THE EUROPEAN UNION SERIES

General Editors: Neill Nugent, William E. Paterson, Vincent Wright

The European Union series is designed to provide an authoritative library on the European Union ranging from general introductory texts to definitive assessments of key institutions and actors, policies and policy processes, and the role of member states.

Books in the series are written by leading scholars in their fields and reflect the most up-to-date research and debate. Particular attention is paid to accessibility and clear presentation for a wide audience of students, practitioners and interested general readers.

The series consists of four major strands:

- general textbooks
- the major institutions and actors
- the main areas of policy
- the member states and the Union

Published titles

Desmond Dinan

**Ever Closer Union? An
Introduction to the European
Community**

Theoretical conclusions	149

Conclusion: The Future of EU Energy Policy	151
<i>Guide to Further Reading</i>	161
<i>References</i>	163
<i>Index</i>	172

Acknowledgements

The research for this study started in 1988/89 during a Fulbright research stay at the Foreign Policy Institute of the Johns Hopkins School of Advanced International Study in Washington, DC. There I was fortunate to work with Professor Wilfried Kohl and others with an interest in the political economy of energy trade. During that time I also benefited from discussions with scholars at the MIT and Cornell University, among them Richard Samuels and Peter Katzenstein.

At the Norwegian Institute of International Affairs (NUPI), where part of this study was written, I enjoyed the cooperation of Professor Martin Sæter, who, apart from being knowledgeable about energy, is an expert on EU integration. The study was completed at the Center for International Climate and Energy Policy Research (CICERO) of Oslo University. I wish to thank director Helga Hernes and Professor Arild Underdal for helpful comments and advice, and also for the generous amount of time off I was given from other research to complete this book in 1995. In my senior research position at ARENA (Advanced Research on the Europeanisation of the Nation-State), Oslo University, I was able to do the final revision of the manuscript.

The empirical material for the study was gathered over several years, starting in 1985, and included several rounds of interviews in the national capitals of the countries being studied and in the EU Commission in 1985, 1986, 1990 and 1992. I am grateful for the openness of the interviewees and respect their general wish to remain anonymous. Director Hans Maters of DGXVII was very helpful both in terms of substance and in providing me with contacts to discuss the work of the Commission.

Professor Stephen George, University of Sheffield, and Professor Walter Carlsnæs, Uppsala University, provided incisive criticism when my DPhil thesis on EU energy policy was defended in March 1994. Likewise I am indebted to Professors Knut Midgaard and Helge Hveem of the Institute of Political Science, Oslo University, for their helpful comments on the thesis, as well as to an anonymous reviewer who provided most helpful and detailed comments.

Two of our four children were born during the period of research for this study. They provided their mother with ample reminders of the relative importance of her academic undertaking. They, as well as my husband, luckily took no interest in the subject matter.

Oslo
