This book would not have existed without the students who took my courses on music and sound at Macquarie University and the London College of Printing. Some are mentioned by name, others will recognize the examples to which they first drew my attention.

Many writers on music and sound have inspired me. Their names are in the bibliography. But two must be singled out, Murray Schafer and Philip Tagg. Those who know their work will recognize their influence throughout the book.

Exactly the same goes for my teachers in the field of linguistics and semiotics, Michael Halliday and Jim Martin, and for my collaborator of many years, Gunther Kress. Their influence is everywhere, and without them none of this could have been written.

Over the years I have also benefited from discussions about speech, music and other sounds with Joyce Belfrage, Philip Bell, John Bernard, Jennifer Biddle, Maria Casas, Michael Chanan, John Clarke, Carolyn Craig, Arthur Delbridge, Laura Lopez-Bonilla and Radan Martinec.

Experimental music adventures with Linda Berry, Rigel Best, Rudi Homburger, John Shand and others were another key source of inspiration and ideas.

The London Institute generously supported the research for this book as part of a three-year grant for work on 'multimodality and the languages of multimedia'. Thanks also to Catherine Gray of Macmillan for her support.

And to Laura for being there and putting up with it all.

Every effort has been made to trace all the copyright holders but if any have been inadvertently overlooked the publishers will be pleased to make the necessary arrangements at the first opportunity.
