The economics of natural resources.

1. Natural resources

I. Title

333 HC55

ISBN 978-0-333-19141-5

ISBN 978-1-349-86151-4 (eBook)

DOI 10.1007/978-1-349-86151-4

This book is sold subject to the standard conditions of the Net Book Agreement.

The paperback edition of this book is sold subject to the condition that it shall not, by way of trade or otherwise, be lent, resold, hired out, or otherwise circulated without the publisher's prior consent in any form of binding or cover other than that in which it is published and without a similar condition including this condition being imposed on the subsequent purchaser.

CONTENTS

<i>List of Tables</i>	vii
<i>List of Figures</i>	viii
1 INTRODUCTION	1
1.1 Natural resources and economics	1
1.2 Coverage and approach	1
1.3 Some terminology	3
1.4 Plan of the book	5
2 THE ADEQUACY OF NATURAL RESOURCES	7
2.1 The basic Pessimist position	7
2.2 Alleviations of resource scarcity	13
2.3 Evidence from the past	23
2.4 Critique of the empirical studies	26
2.5 Adapting to limits	29
2.6 Concluding comments	32
Appendix: a formal treatment of factor substitution and technical progress	34
3 FISHERY and MINE	38
3.1 The fishery	38
3.2 The mine	47
3.3 Summary and conclusions	58
Appendix: an optimal control formulation	58
4 THE SOCIALLY OPTIMAL USE OF RESOURCES	64
4.1 A simple model	64
4.2 Investment	67
4.3 Other complications	68
4.4 Conclusion	72
Appendix: mathematical models of optimal resource use	72
5 RESOURCE DEPLETION AND THE MARKET MECHANISM	81
5.1 The theory of the perfect-market mechanism	81
5.2 A critique of the perfect-market paradigm	83
5.3 Market failures	85
5.4 Summary	110

6	RESOURCE POLICIES	112
6.1	Common access and externalities	112
6.2	Private resources	119
6.3	Z.E.G., Z.E.D., and the stationary state	125
6.4	Pervasive distortions	128
6.5	Policies to reduce resource depletion	136
6.6	Conclusions	141
7	PROBLEMS OF REDUCING RESOURCE USE	142
7.1	Images of a low-resource society	142
7.2	Problems of a low-resource society	148
7.3	Problems of transition	151
7.4	Policies	159
7.5	Concluding comments	165
8	ENERGY, A CASE STUDY: (I) SUPPLY	166
8.1	Supply and demand — a preliminary view	166
8.2	An optimisation model	168
8.3	Alternative sources of supply	180
8.4	Conclusions	185
9	ENERGY, A CASE STUDY: (II) DEMAND	186
9.1	The scope for conservation: concepts	186
9.2	Past trends	198
9.3	A modelling approach	200
9.4	Simple leak-plugging	201
9.5	Measures claimed to involve little or no sacrifice	206
9.6	An assessment	212
9.7	A note on less-developed countries	213
10	GOVERNMENT POLICY AND THE PUBLIC	214
	<i>Notes</i>	217
	<i>References</i>	225
	<i>Name Index</i>	236
	<i>Subject Index</i>	239

ACKNOWLEDGEMENTS

Warm thanks are due to Esra Bennathan for constant encouragement and to Marjorie Lunt for her great patience in preparing the typescript.

LIST OF TABLES

2.1	Global availability of selected resources	9
2.2	Proven reserves and resource base, selected resources	15
2.3	Growth in output and selected inputs, U.K. agriculture 1965–72	21
3.1	Time series of catch, selected species	47
5.1	Resource rentals, extraction costs and prices	90
5.2	The effect of discounting	98
8.1	World energy resources (10^{21} J) and exhaustion dates on various assumptions	167
8.2	Crude petroleum production costs (\$/bl)	171
8.3	Energy prices in the Nordhaus model	173
9.1	Typical energy losses in domestic heating uses	195
9.2	Alternative equivalence ratios for conventional energy sources	197
9.3	U.K. energy consumption, 1960–2000	199
9.4	Primary energy saving from leak-plugging and belt-tightening, by sector (EJ)	205

LIST OF FIGURES

2.1	Exponential growth in the face of a limit	9
2.2	Production from renewable and non-renewable resources	13
2.3	Malthusian and Ricardian scarcity	31
3.1	The theory of the fishery	39
3.2	The optimal culling age	43
3.3	Road congestion	46
3.4	The mine: a simplified cost function	48
3.5	User cost, total extraction and resource stocks	50
3.6	The effect of the interest rate on the extraction path	51
3.7	Resource rentals of two grades of ore	54
3.8	Phase diagrams	61
4.1	The conflict between consumption and longevity	65
4.2	The choice between present and future consumption	66
4.3	The interaction between resources and population	69
4.4	Phase diagrams	75
4.5	Phase diagram	79
5.1	Inter-temporal choice	99
7.1	Decentralisation of work-places in a city	155
9.1	The sacrifice curve	186
