

Optical Data Storage

Philips Research

VOLUME 4

Editor-in-Chief

Dr. Frank Toolenaar

Philips Research Laboratories, Eindhoven, The Netherlands

SCOPE TO THE 'PHILIPS RESEARCH BOOK SERIES'

As one of the largest private sector research establishments in the world, Philips Research is shaping the future with technology inventions that meet peoples' needs and desires in the digital age. While the ultimate user benefits of these inventions end up on the high-street shelves, the often pioneering scientific and technological basis usually remains less visible.

This 'Philips Research Book Series' has been set up as a way for Philips researchers to contribute to the scientific community by publishing their comprehensive results and theories in book form.

Dr. Rick Harwig

Optical Data Storage

Phase-Change Media and Recording

By

Erwin R. Meinders

Philips Optical Media & Technology, Eindhoven, The Netherlands

Andrei V. Mijiritskii

Philips Lighting, Business Unit Automotive Lighting, Eindhoven,
The Netherlands

Liesbeth van Pieteron

Philips Research, Eindhoven, The Netherlands

and

Matthias Wuttig

I. Physikalisches Institut, RWTH Aachen, University, Aachen, Germany

Contents

1. Introduction	1
1.1. A brief overview of optical storage systems	1
1.2. The basics of optical storage.....	3
1.2.1. Optical drive layout	3
1.2.2. Basic principles of optical data storage.....	4
1.2.3. Optical storage roadmap	15
1.2.4. Optical media.....	16
1.2.5. Phase-change media.....	18
1.3. Scope of this book.....	20
1.4. References Chapter 1	21
2. Theoretical aspects of phase-change alloys	23
2.1. Introduction.....	23
2.2. Glass formation and the amorphous phase.....	26
2.3. Crystallization.....	30
2.3.1. Crystallization theory	30
2.3.2. Crystallization of amorphous marks in a phase-change disc	32
2.4. Classes of phase-change materials.....	34
2.4.1. Class I: Crystallization by nucleation and growth	35
2.4.2. Class II: Crystallization dominated by crystal growth.....	38
2.5. Emerging directions in phase-change research	40
2.6. References of chapter 2.....	46
3. Thermal modelling of phase-change recording	51
3.1. Multi-layer thermal model	51
3.1.1. Heat diffusion in thin layers.....	51
3.1.2. Heat conduction at microscale	52
3.1.3. Modelling of heat diffusion in multi-layer recording stacks....	53
3.1.4. Mark-formation and erasure model.....	56
3.2. Optical parameters of phase-change recording films.....	58
3.2.1. Optical properties of thin films	59
3.2.2. Stack design	63

3.3.	Thermal conductivity of thin films	64
3.3.1.	In situ laser methods	65
3.3.2.	Melt-threshold method.....	65
3.3.3.	Thermal conductivity results.....	66
3.4.	Determination of crystallization parameters	71
3.4.1.	Isothermal measurements.....	71
3.4.2.	Time-resolved static tester measurements	73
3.5.	Mark formation and erasure results	75
3.6.	Effect of groove shape on direct heating.....	80
3.6.1.	Groove structure of phase-change discs.....	80
3.6.2.	Land versus groove recording.....	84
3.6.3.	Groove-only recording.....	85
3.7.	References of chapter 3.....	88
4.	Data recording characteristics	93
4.1.	Data recording.....	93
4.1.1.	Recording, erasing and direct-overwriting of marks.....	93
4.1.2.	Pulse trains.....	95
4.1.3.	Erase of marks	97
4.1.4.	Write-erase sequence	106
4.1.5.	Write strategy types	110
4.2.	Quality of recorded data.....	110
4.2.1.	Material-limited run-length jitter	110
4.2.2.	Overwrite stability	112
4.2.3.	Repeated read stability.....	116
4.3.	Effect of multi-track recording	120
4.3.1.	Thermal cross-write	120
4.3.2.	Optical cross-talk	122
5.	Recording media.....	123
5.1.	Dual-layer media and recording.....	123
5.1.1.	Data capacity increase	123
5.1.2.	Layout of dual-layer media.....	124
5.1.3.	Optical design of dual-layer media	126
5.1.4.	Mark formation.....	128
5.1.5.	Transmittance difference	140

5.2.	Media for high-speed phase-change recording	145
5.2.1.	Introduction to speed race	145
5.2.2.	Materials for high-speed recording	146
5.2.3.	Optical and thermal design of high-speed recording media... ..	148
5.2.4.	Characterization of high-speed discs	150
5.2.5.	Mark formation in ultra-high speed recording stacks	156
5.2.6.	Influence of laser spot orientation on mark formation.....	166
5.3.	References of chapter 5.....	171
