## TABLE OF CONTENTS

<b>Preface</b>	
B. Qin, Z. Liu, K. Havens	1–2
<b>INTRODUCTORY PAPERS</b>	
<b>Environmental issues of Lake Taihu, China</b>	
B. Qin, P. Xu, Q. Wu, L. Luo, Y. Zhang	3–14
<b>The art and science of lake restoration</b>	
B. Moss	15–24
<b>PHYSICAL AND GEO-CHEMICAL PROCESSES IN EUTROPHIC LAKES</b>	
<b>Phosphorus dynamics at multiple time scales in the pelagic zone of a large shallow lake in Florida, USA</b>	
K.E. Havens, K.-R. Jin, N. Iricanin, R.T. James	25–42
<b>Chromophoric dissolved organic matter (CDOM) absorption characteristics in relation to fluorescence in Lake Taihu, China, a large shallow subtropical lake</b>	
Y. Zhang, B. Qin, G. Zhu, L. Zhang, L. Yang	43–52
<b>Effects of hydrodynamics on phosphorus concentrations in water of Lake Taihu, a large, shallow, eutrophic lake of China</b>	
G. Zhu, B. Qin, G. Gao, L. Zhang, L. Luo, Y. Zhang	53–61
<b>Total inputs of phosphorus and nitrogen by wet deposition into Lake Taihu, China</b>	
L. Luo, B. Qin, L. Yang, Y. Song	63–70
<b>The effects of different electron donors on anaerobic nitrogen transformations and denitrification processes in Lake Taihu sediments</b>	
D. Wang, Q. Huang, C. Wang, M. Ma, Z. Wang	71–77
<b>A 200-year historical modeling of catchment nutrient changes in Taihu basin, China</b>	
G. Yu, B. Xue, G. Lai, F. Gui, X. Liu	79–87
<b>Evaluation of biogenic and anthropogenic inputs of aliphatic hydrocarbons to Lake Taihu sediments using biomarkers</b>	
W. Qu, B. Xue, C. Su, S. Wang	89–95
<b>Spatio-temporal distribution of nitrogen in the undulating littoral zone of Lake Taihu, China</b>	
H. Wang, J. Lu, W. Wang, P. Huang, C. Yin	97–108
<b>Variations in kinetics of alkaline phosphatase in sediments of eutrophic, shallow, Chinese lakes</b>	
Y. Zhou, X. Cao, C. Song, J. Li, G. Chen, L. Peng	109–116

<b>Environmental changes in Lake Taihu during the past century as recorded in sediment cores</b>	
B. Xue, S. Yao, W. Xia	117–123
<b>Role of climate and agricultural practice in determining matter discharge into large, shallow Lake Võrtsjärv, Estonia</b>	
P. Nõges, M. Kägu, T. Nõges	125–134
<b>Stable isotopic composition of nitrate in Lake Taihu, China, and major inflow rivers</b>	
A. Townsend-Small, M.J. McCarthy, J.A. Brandes, L. Yang, L. Zhang, W.S. Gardner	135–140
<b>Distribution and chemical fractionation of heavy metals in recent sediments from Lake Taihu, China</b>	
J. Shen, E. Liu, Y. Zhu, S. Hu, W. Qu	141–150
<b>Vegetation and soil properties in restored wetlands near Lake Taihu, China</b>	
J. Lu, H. Wang, W. Wang, C. Yin	151–159
<b>BIOLOGICAL PROCESSES AND ECOSYSTEM RESPONSES IN EUTROPHIC SHALLOW LAKES</b>	
<b>Quantitative studies on phosphorus transference occurring between <i>Microcystis aeruginosa</i> and its attached bacterium (<i>Pseudomonas</i> sp.)</b>	
L. Jiang, L. Yang, L. Xiao, X. Shi, G. Gao, B. Qin	161–165
<b>Intracellular phosphorus metabolism and growth of <i>Microcystis aeruginosa</i> in dark/light cycles under various redox potential difference conditions</b>	
X. Shi, L. Yang, L. Jiang, F. Kong, B. Qin, G. Gao	167–176
<b>The bacterioplankton of Lake Taihu, China: abundance, biomass, and production</b>	
G. Gao, B. Qin, R. Sommaruga, R. Psenner	177–188
<b>Floating-leaved macrophyte (<i>Trapa quadrispinosa</i> Roxb) beds have significant effects on sediment resuspension in Lake Taihu, China</b>	
P. Huang, B. Han, Z. Liu	189–193
<b>Nitrogen dynamics and microbial food web structure during a summer cyanobacterial bloom in a subtropical, shallow, well-mixed, eutrophic lake (Lake Taihu, China)</b>	
M.J. McCarthy, P.J. Lavrentyev, L. Yang, L. Zhang, Y. Chen, B. Qin, W.S. Gardner	195–207
<b>Different competitive outcomes among four species of cladocerans under different alga combinations of colonial <i>Microcystis</i> spp. and green alga <i>Scenedesmus obliquus</i></b>	
F. Chen, P. Xie, B. Qin	209–215
<b>The effect of temperature on growth characteristics and competitions of <i>Microcystis aeruginosa</i> and <i>Oscillatoria mougeotii</i> in a shallow, eutrophic lake simulator system</b>	
Z. Chu, X. Jin, N. Iwami, Y. Inamori	217–223
<b>Stability and change of phytoplankton communities in a highly dynamic environment—the case of large, shallow Lake Balaton (Hungary)</b>	
M. Honti, V. Istvánovics, A. Osztóics	225–240
<b>Intra-habitat heterogeneity of microbial food web structure under the regime of eutrophication and sediment resuspension in the large subtropical shallow Lake Taihu, China</b>	
Q.L. Wu, Y. Chen, K. Xu, Z. Liu, M.W. Hahn	241–254

<b>Effects of limiting nutrients and N:P ratios on the phytoplankton growth in a shallow hypertrophic reservoir</b>	
H.-S. Kim, S.-J. Hwang, J.-K. Shin, K.-G. An, C.G. Yoon	255–267
<b>EUTROPHICATION CONTROL AND MANAGEMENT OF SHALLOW LAKES</b>	
<b>Restoration of shallow lakes by nutrient control and biomanipulation—the successful strategy varies with lake size and climate</b>	
E. Jeppesen, M. Meerhoff, B.A. Jakobsen, R.S. Hansen, M. Søndergaard, J.P. Jensen, T.L. Lauridsen, N. Mazzeo, C.W.C. Branco	269–285
<b>Dredging effects on P status and phytoplankton density and composition during winter and spring in Lake Taihu, China</b>	
X. Cao, C. Song, Q. Li, Y. Zhou	287–295
<b>Toxicity evaluation of Meiliang Bay, Lake Taihu, China—a drinking water source</b>	
Y. Chen, H. Chen, Y. Wu, Z. Li, L. Sun, M. Qu, Z. Kong	297–303
<b>Updating water quality targets for shallow Lake Balaton (Hungary), recovering from eutrophication</b>	
V. Istvánovics, A. Clement, L. Somlyódy, A. Specziár, L. G.-Tóth, J. Padisák	305–318
<b>Removal of agricultural non-point source pollutants by ditch wetlands: implications for lake eutrophication control</b>	
C. Jiang, X. Fan, G. Cui, Y. Zhang	319–327
