

International Series in Operations Research & Management Science

Volume 152

Series Editor:

Frederick S. Hillier
Stanford University, CA, USA

Special Editorial Consultant:

Camille C. Price
Stephen F. Austin, State University, TX, USA

Acknowledgements

The process by which these volumes came to fruition has been a long one, and we are grateful for the support of many different people for their support, advice and contributions. First among these are the contributing authors – without them, there would be no book, and we are deeply grateful to them for bearing with our repeated requests for materials and revisions while providing the high-quality contributions worthy of these volumes. The many reviewers who gave of their time and effort to help improve the chapters are also gratefully acknowledged.

Thanks are also due to Professor F. Hillier, the Editor of this Series, for supporting the project, and to Gary Folven, under whose guidance the project took shape, and who sustained us through the first four years until his well-deserved retirement. His many contributions to operations research over a long and distinguished publishing career will stand for a long time. Neil Levine and Matthew Amboy of Springer saw the volumes through production, nudging the editorial team when necessary and exhibiting resourcefulness and patience above and beyond the call of duty. Thanks also to Carrie Brooks of North Carolina State University for preparing the lists of authors for indexing at very short notice.

An undertaking of this magnitude and duration would simply not be possible without a collegial, mutually supporting editorial team. It has been a privilege to work together on this project; we have all learnt from each other and from the authors who have contributed, and are grateful to have had this opportunity to work with some of the best in our field.

Finally, we would like to thank our families, who have had to put up with late nights and grumpy mornings over the duration of the project, and without whose support and understanding our lives would be much poorer in many ways.

Contents

1	Production Planning Under Uncertainty with Workload-Dependent Lead Times: Lagrangean Bounds and Heuristics	1
	Gregory Dobson and Uday S. Karmarkar	
2	Production Planning and Scheduling: Interaction and Coordination	15
	Yiwei Cai, Erhan Kutanoglu, and John Hasenbein	
3	The Effects of Production Planning on the Dynamic Behavior of a Simple Supply Chain: An Experimental Study	43
	Seza Orcun and Reha Uzsoy	
4	Supply and Demand Synchronization in Assemble-to-Order Supply Chains	81
	Markus Ettl, Karthik Sourirajan, Pu Huang, Thomas R. Ervolina, and Grace Y. Lin	
5	Quantitative Risk Assessment in Supply Chains: A Case Study Based on Engineering Risk Analysis Concepts	105
	Léa A. Deleris and Feryal Erhun	
6	A Practical Multi-Echelon Inventory Model with Semiconductor Manufacturing Application	133
	Kaan Katircioglu and Guillermo Gallego	
7	A Mechanism Design Approach for Decentralized Supply Chain Formation	153
	Dinesh Garg, Y. Narahari, Earnest Foster, Devadatta Kulkarni, and Jeffrey D. Tew	

8 Procurement Network Formation: A Cooperative Game Approach	185
T.S. Chandrashekar and Y. Narahari	
9 Designing Flexible Supply Chain Contracts with Options	207
Feng Cheng, Markus Ettl, Grace Y. Lin, Maiké Tonner, and David D. Yao	
10 Build-to-Order Meets Global Sourcing: Planning Challenge for the Auto Industry	231
Melda Ormeci Matoglu and John Vande Vate	
11 Practical Modeling in Automotive Production	249
Jonathan H. Owen, Robert R. Inman, and Dennis E. Blumenfeld	
12 Why Is It So Hard to Build and Validate Discrete Event Simulation Models of Manufacturing Facilities?	271
Seth A. Fischbein and Edward Yellig	
13 A Practical Approach to Diagnosing and Tuning a Statistical Forecasting System	289
Ying Tat Leung and Kumar Bhaskaran	
14 The Ongoing Challenge: Creating an Enterprise-Wide Detailed Supply Chain Plan for Semiconductor and Package Operations	313
Kenneth Fordyce, Chi-Tai Wang, Chih-Hui Chang, Alfred Degbotse, Brian Denton, Peter Lyon, R. John Milne, Robert Orzell, Robert Rice, and Jim Waite	
15 Production Planning in the Plastics Industry	389
Rajesh Tyagi and Srinivas Bollapragada	
16 Model Predictive Control in Semiconductor Supply Chain Operations	403
Karl Kempf, Kirk Smith, Jay Schwartz, and Martin Braun	
17 Models and Methods for Production Scheduling in the Pharmaceutical Industry	429
Dario Pacciarelli, Carlo Meloni, and Marco Pranzo	
18 Developing a Computerized Scheduling System for the Steelmaking–Continuous Casting Process	461
Hubert Missbauer, Wolfgang Hauber, and Werner Stadler	

19 A Multi-Model Approach for Production Planning and Scheduling in an Industrial Environment489
Abdelhakim Artiba, Valerie Dhaevers, David Duvivier, and Salah E. Elmaghraby

20 Fuzzy Logic-Based Production Scheduling and Rescheduling in the Presence of Uncertainty531
Sanja Petrovic, Dobrila Petrovic, and Edmund Burke

21 The Summing-Up563
Karl Kempf, Pınar Keskinocak, and Reha Uzsoy
