' substitutes case	82
3.5b	Current account and exchange rate responses (under rational expectations) to an unanticipated open-market purchase of domestic bonds for foreign bonds: the 'poor' substitutes case	83
4.1	Short-run equilibrium in the markets for goods and assets	91
4.2–6	Impact, dynamic and steady-state adjustments under static expectations: the current account and the real exchange rate	95–6
4.7a	The nominal exchange rate and the current account under static expectations: adjustments to an open-market operation	98
4.7b	The nominal exchange rate and the current account under static expectations: adjustments to an increase in export demand	99

4.8a	The nominal exchange rate and the current account under rational expectations: deriving the saddle path	102
4.8b	The nominal exchange rate and the level of foreign assets: steady-state adjustments to open-market operations	105
4.8c	The nominal exchange rate and the level of foreign assets: steady-state adjustments to an increase in export demand	106
4.8d	The nominal exchange rate and the level of foreign assets: impact and dynamic adjustments to open-market operations under perfect foresight	107
4.8e	The nominal exchange rate and the level of foreign assets: impact and dynamic adjustments to an increase in export demand under perfect foresight	108
5.1	<i>IS-LM</i> adjustments in (i,y) space: the stable cases considered	114
5.2	Phase diagrams in (c, ℓ) space	118
5.3	Adjustments in competitiveness and liquidity to an unanticipated reduction in μ	119
5.4a	The paths of money and prices	121
5.4b	The path of output	122
5.5a	The paths of money and prices in a model of non-sterilised intervention	125
5.5b	The path of output in a model of non-sterilised intervention	125
6.1	The joint determination of F and c across steady states: adjustments to a reduction in μ when $\lambda\mu > 1$, and to an increase in ϕ	134
6.2	The joint determination of F and c across steady states: adjustments to an increase in foreign income when $\sigma/f = \nu/\delta$	136
6.3	Adjustments across steady states to a shift in preferences towards the foreign good at the expense of the domestic good	137
6.4	The characteristics of the stable path of ℓ , F and c associated with an unanticipated pure fiscal expansion	141
6.5a	The path of inflation	141
6.5b	The path of output	141
6.6a	The time path of the real exchange rate	142
6.6b	The time path of the real interest rate	142
7.1	Growth, the balance of payments and capital immobility	152
7.2	Growth, the balance of payments and capital mobility	154
9.1	The two-country Mundell–Fleming model	189
9.2	Reaction functions under managed exchange rates	197

Acknowledgements

Emmanuel Pikoulakis wishes to express his gratitude for the invaluable support provided by his publisher, Mr Stephen Rutt, throughout this project, and also to Mr Keith Povey for the high quality and promptness of his editorial services.

The author and publishers are grateful to the following for permission to reproduce extracts from: *Private Behaviour and Government Policy in Interdependent Economics* (1990), by permission of Oxford University Press and the *Greek Economic Review*; *Problems of International Finance* (1984) ed. J. Black and G.S. Dorrance, by permission of Macmillan Publishers; *Exchange Rates and Open Economy Economics* (1989) ed. M. Taylor and Ronald MacDonald, by permission of Blackwell Publishers; Papers from Proceedings volumes by permission of Tagung Geld, Banker and Versicherungen. Every effort has been made to trace all the copyright-holders, but if any have been inadvertently overlooked the publishers will be pleased to make the necessary arrangement at the first opportunity.
