PROCEEDINGS OF THE
SIXTEENTH INTERNATIONAL
MACHINE TOOL DESIGN AND RESEARCH
CONFERENCE

PROCEEDINGS OF THE
SIXTEENTH INTERNATIONAL
MACHINE TOOL DESIGN AND RESEARCH
CONFERENCE

*held in Manchester
10-12 September 1975*

Edited by

F. KOENIGSBERGER

*Professor of Machine Tool Engineering
University of Manchester Institute of Science and Technology*

and

S. A. TOBIAS

*Chance Professor and Head of Department
Department of Mechanical Engineering
University of Birmingham*

M

OPENING SESSION

Opening Address. H. O. BARRETT	3
--------------------------------	---

MANUFACTURING SYSTEMS

The role of design in the introduction of a new machine tool. B. J. DAVIES	7
Long-range trends in the automation of machine tools and manufacturing. M. EUGENE MERCHANT	13
Today's DNC in Japan. SEIUEMON INABA and HAJIMU INABA	21
Processing of workpiece information for producing engineering drawings. G. SPUR and J. GAUSEMEIER	29
DNC systems in the electrical industry—examples of applications at Siemens AG. B. GUTT and E. JUNGSMANN	35
Analysis of a direct numerical control system by means of real-time process simulation. M. WECK and A. SCHÜRING	41
The contribution of quality assurance to efficient production. L. SMITH	49
The optimum sequence of operations in the multistage manufacturing system. TATESHI KISHINAMI and KATSUMASA SAITO	57
Computerised archives and library system designed especially for manufacturing data. E. J. FEICHT	63
The use of a computer in a manufacturing system. M. Y. MALIK	67
Aspects of the control of manufacture in a small diecasting company. G. BEAUMONT and R. H. THORNLEY	71
Design and automatic set-up of drawings and work plans. W. EVERSHEIM and W. WIEWELHOVE	75
The design and implementation of an integrated computer production control system in a medium-sized engineering company. J. MALCOLM	81
The design of standard cells for group technology by the use of machine tool and workpiece statistics. MANSOOR HUSAIN and R. LEONARD	87
Layout design and simulation of group cells. ALLAN S. CARRIE and J. MANNION	99

NUMERICAL CONTROL

Improvement of adaptive control of milling machine by non-contact cutting force detector. KOJI NAKAZAWA	109
Adaptive control system for variable gain in ACC systems. G. STUTE and F. R. GOETZ	117
New automatic control system of NC machine tool for high working accuracy. M. MASUKO, N. NISHIWAKI, Y. KEMBO and B. S. SHIN	123
Profile accuracy of difficult-to-cut materials in computer numerical control. HIROSHI EDA and KOZO KISHI	129
A television-controlled printed circuit board drilling machine. D. PATERSON, A. R. TURNER-SMITH, J. A. G. HALÉ and P. SARAGA	137
The influence of microprocessors on the evolution of numerical control systems. R. SAVAGE	143
NC—CNC, what prospects has CNC to offer? R. BAISCH	149
Computer graphics and numerically controlled machine tools for pattern, mould and die production. R. B. MORRIS and D. B. WELBOURN	155

QUALITY CONTROL AND SAFETY

In-process or post-process metrology? W. N. CLARK	163
Development of an in-process sensor for surface roughness by laser beam. KIMIYUKI MITSUI and HISAYOSHI SATO	171
Aspects of machine tool safety in recent UK legislation. F. K. GROSZMANN	179

MACHINE TOOL DESIGN

Computing the thermal behaviour of machine tools using the finite element method—possibilities and limitations. M. WECK and L. ZANGS	185
An analysis of methods used in minimising thermal deformations of machine tools. KEIJI OKUSHIMA and YOSHIKI KAKINO	195
Control of the thermal deformation of a machine tool. T. SATA, Y. TAKEUCHI and N. OKUBO	203
Analysis and optimisation of structural dynamics of machine tools by a synthesis of dynamic rigidity program system. MASATAKA YOSHIMURA	209
Automatic optimisation of dynamic dampers for machine tool structures. H. VAN BRUSSEL, J. PINTE and K. SOUDAN	217
Damping in taper roller bearings. M. ELSERMANŞ, M. HONGERLOOT and R. SNOEYS	223
New developments in program control applied to big turret lathes. IAN NICKOLS	229
Presentation of a programmable controller with bit and word processing. G. STUTE and H. JETTER	235
Pneumatic stepping motors—design, control and application. H. K. TOENSHOFF and K. RALL	241
Computer-aided design and manufacture of rolls for cold roll forming machines. A. RHODES, T. MUNRO and A. S. BOARDMAN	251
Large rototraversing doughnut-type table for the machining of nuclear vessels. G. ZUFFELLATO	261
Design procedure for flat aerostatic bearings. J. C. PADATE and S. SOMASUNDARAM	267

SPECIAL PROCESSES

Some effects of electrolyte flow rates on the electrochemical machining process. P. J. MOIR and S. J. HARVEY	275
Electrochemical machining of curved long flowpath profiles. P. J. MOIR and S. J. HARVEY	283
Planetary spark erosion—application and optimisation. G. N. LEVY and B. FERRONI	291
Friction welding. G. R. DICKSON and A. S. BAHRANI	299
Slide pressure welding. N. BAY, P. M. KVIST and F. RASMUSSEN	309
Reclamation processes of machining swarf by consolidation and their economic feasibility. C. S. SHARMA and T. NAKAGAWA	313
Powder from swarf. J. M. ALEXANDER and B. LENGYEL	319

MACHINE TOOL OPERATION

A statistical approach to machine tool testing. A. GOLDER	331
The reliability and value of tests to determine the limitations of the performance of lathes imposed by self-excited vibration. H. BEESON and A. GOLDER	337
An investigation of the use of cutting tests to assess the performance of lathes. C. CONSTANTINESCU, N. D. CIRTU, G. PAXINO, H. BEESON and A. GOLDER	345
A survey of the noise levels of metal-cutting machine tools. N. D. CIRTU, R. DIMITRIU, D. HARTLEY and A. GOLDER	363
Determination of a performance value for machine tools with respect to noise emission and proposals to its improvement by design. H. K. TOENSHOFF and G. ROHR	371
A study on the dynamic machining of free machining steel. R. RAMASWAMI, H. VAN BRUSSEL and P. VANHERCK	377

GRINDING

The proper selection of grinding conditions in cylindrical plunge grinding. J. PETERS, R. SNOEYS and A. DECNEUT	387
Grindability of tool steels from the viewpoint of surface quality. IVO KVASNICKA	395
The identification of grinding faults from the appearance of the ground surface. H. RENKER	401
Improved technical and physical utilisation of vertical surface grinding machines by peripheral face grinding. R. REINHOLD	407
High efficiency, high precision grinding of parallel surfaces. HANS R. VOGT	411
Safety in grinding. G. SWEENEY and A. R. THORN	421

METAL FORMING

The mechanics of swing forging. J. M. ALEXANDER and M. A. CHAABAN	439
A study on plastic working of alloys in their masmy state—the second report. S. FUKUOKA, M. KIUCHI and K. ARAI	451
A new method of manufacturing wire. M. C. SHAW and T. HOSHI	459
Incremental forging of balls from cylindrical specimens and of rollers from rectangular solids. N. R. CHITKARA, W. JOHNSON and M. UEDA	467
Lubrication for warm forming. T. A. DEAN	483
The effect of seal position on stresses and deformations in dies for semi-continuous hydrostatic extrusion. J. M. ALEXANDER and M. E. SAID	491
A method of obtaining isothermal, constant high strain rate stress-strain data. M. MOHITPOUR and B. LENGYEL	503
Deep-drawing of tin-plate using a telescopic punch. S. R. GURUMUKHI and P. B. MELLOR	507
An investigation into the hole-flanging of Zn-Al superplastic sheet. G. G. W. CLEMAS, S. T. S. AL-HASSANI and W. JOHNSON	517
Deep-drawing of square shells with rubber die. K. YAMAGUCHI, M. FUKUDA and M. YOKOTA	527
Observations on the application of limit diagrams to aluminium alloy extrusion. T. SHEPPARD and A. F. CASTLE	535

METAL CUTTING

Resistance of alumina tool tips to formation of comb cracks. R. M. EL-ZAHRY and D. S. DUGDALE	547
Some experiments to compare diamond and diamond-compact turning tools. M. CASEY and J. WILKS	553
Deformation of tungsten carbide tools when cutting Inconel 718. A. E. FOCKE, F. E. WESTERMANN, A. ERMI, J. YAVELAK and M. HOCH	565
Continuous measuring of flank wear. TH. STÖFERLE and B. BELLMANN	573
Economic generation of tool life data using the <i>R-T</i> characteristic curve. M. Y. FRIEDMAN, V. A. TIPNIS and M. FIELD	579
An analysis of crater wear based on the adhesive wear mechanism. C. RUBENSTEIN	585
<i>Author Index</i>	595
<i>Subject Index</i>	597
