A Guide to
The Preparation of Civil Engineering Drawings

All royalties from the sale of this book will be donated to Oxfam in support of the United Nations' campaign to bring safe water and sanitation to everyone in poor countries by 1990.

Ninety per cent of children's deaths in poor countries could have been avoided by safe water and sanitation.

Water for irrigating crops can mean three harvests instead of one. So families would not go hungry in the dry season.

The World Health Organization estimates that eighty per cent of all disease in the world is linked with water.

People cannot stay healthy when they are dependent on inadequate water infected by parasites, polluted by sewage or fouled by animals.

A Guide to THE PREPARATION OF CIVIL ENGINEERING DRAWINGS

the condition that it shall not, by way of trade or otherwise,
be lent, resold, hired out, or otherwise circulated without
the publisher's prior consent in any form of binding or
cover other than that in which it is published and without
a similar condition including this condition being imposed
on the subsequent purchaser.

CONTENTS

Introduction	1	5. Graphic and Pictorial Methods of Design and Presentation	73
1. General Principles	3	5.1 Introduction	73
1.1 Introduction	3	5.2 Charts, Graphs and Diagrams	73
1.2 Drawing Instruments	3	5.3 Models	82
1.3 Drawing Office Practice	6	6. Computer Graphics	86
1.4 Health and Environment	18	6.1 Introduction	86
1.5 Layout	18	7. Drawing Applications	97
1.6 Draughting, Tracing and Colouring	19	7.1 Introduction	97
2. Drawing Office Layout, Control and Reproduction	25	7.2 Surveying	98
2.1 Introduction	25	7.3 Site Investigations	106
2.2 Office Layout	25	7.4 Detailing	107
2.3 Drawing Control and Filing	28	7.5 The Design and Construction of a Small Pedestrian Subway	135
2.4 Drawing Reproduction	29	7.6 Records	156
3. Projections and Basic Geometry	37	7.7 Conclusion	163
3.1 Introduction	37	<i>Appendix I Examples of Constructed Perspective</i>	164
3.2 Orthographic Projection	37	<i>Appendix II The Use of Calculators in the Design Office</i>	172
3.3 Auxiliary Projection	40	<i>Appendix III Public Utilities</i>	175
3.4 True Lengths	40	Index	178
3.5 Plans, Elevations and Sections	42		
3.6 Basic Geometry	44		
4. Three-dimensional Drawing and Sketching	54		
4.1 Introduction	54		
4.2 Sketching	54		
4.3 Constructed Three-dimensional Drawings	60		

ACKNOWLEDGEMENTS

The author particularly wishes to acknowledge the assistance of S.W. Farmer & Son Ltd, Tektronix (U.K.) Ltd, Building Computer Services Ltd, Computer Aided Design Centre, the London Borough of Ealing, Ove Arup Partnership and Thamesdown Borough Council.

He is also grateful for information supplied by the Public Utility organisations, the Department of Transport, Robert Watson & Co., the British Standards Institution, Benson Electronics Ltd, British Constructional Steelwork Association Ltd, Building Design Partnership (Preston), Loughborough University of Technology, Cement and Concrete Association, Hartley Reece & Company, British Thornton Ltd, Elite Manufacturing Co. Ltd, Dow-Mac Concrete Ltd, Sanders & Forster Ltd, Wild Heerbrugg (U.K.) Ltd, Spectra Alignment Ltd, Acrow (Engineers) Ltd, the National Reprographic Centre for documentation, Caps Microfilm Ltd, Cartographical Services Ltd, Addressograph-Multigraph Ltd, Gaf (G.B.) Ltd, Regma Ltd and Lamwood Ltd.

The author would also like to thank A. E. Hurren of Portsmouth Polytechnic for his helpful and constructive comments on the manuscript.

This project could not have been undertaken without the helpful cooperation of the publisher and the help, encouragement and best wishes of family and friends.
