12 Against Social Constructionist Cyborgian Territorializations	202
<i>Francisco Javier Tirado</i>	
PART FOUR	
Commentaries	219
13 The Cyber and the Subjective	221
<i>Steve Jones</i>	
14 Are Media Cyborgs?	226
<i>Virginia Nightingale</i>	
<i>Index</i>	236

Notes on Contributors

Betty M. Bayer is Associate Professor of Social Psychology and teaches in women's studies at Hobart and William Smith Colleges, New York. She is co-editor of *Reconstructing the Psychological Subject: Bodies, Practices, and Technologies* (1998), and has published papers on feminist theory and questions of the body. She is currently engaged in research on the history of human-technology coordinations in scientific practices and identity, subjectivity and the body.

Steven D. Brown is a Lecturer in Social and Organizational Psychology at Keele University, and a member of the Centre for Social Theory and Technology. He is the author of *The Life of Stress* (forthcoming), and has published widely in the area of poststructuralism, technoscience and culture. Current research includes a project on groupware and mediation of memory as part of the ESRC's *Virtual Society?* programme.

Erica Burman is Professor of Psychology and Women's Studies in the Discourse Unit at The Manchester Metropolitan University. Her work is in the areas of feminist critiques of developmental psychology, subjectivity and discourse. Her books include *Deconstructing Developmental Psychology* (1994), *Psychological Theory and Feminist Practice* (ed.) (1990) and *Deconstructing Feminist Psychology* (ed.) (1998).

Nydzia Correa De Jesús is Associate Professor in the Department of Psychology, Río Piedras Campus, University of Puerto Rico. She is also a Visiting Professor in the Social Psychology Department of the Faculty of Sociology and Politics at the Universidad Complutense de Madrid. Her field of interests range from epistemology and methodology in the human sciences, to consumption and the relationship between cities and subjectivity in current social theory.

John Cromby is in the Department of Interdisciplinary Human Studies at Bradford University. His interests include the social construction of subjectivity, and the development and evaluation of educational virtual environments for people with learning disabilities. Currently he has a P200MMX with 32mb of RAM, a 3D card and a copy of 'Quake 2' wherein he happily assassinates other cyborgs.

Heidi J. Figueroa-Sarriera is Associate Professor at the Department of Psychology, Río Piedras Campus, University of Puerto Rico. As a transdisciplinary social psychologist she is involved in research on cultural representations of high-tech designs and human-machine interfaces. She teaches social psychology at graduate and undergraduate level as well as graduate seminars on new technology and emerging subjectivities. She is assistant editor with Steven Mentor and Chris Hables Gray (editor) of *The Cyborg Handbook* (1995) and she co-edited with Madeline Román and María Milagros López (1994) *Más Allá de la Bella (In)diferencia: Revisión Postfeminista y otras Escrituras Posibles*.

Ángel Juan Gordo-López is Assistant Lecturer in the Department of Sociology IV at the Faculty of Political Sciences and Sociology at the Universidad Complutense de Madrid and a member of the Discourse Unit. He is the co-editor with J.L. Linaza of *Psicologías, Discursos y Poder* (PDP) (1996), co-author with Erica Burman *et al.* of *Psychology Discourse Practice* (1996) and currently working with Gill Aitken on *Queer Andtherness*.

Dan Heggs is a member of the Discourse Unit and his current research interests focus on discourse, narrative and representation strategies in comic books. His publications include the chapter on comics in *Critical Textwork: An Introduction to Varieties of Discourse and Analysis* (1999, Open University Press).

Steve Jones is a Professor and Head of Communication at the University of Illinois, Chicago. He is the author of five books, including *CyberSociety: Computer-Mediated Communication and Community*, *Virtual Culture: Identity and Community in Cyberspace*, and *Doing Internet Research* (Sage). His research focuses on the social consequences of communication technologies.

Jill Marsden lectures in philosophy at Bolton Institute. Recent publications on feminism and cyberculture include 'Virtual sexes and feminist futures: the philosophy of "cyberfeminism"' (*Radical Philosophy*, 78), 'Reinventing nature' (*Women's Philosophy Review*, 13), 'On the matter of sexual difference' (*Journal of the British Society for Phenomenology*, 27), and 'Lines of flight: Freud, Schreber, Nietzsche' (*Journal of the British Society for Phenomenology*, 28).

Virginia Nightingale writes about audience but is fascinated by human cultures of all times and types. Just before writing her response for *Cyberpsychology* she visited the neolithic sites in the Orkneys while on vacation. Some reading prompted by this visit mysteriously surfaces in her writing here. Virginia is Associate Professor in the School of Communication and Media at the University of Western Sydney, Nepean.

Ian Parker is Professor of Psychology in the Discourse Unit at Bolton Institute, where he directs the MSc Critical Psychology programme and is managing editor of the *Annual Review of Critical Psychology*. His books include *Psychoanalytic Culture: Psychoanalytic Discourse in Western Society* (1997, Sage).

James Sey is a Senior Lecturer in the English Department at Vista University (Soweto Campus), and teaches courses in popular culture in the Music School of the University of the Witwatersrand in Johannesburg. His PhD concerned the ways in which science fiction in various media can be read, through a psychoanalytic framework, as an implicit critique of technological culture, specifically the relationship between bodies and machines. He has recently co-edited and contributed to a special edition of the psychoanalysis and culture journal *American Imago*, on psychoanalysis in South Africa. He is currently interested in the confluence of digital technologies and conceptual art, and in the history of technology.

Carlos Soldevilla Pérez is Assistant Lecturer in the Department of Sociological Theory at the Faculty of Political Sciences and Sociology of the Universidad Complutense de Madrid. His research focuses on the analysis of personality and new contemporary styles of life. His doctoral thesis obtained the Doctoral Research Award in 1995 and his latest publication is

La Gènesis del Constructo Estilo de Vida en las Ciencias Sociales (The Genesis of the Style of Life Construct in Social Sciences) (1998).

Penny Standen is Reader in Health Psychology and Learning Disabilities at Nottingham University. After completing a PhD in ethology, she wasted too many years setting up a course to teach psychology to medical students at Nottingham and then delivering the teaching. During this time most of her research focused on psychological factors associated with health, illness and the delivery of healthcare. Her current appointment has allowed an indulgence in two of her interests: the place of disability in society, and computers and IT. These interests find expression in her research with John Cromby on the use of virtual environments with people with learning disabilities.

Francisco Javier Tirado is Assistant Lecturer in Social Psychology and Organizations in the Faculty of Psychology at the Universidad Autónoma de Barcelona (UAB). He completed his Masters in Social Psychology at UAB with a thesis 'Cyborgs and extitutions: new forms for the social', and he is now working on theoretical projects on the concept of the social and its relationship with the emergence of techno-aesthetics.
