PREFACE

Mastering Hairdressing is intended to help those engaged in hairdressing. It will be particularly helpful to the professional student hairdresser wishing to become methodical and efficient, and of special use to those taking practical examinations, or those concerned with practical hairdressing.

The book attempts to reduce the confusion of a variety of methods that exist to simple, straightforward ones. Once these are grasped, other methods and techniques can then be more profitably explored. It is hoped that this will prove useful both as a guide and a reference book.

Each chapter is independent of the others and can be read separately, but each contributes to the book as a whole. It would be wrong to suggest that all that needs to be learned can possibly be contained in a work of this size. The essential groundwork has been covered and it remains for individuals to create for themselves and decide how far they wish to progress.

I should like to take this opportunity of thanking my publishers, and all who made this book possible, for their help, forbearance and encouragement.

LEO PALLADINO
