1 Introduction	1
1.1 The origin of the research	1
1.2 The main research questions	3
1.3 The structure of the book	6
Part I The Debate on Industrial Districts	9
2 The Origin of the Debate	11
2.1 Introduction	11
2.2 The economic performance of the Third Italy	11
2.3 From dualism to the Third Italy	14
2.4 The local productive systems: some definitions	17
2.5 The diffusion of the debate outside Italy	20
3 The Industrial District Model	23
3.1 Introduction	23
3.2 The industrial district model: an overview of the literature	24
3.2.1 Locational and spatial factors	24
3.2.2 Social and cultural factors	25
3.2.3 Economic and organizational factors	27
3.2.4 Institutional and policy factors	29
3.3 Two useful instruments of analysis	32
3.3.1 External economies	32
3.3.2 Cooperation effects	37
3.4 Is there an industrial district model?	41

4	The Relevance of the Industrial District Debate for Developing Countries	43
4.1	Introduction	43
4.2	Industrial clusters in LDCs	44
4.3	The social environment	45
4.4	The economic effects of clustering	47
4.5	The institutional support	49
4.6	Some final considerations	51
Part II	The Empirical Analysis	53
5	The Italian Districts of Brenta and Marche	55
5.1	Introduction	55
5.2	The Italian footwear industry	56
5.2.1	The performance	56
5.2.2	The structure of the sector	61
5.2.3	The production process	63
5.2.4	The main Italian footwear areas	67
5.3	Marche and Brenta: the critical mass	70
5.4	Results of the field work	72
5.4.1	Backward linkages	73
5.4.2	Forward linkages	83
5.4.3	Horizontal linkages	86
5.4.4	Linkages with the labour market	88
5.4.5	Institutional linkages	90
5.5	The industrial district model vs. the industrial district reality	94
6	The Mexican Clusters of Guadalajara and Leon	96
6.1	Introduction	96
6.2	The Mexican footwear industry	96
6.2.1	The performance	97
6.2.2	The structure of the sector	98
6.2.3	Technology in the Mexican footwear industry	101
6.3	Guadalajara and Leon	102
6.4	Results of the field work	106
6.4.1	Backward linkages	107
6.4.2	Forward linkages	116
6.4.3	Horizontal linkages	119

6.4.4	Linkages with the labour market	121
6.4.5	Institutional linkages	124
6.5	Industrial clusters in Mexico: some reflections	128
Part III	The Comparison	131
7	External Economies and Cooperation in Italy and Mexico	133
7.1	Introduction	133
7.2	A classification of collective effects	134
7.3	A statistical analysis of the sample surveys	142
7.3.1	A comparison of the underlying principal factors	143
7.3.2	Identifying homogeneous groups of firms	150
7.3.3	The profiles of the sample firms	156
7.4	Italian and Mexican realities vs. the 'model'	162
8	Implications for Policy and Further Research	166
8.1	Introduction	166
8.2	Some dynamic concerns	167
8.3	Implications for policy	171
8.4	Conclusions	174
<i>Appendix 1</i>	<i>The methodology</i>	178
<i>Appendix 2</i>	<i>Questionnaire</i>	180
<i>Appendix 3</i>	<i>Network case studies</i>	187
<i>Appendix 4</i>	<i>Factor analysis</i>	188
<i>Appendix 5</i>	<i>Cluster analysis</i>	190
<i>Appendix 6</i>	<i>Correspondence analysis</i>	191
<i>Notes</i>		193
<i>Bibliography</i>		202
<i>Index</i>		211

List of Tables

2.1	Share of agricultural employment in some Italian regions (%)	13
2.2	Growth rate of non-agricultural employment (%)	14
2.3	Value added at factor costs, millions of Lira (1963 prices)	14
2.4	Balance of internal migration among regions	15
5.1	Production, import and export of leather shoes, 1972–1990 (millions of pairs)	57
5.2	The Italian Footwear Industry, 1970–1993	59
5.3	Some of the world's largest exporters of leather footwear (1970 and 1990)	60
5.4	The Italian footwear <i>filière</i> (1993)	62
5.5	The size structure of the Italian footwear industry, no. of firms (1951–1991)	62
5.6	The size structure of the Italian footwear industry, no. of employees (1951–1991)	62
5.7	Footwear producing regions (1993)	64
5.8	Marche and Brenta: the critical mass	71
5.9	The sample	73
5.10	The extent of externalizing production tasks (% of sample firms)	75
5.11	Location of suppliers	78
5.12	Sources of technical innovations	82
5.13	Sources of information for process innovation	82
5.14	Marketing channels	84
5.15	Informal cooperation between sample firms	88
5.16	Use of entrepreneurial associations by members	91
6.1	The Mexican Footwear Industry, 1970–1991	98
6.2	Size structure of the Mexican shoe industry	100
6.3	Spatial structure of the Mexican shoe industry	100
6.4	The footwear industry in Guadalajara and Leon	105
6.5	The sample	107
6.6	The extent of externalizing production tasks (% of sample firms)	108
6.7	Sources of technical innovations	115
6.8	Sources of information for process innovation	116

6.9	Marketing channels of products	117
6.10	Informal cooperation between sample firms	121
6.11	Use of entrepreneurial associations by members	125
7.1	Collective efficiency: a classification of effects	135
7.2	Variables selected: Italy	144
7.3	Variables selected: Mexico	145
7.4	Factor pattern matrix: Italy	147
7.5	The principal factors: Italy	147
7.6	Factor pattern matrix: Mexico	149
7.7	The principal factors: Mexico	150

List of Maps and Figures

Map 2.1	The Third Italy	13
Map 5.1	The main Italian footwear districts	64
Map 6.1	The Mexican footwear clusters	103
Figure 7.1	The Italian clusters	152
Figure 7.2	The Mexican clusters	154
Figure 7.3	The profiles of the Italian sample firms	157
Figure 7.4	The profiles of the Mexican sample firms	158

Acknowledgements

This book was researched and written with the financial help of grants from several institutions: in Italy the Fondazione Luca D'Agliano and Fondazione Einaudi in Turin, in Mexico the Instituto Tecnológico de Monterrey and finally, in Geneva, the International Institute for Labour Studies. Financial support was also granted by two research projects, sponsored by the Regional Government of Emilia-Romagna and by the Italian National Research Council (CNR).

The research would not have been possible without the cooperation of the many people in firms and institutions in Mexico and Italy, who gave generously of their time. I am particularly grateful to Rosa Maria Sanchez Cantu of the Instituto Tecnológico de Monterrey and to Octavio Paredes Miranda of the Instituto Tecnológico del Calzado in Guadalajara; their enthusiasm in supporting this research project made possible my fieldwork in Mexico. Both the Camara de la Industria del Calzado in Guadalajara and in Leon were always very supportive. Finally, I have a debt of gratitude to the Mexican entrepreneurs, who always participated in my research with great enthusiasm.

In Italy, I am grateful to the Unione Industriale del Fermano, to the Associazione Calzaturifici della Riviera del Brenta and to all the entrepreneurs interviewed in Marche and Brenta. A thank-you goes also to the Dipartimento di Scienze Economiche of the University of Padua and to the Istituto di Economia Politica of Bocconi University of Milan, which kindly allowed me to use their facilities.

A number of people made constructive comments and suggestions on earlier drafts: Gioacchino Garofoli, John Humphrey, Stefano Kluzer, Bernard Musyck, Khalid Nadvi, Roberta Capello and Werner Sengenberger. Paolo Giudici and Valeria Severini helped me in the statistical analysis.

Special thanks go to Frances Stewart: she strongly encouraged me to undertake this project and her constant involvement in my research has always been a great support. I am also gratefully indebted to Roberto Camagni, who constantly supported my scientific interests, inspiring me with his enthusiasm and creativity. Finally, the intellectual stimulus of Hubert Schmitz has given me continuous encouragement since the start of the research. Without him this book would never have been possible.

ROBERTA RABELLOTTI
