Contents

About the Author	xiii
About the Technical Reviewer	xv
Acknowledgments	xvii
CHAPTER 1 Introducing Mobile Media API (MMAPI)	1
What Is Mobile Media API (MMAPI)?	1
MMAPI Features and Requirements	2
How Do I Get MMAPI?	3
How Does MMAPI Fit with MIDP 2.0?	3
Who Supports MMAPI?	5
Summary	6
CHAPTER 2 MMAPI Architecture	7
Understanding Players and DataSources	7
DataSource Basics	8
Player Basics	9
Understanding the Manager Class	9
Creating Player Instances	10
Creating Player Instances for MIDI and Tone Sounds	11
Supported Protocols and Content Types	11
Understanding Controls	13
The MIDP 2.0 Subset	14
Feature Set Implementations	15
Security Architecture	16
Summary	17
CHAPTER 3 Getting Started with MMAPI	19
A Simple Multimedia Player	19
Creating a Functional Player	22
Writing the Code	23
Improving AudioPlayerCanvas: Caching Player Instances	29
Summary	37

CHAPTER 4	Media Player Lifecycle and Events	39
	Overview	39
	Exploring the Different Player States	39
	UNREALIZED	40
	REALIZED	41
	PREFETCHED	43
	STARTED	44
	CLOSED	46
	Responding to Player Events	47
	Understanding the Event Delivery Mechanism	50
	Creating an Event Handling Class	51
	Handling a Custom Event	55
	Summary	58
CHAPTER 5	Accessing Media Over the Network	59
	Understanding Threads in Java ME	59
	Understanding Permissions for Network Access	63
	Putting It Together	67
	Summary	71
CHAPTER 6	Creating and Playing Tones Using ToneControl	73
	Understanding Synthetic Tones	73
	Understanding Note, Pitch, and Frequency	74
	Using a MMAPI Formula to Calculate Note Values	76
	Using the playTone() Method	79
	Using Tone Sequences with ToneControl	81
	Defining Tone Sequences	82
	Playing Sequences Using ToneControl and Player	88
	Distributing Tone Sequences	89
	Summary	93
CHAPTER 7	Managing MIDI Using MIDIControl, TempoControl, and PitchControl	95
	Understanding MIDI	95
	Understanding the MIDI Specification	96
	Storing and Distributing MIDI Messages	101

Using MIDI in MMAPi	102
Playing MIDI Without MIDIControl	102
Playing MIDI with MIDIControl	113
Summary	125
CHAPTER 8 Working with Audio and Video	127
Querying the Capabilities of Your Device	127
Understanding Media Encodings	132
A Brief Overview of Sampled Audio	133
Storing Sampled Audio	133
Controlling Sampled Audio	134
Setting Preset Stop Times with StopTimeControl	134
Gathering Information Using metaDataControl	139
Mixing Sampled Audio, MIDI, and Tones	142
Capturing Audio	146
Timed Capture and Playback	147
Controlled Capture and Playback	151
Saving Captured Audio	158
Capturing Audio from Existing Audio	162
Working with Video	163
Displaying Video	163
Positioning Video and Controlling Volume	169
Capturing Video and Images	173
Seeking Video Frames with FramePositioningControl	181
Streaming Media	181
Summary	184
CHAPTER 9 Case Study: Device Blogging	185
About the Companion Web Site	185
The Finished MIDlet in Action	185
MIDlet Startup	186
Registering with the Device Blog Web Site	186

About the Author

VIKRAM GOYAL is a software developer living in Brisbane, Australia. Vikram writes on Java development issues for the mobile environment at <http://today.java.net/pub/au/179>. You can contact him at vikram@mmapibook.com.

About the Technical Reviewer

ROBERT VIRKUS is the architect and lead programmer for the open source project J2ME Polish. He is an internationally recognized J2ME expert and is a member of Mobile Solution Group, Bremen, Germany.

After studying law and computer science in Bremen, Germany, and Sheffield, England, Robert began working in the mobile industry in 1999. He followed WAP and J2ME from their very beginnings and developed large-scale mobile betting applications.

In 2004, he founded Enough Software, the company behind J2ME Polish.

In his spare time, Robert enjoys the company of his friends and his dog, Benny. Other spare-time favorites are going to concerts of soul, ska, and punk-rock bands, and playing around with old computers such as Atari 400, Commodore 8296, and MCS Alpha 1.

Acknowledgments

Even though you see my name at the front of this book, it's the result of a collective effort on the part of several individuals. All these individuals need to be honored and acknowledged because without them, you would not be holding this book in your hands.

In order of my acquaintance with them, I would like to start with **Gary Cornell**, Apress Publisher and **Steve Anglin**, Java Editor at Apress for having the vision to build a comprehensive library of wireless Java books. **Tina Nielsen** as the Publisher's Assistant was quick with the contracts ensuring a speedy startup on the writing process. **Sofia Marchant**, the Project Manager for this book, was like a conductor who ensured that the various harmonies blended together perfectly to produce a book on time. **Robert Virkus**, the Technical Editor, was very forthcoming with his analysis of the text and code, and the final book is a better copy because of his efforts. **Julie McNamee**, who I hope reads and corrects this before it gets to you, worked tirelessly as the Copy Editor ensuring that I meant what I wrote. **Laura Esterman**, as the Production Editor, had an eagle eye that did not let even the tiniest of errors pass through via the production process.

There are, of course, other people involved in the production of this book, whom I never met, and a big Thank You to all of them for a job well done.

Finally a note about the loved ones: My mum and dad worked very hard to bring me up, and I can never thank them enough for their persistence and hard work.

My wife, Shellie, has suffered because of the hours I have spent in "the office" and deserves a reward for her patience. More than that, she supports me to be all I can and even puts up with my interference of her routine when I take away her mobile phone (to test the applications). To miss all the holidays and breaks and not complain is a feat in itself. I look forward to spending more time with her and to the upcoming addition to our family.
