Contents

About the Authors.....	xix
About the Technical Reviewer	xxi
Acknowledgments	xxiii
■ Chapter 1: Here We Go Round Again.....	1
What This Book Is.....	1
What You Need To Know	2
What You Need Before You Can Begin	2
What's In this Book.....	4
■ Chapter 2: Core Data: What, Why, and How	7
A Brief History of Core Data.....	8
Creating a Core Data Application	8
Core Data Concepts and Terminology	12
The Data Model.....	13
Managed Objects.....	25
Key-Value Coding	25
Managed Object Context	26
Putting Everything in Context	37

Chapter 3: A Super Start: Adding, Displaying, and Deleting Data	39
Setting up the Xcode Project	40
Adding a Scene	48
Scenes and Segues	48
Storyboard Document Outline	49
Application Architecture	50
Designing the View Controller Interface	51
Creating HeroListController	56
Making the Connections and Outlets	60
Navigation Bar Buttons	63
Tab Bar and User Defaults	66
Designing the Data Model	67
Adding an Entity	68
Editing the New Entity	68
Adding Attributes to the Hero Entity	70
Declaring the Fetched Results Controller	76
Implementing the Fetched Results Controller	77
Fetched Results Controller Delegate Methods	79
Making All Work	80
Error Handling	80
Implementing Edit and Add	81
Coding the Table View Data Source and Delegate	82
Sorting the Table View	83
Loading the Fetch Request At Launch	84
Let 'Er Rip	84
Done, but Not Done	86
Chapter 4: The Devil in the Detail View	87
View Implementation Choices	87
Creating the Detail View Controller	89
Wiring Up the Segue	94
HeroDetailController	95

Detail View Challenges	95
Controlling the Table Structure with Property Lists	97
Property Lists Explained	97
Modeling Table Structure with a Property List	98
Defining the Table View via Property List	99
Parsing the Property List	103
Pushing the Details	104
Showing the Details	106
Editing the Details	107
Editing Mode in the Detail View	107
Creating a Custom UITableViewCell Subclass	110
Saving Your Changes	114
Specialized Input Views	115
DatePicker SuperDBEditCell Subclass	115
Using the DatePicker SuperDBEditCell Subclass	117
Implementing a Selection Picker	119
Devil's End	122
■ Chapter 5: Preparing for Change: Migrations and Versioning	123
About Data Models	124
Data Models Are Compiled	125
Data Models Can Have Multiple Versions	126
Creating a New Data Model Version	126
The Current Data Model Version	128
Data Model Version Identifiers	128
Migrations	129
Lightweight vs. Standard	130
Standard Migrations	130
Setting Up Your App to Use Lightweight Migrations	130
Time to Migrate On	131

Chapter 6: Custom Managed Objects	133
Updating the Data Model.....	137
Adding the Age Attribute.....	138
Adding the Favorite Color Attribute.....	138
Adding a Minimum Length to the Name Attribute	139
Creating the Hero Class.....	140
Tweaking the Hero Header	142
Defaulting	143
Validation.....	144
Single-Attribute Validations	145
nil vs. NULL.....	146
Multiple-Attribute Validations	147
Virtual Accessors.....	148
Adding Validation Feedback	149
Updating the Detail View	151
Refactoring SuperDBEditCell.....	153
Xcode Refactoring Options	153
Moving Code Around.....	156
Editable Property	158
Creating a Color Table View Cell	159
Custom Color Editor	160
Custom Color Table View Cell	162
Cleaning up the Picker	164
One More Thing	169
Color Us Gone.....	172
Chapter 7: Relationships, Fetched Properties and Expressions	173
Expanding Your Application: Superpowers and Reports.....	173
Relationships.....	176
To-One Relationships.....	178
To-Many Relationships	178

Inverse Relationships	180
Fetches Properties	181
Creating Relationships and Fetches Properties in the Data Model Editor	182
Delete Rules	182
Expressions and Aggregates	183
Adding the Power Entity	184
Creating the Powers Relationship	186
Creating the Inverse Relationship	188
Creating the olderHeroes Fetches Property	188
What is a Predicate?	189
Creating the youngerHeroes Fetches Property	190
Creating the sameSexHeroes Fetches Property	191
Creating the oppositeSexHeroes Fetches Property	191
Adding Relationships and Fetches Properties to the Hero Class	191
Updating the Detail View	192
Rethinking Configuration	195
Encapsulation and Information Hiding	199
Data-Driven Configuration	201
Adding Powers	202
Refactoring the Detail View Controller	208
Renaming the Configuration Class	208
Refactoring the Detail Controller	210
Refactoring the Hero Instance Variable	210
A Little More Abstraction	211
A New HeroDetailController	213
The Power View Controller	214
Navigating to the PowerViewController	216
Fetch Properties	218
Wonderful to the Core	221

Chapter 8: Behind Every iCloud	223
Data Storage with iCloud.....	223
iCloud Basics	224
iCloud Backup	224
Enabling iCloud in Your Application	225
Key-Value Data Storage	225
Document Storage	226
UIDocument	226
UIDocument with iCloud	230
NSMetadataQuery.....	231
Core Data with iCloud.....	233
Enhancing SuperDB.....	234
Entitlements	235
Creating an iCloud enabled Provisioning Profile.....	236
Updating the Persistent Store.....	245
Updating the Managed Object Context	247
Updating the UI on DataChanged.....	248
Testing the Data Store	249
Keep Your Feet on the Ground	249
Chapter 9: Peer-to-Peer Over Bluetooth Using Game Kit.....	251
Game Center.....	251
Peer-to-Peer Connectivity	253
In Game Voice.....	254
This Chapter's Application	254
Network Communication Models	262
Client-server Model	262
Peer-to-Peer Model	263
Hybrid Client-server/Peer-to-Peer	264

The Game Kit Session	264
Creating the Session.....	265
Finding and Connecting to Other Sessions.....	266
Listening for Other Sessions.....	266
Sending Data to a Peer	267
Packaging Up Information to Send	268
Receiving Data from a Peer	268
Closing Connections	269
The Peer Picker	270
Creating the Peer Picker.....	270
Handling a Peer Connection	270
Creating the Session.....	270
Creating the Project.....	271
Turning Off the Idle Timer	271
Importing the Game Kit Framework.....	272
Designing the Interface	272
Defining Application Constants.....	273
Designing the Game Board.....	275
Creating the Packet Object.....	278
Setting Up the View Controller Header	280
Trying It Out.....	292
Game On!.....	293
 ■ Chapter 10: Map Kit.....	 295
This Chapter's Application.....	295
Overview and Terminology	297
The Map View	298
Map Types.....	298
User Location.....	300
Coordinate Regions	301
Setting the Region to Display	304
The Map View Delegate	304

Annotations	306
The Annotation Object	306
The Annotation View	307
Adding and Removing Annotations.....	308
Selecting Annotations.....	308
Providing the Map View with Annotation Views.....	309
Geocoding and Reverse Geocoding.....	310
Building the MapMe Application.....	311
Linking the Map Kit and Core Location Frameworks.....	311
Building the Interface	311
Finishing the View Controller Interface.....	313
Writing the Annotation Object Class	314
Implementing the MapMe ViewController	316
Go East, Young Programmer	321
 ■ Chapter 11: Messaging: Mail, SMS, and Social Media	323
This Chapter's Application.....	323
The MessageUI Framework.....	326
Creating the Mail Compose View Controller	327
Populating the Subject Line.....	327
Populating Recipients.....	327
Setting the Message Body.....	328
Adding Attachments	328
Presenting the Mail Compose View	328
The Mail Compose View Controller Delegate Method.....	328
Message Compose View Controller	329
The Social Framework	330
SLComposeViewController	330
SLRequest	332
The Activity View Controller.....	333

Building the MessageImage Application	333
Building the User Interface	334
Taking the Picture	334
Calling the Camera	334
Picking the Message Sender	335
Mailing It In... ..	336
■ Chapter 12: Media Library Access and Playback	337
The MediaPlayer Framework	337
Media Items	338
Media Item Collections	343
Media Queries and Media Property Predicates	344
The Media Picker Controller	347
The Music Player Controller	349
Simple Music Player	354
Building the SimplePlayer Application	355
Building the User Interface	355
Declaring Outlets and Actions	360
MPMoviePlayerController	365
MPMediaPlayer	366
AVFoundation	376
AVMediaPlayer	377
Avast! Rough Waters Ahead!	403
■ Chapter 13: Locking It Down: iOS Security	405
Security Considerations	406
Security Techniques	406
Encryption	406
Hashing	407
Certificates and Signatures	407
Identity	407

Security in iOS	407
Randomization Keychains	409
Certificates, Keys, and Trust Services	414
Keychain Viewer Application	414
Create a Certificate Authority	415
Creating the Keychain App	420
Security Never Sleeps	442
■ Chapter 14: Keeping Your Interface Responsive	443
Exploring the Concurrency Problem	444
Creating the Stalled Application	445
Designing the Interface	445
Implementing the Stalled View Controller	446
Timers	449
Creating a Timer	449
Stopping a Timer	450
Limitations of Timers	450
Fixing Stalled with a Timer	451
Creating the Batch Object	451
Updating the Nib	453
Updating the View Controller Header	453
Updating the View Controller Implementation	454
Operation Queues and Concurrency	457
Threads	458
Operations	464
Operation Queues	467
Fixing Stalled with an Operation Queue	468
Creating SquareRootApplication	469
Custom ProgressCell	473

Adjusting the User Interface	474
Changes to ViewController.h	474
Updating ViewController.m	475
Queue 'em Up.....	480
■ Chapter 15: Unit Testing, Debugging, and Instruments	481
Unit Tests.....	482
Debugging	491
Breakpoints	493
The Debug Navigator	495
The Debug Area	496
Trying Out the Debug Controls.....	498
The Breakpoint Navigator and Symbolic Breakpoints	500
Conditional Breakpoints.....	501
Breakpoint Actions.....	503
Static Analysis	506
One More Thing About Debugging	507
Profiling With Instruments.....	507
End Of The Road	510
■ Chapter 16: The Road Goes Ever On... ..	511
Getting Unstuck	511
Apple's Documentation	512
Mailing Lists	512
Discussion Forums	512
Web Sites	513
Blogs	513
And If All Else Fails... ..	514
Farewell.....	514
Index.....	515

About the Authors

Dave Mark is a longtime Mac developer and author who has written a number of books on Mac and iOS development, including *Beginning iPhone 4 Development* (Apress, 2011), *More iPhone 3 Development* (Apress, 2010), *Learn C on the Mac* (Apress, 2008), *Ultimate Mac Programming* (Wiley, 1995), and *The Macintosh Programming Primer* series (Addison-Wesley, 1992). Dave was one of the founders of MartianCraft, an iOS and Android development house. Dave loves the water and spends as much time as possible on it, in it, or near it. He lives with his wife and three children in Virginia.

Jeff LaMarche is a Mac and iOS developer with more than 20 years of programming experience. Jeff has written a number of iOS and Mac development books, including *Beginning iPhone 4 Development* (Apress, 2011), *More iPhone 3 Development* (Apress, 2010), and *Learn Cocoa on the Mac* (Apress, 2010). Jeff is a principal at MartianCraft, an iOS and Android development house. He has written about Cocoa and Objective-C for MacTech Magazine, as well as articles for Apple's developer web site. Jeff also writes about iOS development for his widely read blog at www.iphonedevdevelopment.blogspot.com.

Kevin Kim is a co-founder and developer at AppOrchard LLC, a Tipping Point Partners company focused on sustainable iOS development. A graduate of Carnegie Mellon University, he was first exposed to the NeXTStep computer (the ancestor of today's iPhone) as a programmer at the Pittsburgh Supercomputing Center and has been hooked ever since. His career has spanned finance, government, biotech, and technology, including Apple where he managed the Apple Enterprise Services team for the New York metro area. Kevin was also a co-author of *Pro iOS 5 Tools* (Apress, 2011). He currently resides in the Alphabet City section of New York City with his wife and a clowder of rescued cats.

About the Technical Reviewer

Nick Waynik has been working in the IT field for over 13 years and has done everything from network administration to web development. He started writing iOS apps when the SDK was first released. Since then he has gone on to start his own business focusing on iOS development. He loves spending his free time with his wife, Allison, and son, Preston; sometimes he even plays golf. He blogs at nickwaynik.com and can be found on Twitter as [@n_dubbs](https://twitter.com/n_dubbs).

Acknowledgments

Writing a book like this one is more than the effort of us, the authors. Even though our names are on the cover, it is the result of the hard work of many people.

First, I would like to thank Dave Mark and Jeff LaMarche for writing the first version of the book, and for giving me a solid foundation from which to build and expand upon.

I would like to thank the staff at Apress for making sure this book was completed as close to schedule as possible. Brigid Duffy provided the guidance and oversight to make sure I completed this book. Tom Welsh made sure I stayed on topic and kept things clear. Mary Behr made the manuscript look beautiful. I'd also like to thank Brandon Levesque for making sure people knew this book was coming.

Thanks to the technical reviewers Nick Waynick and Mark Dalrymple for making sure the code I wrote actually works. Any mistakes that still exist are mine.

Thanks to my friends and colleagues at AppOrchard for their patience through the last several months of curmudgeonly behavior and for helping me make this project successful.

A great deal of thanks to my wife, Annie, for making sure I worked on this book when I would have rather been watching baseball or playing guitar. Thanks to my cats, PK, Manny, and Leela, for wanting to be fed when I needed a break. An extra thanks goes to Manny for being the subject of many of the examples in this book.

Finally, thanks to you, the reader, for buying this book. We like to think of programming as a scientific discipline, but, at times it feels more like a black art. If this book helps you on your journey of understanding iOS programming, then it is all worthwhile.
