# About the Author

■ **Anthony Rizk** is an experienced mobile application developer; he is currently CTO and co-founder of Zeebu Mobile, which makes educational mobile applications for children. Previously, Anthony was a founding member of Rove Mobile where he was part of the team that created and developed their mobile network management products, including Mobile Admin, Mobile SSH, and PCMobilizr. He has been developing BlackBerry applications for over 8 years and has consulted extensively in the wireless application industry. He lives in Ottawa with his wife and daughter.

# About the Technical Reviewer

■ **Paul Dumais** is a mobile application innovator; he is currently the Senior Technical Architect for BlackBerry App World at Research In Motion. Previously, Paul co-founded Rove Mobile (formerly Idokorro) where he was responsible for creating and developing all their mobile network management products including Mobile Admin, Mobile SSH, Mobile Desktop, Mobile Citrix, BlackBerry Viewer and PCMobilizr. His expertise includes developing applications for BlackBerry, Symbian, Windows Mobile, Palm and iPhone. In 1999, Paul created an award winning change management product that was acquired by MKS which is now serving as the foundation of the MKS Integrity Platform.

# Acknowledgments

Thank you to the two most important people in my life, without whom this book would not have been written: My wife, Sabrina, for encouraging my writing in blog and book form, keeping me away from distractions, making sure I stuck to my schedule, and taking care of our daughter on those crucial days when I needed an extra few hours to complete a chapter. My daughter Hannah for motivating me to try something new, and for still being young enough to go to bed early giving daddy a bit more time to work.

Thanks to my technical reviewer, and the best software developer I know, Paul Dumais for believing in the idea of this book from the beginning; reviewing, correcting and improving all my code; and providing ideas and information about BlackBerry development.

Thanks to the people at Research In Motion and elsewhere who provided feedback and helped improve the book, notably Mike Kirkup and his team.

Finally, thank you to the team at Apress. Anne Collett, for managing to keep the whole project to a very tight schedule, while dealing with the last minute revisions and questions of a first-time author. Ewan Buckingham for his editing and encouragement. Mark Beckner for bringing me into this mess in the first place. Finally Heather Lang, Ginny Munroe, and Kim Wimpsett for such a fantastic job copy editing. My first book has been a fun and eye-opening experience thanks to all of you.
