List of Figures

Chapter 1 Introduction

Figure 1-1: How Is the Congestion Pie Sliced?	2
Figure 1-2: Typical Volume Occupancy Plot Used in the Calculation of Entrance Ramp Metering Rates, Chicago, IL	6
Figure 1-3: The Fundamental Diagram (May, Adolf)	7
Figure 1-4: The Number of Ramps Controlled by Ramp Meter in the USA Is 1981, 8% of the Whole Nation	10
Figure 1-5: Block Diagram for DTR Feedback Control	14
Figure 1-6: Ramp Metering Technology	15
Figure 1-7: Coordinated Ramp Metering	16
Figure 1-8: Ramp Signal	17
Figure 1-9: Inductive Loops	17
Figure 1-10: Isolated Ramp Metering Simulation	22
Figure 1-11: Simulation Results for No Ramp Input	22
Figure 1-12: Simulation Results for Open Always Ramp	23
Figure 1-13: Actual versus Demanded Values of Variables for the Open Always Ramp	24
Figure 1-14: Feedback Control Block Structure	26
Figure 1-15: Feedback Control Example	28
Figure 1-16: Plot of $e(t)$	30

Chapter 2 Distributed Ramp Model

Figure 2-1: Highway Section to Illustrate Conservation Equation	35
Figure 2-2: Traffic Continuum Model	37
Figure 2-3: Traffic Flow vs. Density	39
Figure 2-4: Traffic Speed vs. Density	40
Figure 2-5: Traffic Flow vs. Speed	41
Figure 2-6: Car-Following Model	44
Figure 2-7: Initial Traffic Density	56
Figure 2-8: Traffic Density vs. Time	57
Figure 2-9: Traffic Density Characteristics	57
Figure 2-10: Initial Traffic Density	58
Figure 2-11: Traffic Density vs. Time	59
Figure 2-12: Traffic Density Characteristics	59
Figure 2-13: Traffic Shock Wave	60
Figure 2-14: Shock Wave Analysis on Flow Density Curves	61
Figure 2-15: Shock Wave Propagation	62
Figure 2-16: Shock Path	62

Chapter 3 Distributed Modeling and Problem Formulation

Figure 3-1: Segment of Highway Model	72
Figure 3-2: Isolated Ramp Model	72

Figure 3-3: Greenshield Traffic Flow Density Relationship	76
Figure 3-4: Jam Density Condition	78
Figure 3-5: Physically Viable Region K	80
Figure 3-6: Physically Viable Region K and Some Trajectories	81
Figure 3-7: Physically Viable Region K for the Ramp Problem	81
Figure 3-8: Right Face Dynamics	82
Figure 3-9: Infinitesimal Section	82
Figure 3-10: Right Face Viable Dynamics	85
Figure 3-11: Left Face Dynamics	86
Figure 3-12: Top Face Dynamics	88
Figure 3-13: Bottom Face Dynamics	89
Figure 3-14: Top Right Dynamics	89

Chapter 4 Simulation Software for Distributed Model

Figure 4-1: Isolated Ramp Model	94
Figure 4-2: Space Discretization	95
Figure 4-3: File Dependencies	98
Figure 4-4: File opdemixedramp.m	100
Figure 4-5: File opdeu.m	100
Figure 4-6: File opder.m	100
Figure 4-7: File opdef.m	100
Figure 4-8: Matlab Plot 1	101
Figure 4-9: Matlab Plot 2	102
Figure 4-10: Modified Control File	103
Figure 4-11: Plot for Large Queues	103
Figure 4-12: Modified Ramp Inflow File	104
Figure 4-13: Modified Ramp opdemixedramp.m File	105
Figure 4-14: New Plot	105
Figure 4-15: Control File for Negative Queue Length	106
Figure 4-16: Output Showing Negative Queue Length	106
Figure 4-17: Control File for Negative Queue Length	106
Figure 4-18: Output using Projected Dynamics for Negative Queue Length	107
Figure 4-19: Modified Portion of opdemixedreamp.m for Negative Queue Length	108
Figure 4-20: Highway Section	108
Figure 4-21: First Section	110
Figure 4-22: opdemixedramp.m File for Jam Density Corrections	113
Figure 4-23: opder.m File for Jam Density Corrections	113
Figure 4-24: opdef.m File for Jam Density Corrections	113
Figure 4-25: opdeu.m File for Jam Density Corrections	113
Figure 4-26: Plot-1 for Jam Density Corrections	114
Figure 4-27: Plot-2 for Jam Density Corrections	115
Figure 4-28: Traffic Inflow for Impulse Disturbance Case	115

Figure 4-29: Ramp Inflow for Impulse Disturbance Case	116
Figure 4-30: Plots for Impulse Disturbance Case	117
Figure 4-31: Plots for Impulse Disturbance Case with a Traffic Jam	119
Figure 4-32: Part of File opdemixedramp.m with Diffusion	120
Figure 4-33: Traffic Plots with Diffusion	123

Chapter 5 Feedback Control Design Using the Distributed Model

Figure 5-1: Sensors and Feedback Ramp Metering	129
Figure 5-2: File cpdemixedramp.m for Closed Loop Basic Isolated Ramp	138
Figure 5-3: File cpdef.m for Closed-Loop Basic Isolated Ramp	139
Figure 5-4: File cpder.m for Closed-Loop Basic Isolated Ramp	139
Figure 5-5: File cpdeu.m for Closed-Loop Basic Isolated Ramp	139
Figure 5-6: Plot-1 for Closed-Loop Basic Isolated Ramp Simulation	140
Figure 5-7: Plot-2 for Closed-Loop Basic Isolated Ramp Simulation	140
Figure 5-8: File cpdeu.m Where Integral Term in Used	142
Figure 5-9: Modified Part of cpdemixedramp.m Where Integral Term is Used	143
Figure 5-10: Plot-1 after Using Integral Term	143
Figure 5-11: Plot-2 after Using Integral Term	144
Figure 5-12: Plot-1 for Lowered Gain Basic Isolated Ramp Simulation	145
Figure 5-13: Plot-2 for Lowered Gain Basic Isolated Ramp Simulation	145
Figure 5-14: Plot-1 for Two-Section Basic Isolated Ramp Simulation	146
Figure 5-15: Plot-2 for Two-Section Basic Isolated Ramp Simulation	147
Figure 5-16: Plot-1 for Basic Isolated Ramp Simulation with Diffusion	148
Figure 5-17: Plot-2 for Basic Isolated Ramp Simulation with Diffusion	148

Chapter 6 Feedback Control Design Using the Distributed Model with Diffusion

Figure 6-1: File opdemixedramp.m with Diffusion	162
Figure 6-2: draw.m	163
Figure 6-3: Control File for Diffusion (opdeu.m)	163
Figure 6-4: Ramp Inflow File for Diffusion (opder.m)	163
Figure 6-5: Highway Inflow File for Diffusion (opdef.m)	164
Figure 6-6: Plot-1 for Diffusion Control	164
Figure 6-7: Plot-2 for Diffusion Control	165

Chapter 7 Feedback Control Design for the Distributed Model for Mixed Sensitivity

Figure 7-1: Sensors and Feedback Ramp Metering	168
Figure 7-2: File opdemixedramp.m to Run Mixed and Unmixed Ramp	

Control Problems	175
Figure 7-3: File opdef.m to Run Mixed and Unmixed Ramp Control Problems	175
Figure 7-4: File opder.m to Run Mixed and Unmixed Ramp Control Problems	175
Figure 7-5: File opdeu12.m to Run Mixed and Unmixed Ramp Control Problems	176
Figure 7-6: Plot-1 Using Unmixed Ramp Control	177
Figure 7-7: Plot-2 Using Unmixed Ramp Control	178
Figure 7-8: Plot-1 Using Mixed Ramp Control	179
Figure 7-9: Plot-2 Using Mixed Ramp Control	180
Figure 7-10: Plot-1 Using Equal Weights Mixed Ramp Control	181
Figure 7-11: Plot-2 Using Equal Weights Mixed Ramp Control	182

Chapter 8 Feedback Control Design for Coordinated Ramps Using Distributed Modeling

Figure 8-1: Coordinated Ramp Problem	186
Figure 8-2: File opdemixedramp.m for New Isolated Control Law	192
Figure 8-3: File opder.m for New Isolated Control Law	192
Figure 8-4: File opdef.m for New Isolated Control Law	192
Figure 8-5: File opdeu.m for New Isolated Control Law	193
Figure 8-6: Plot-1 for Basic Control Law on Basic Model	194
Figure 8-7: Plot-2 for Basic Control Law on Basic Model	195
Figure 8-8: Plot-1 for Basic Control Law on Diffusion Model	196
Figure 8-9: Plot-2 for Basic Control Law on Diffusion Model	197
Figure 8-10: Plot-1 for Diffusion Control Law on Diffusion Model	198
Figure 8-11: Plot-2 for Diffusion Control Law on Diffusion Model	199
Figure 8-12: Decreasing Traffic Distribution	200
Figure 8-13: Increasing Traffic Distribution	200

Chapter 9 Feedback Control Design Using the ODE Model

Figure 9-1: Ramp System	211
Figure 9-2: Comparison with Wattleworth Model	216
Figure 9-3: File odemixedramp.m	224
Figure 9-4: File odeu.m	224
Figure 9-5: File draw.m	225
Figure 9-6: File oder.m	225
Figure 9-7: File odef.m	225
Figure 9-8: Simulation Results Using Control-1	226
Figure 9-9: Coordinated Ramp Metering in ODE Setting	226
Figure 9-10: File runcoordramp.m	238
Figure 9-11: File u1.m	238
Figure 9-12: File u2.m	239

Figure 9-13: File r1coord.m	239
Figure 9-14: File r2coord.m	239
Figure 9-15: File f1coord.m	240
Figure 9-16: File rampdynamics.m	240
Figure 9-17: Simulation Results for Unmixed Decoupled Case	241
Figure 9-18: Simulation Results for Mixed Decoupled Case	242
Figure 9-19: Simulation Results for Mixed Coupled Case	243

Chapter 10 Feedback Control Design Using the Finite Difference Model

Figure 10-1: File druncooordramp.m	263
Figure 10-2: File du1.m	264
Figure 10-3: File u2.m	265
Figure 10-4: File dr1coord.m	265
Figure 10-5: File dr2coord.m	265
Figure 10-6: File df1coord.m	265
Figure 10-7: Simulation Results for Unmixed Decoupled Case	266
Figure 10-8: Simulation Results for Mixed Decoupled Case	267
Figure 10-9: Simulation Results for Mixed Coupled Case	268

Chapter 11 Nonlinear H_∞ Feedback Control Design Using the ODE Model

Figure 11-1: Segment of Highway Model	272
Figure 11-2: Highway Divided into Sections	273
Figure 11-3: Block Diagram for Nonlinear H_∞ Formulation	276
Figure 11-4: Traffic Flow for an Isolated Ramp Metering	279
Figure 11-5: File runramp.m	289
Figure 11-6: Simulation Results Using Control-1	290

Chapter 12 Paramics

Figure 12-1: The FSP Study Section (Reference)	299
Figure 12-2: Paramics Model of the Study Network	300
Figure 12-3: ParamicsConfiguration File for All the Control Strategy Implementation	302
Figure 12-4: ALINEA Plans File	305
Figure 12-5: ALINEA Phases File	308
Figure 12-6: New Control Phases File	310
Figure 12-7: Mixed Control Phases File	316
Figure 12-8: Average Time-dependent Speed for all 5 Lanes in Downstream Section	320
Figure 12-9: Average Time-dependent Density for all 5 Lanes in Downstream Section	321
Figure 12-10: Time-dependent Ramp Queue Plot	325

List of Tables

Chapter 1 Introduction	1
Table 1-1: Ramp Metering Use in USA	10
Table 1-2: Traffic-Responsive Ramp Metering Use in USA	11
Table 1-3: Pretimed Ramp Metering Use in USA	12
 Chapter 12 Paramics	 293
Table 12-1: Types and Percentages of the Vehicles used in the Simulation	301
Table 12-2: Mean Congestion on the Downstream Freeway Links	317
Table 12-3: Mean and Maximum Downstream Occupancy on the Freeway	318
Table 12-4: Average Upstream Speed, Density, and Flow Values on the Freeway	319
Table 12-5: Average Downstream Speed, Density, and Flow Values on the Freeway	319
Table 12-6: Average Upstream and Downstream Link Delays on the Freeway	321
Table 12-7: Average Freeway, Ramp and Total System Link Delay (vehicle-hours)	322
Table 12-8: Average Downstream Speed, Density and Flow Values on the Ramp	323
Table 12-9: Average and Maximum Length of Ramp Queue	324

Contents

Chapter 1 Introduction	1
1. Introduction	1
2. Intelligent Approach to Congestion Problem: Ramp Metering	3
2.1 Local Ramp Metering Control Strategies	5
2.1.1 Demand Capacity Control	5
2.1.2 Upstream Occupancy Control	5
2.1.3 Gap Acceptance Control	6
2.1.4 Closed-Loop Local Control Strategies	6
2.2 System-wide Ramp Control Strategies	8
3. Ramp Metering Implementations in the USA	10
4. Benefits of Ramp Metering	12
5. Problem Description	14
6. Preliminary Considerations for Using Feedback Control for Ramp Metering	16
7. Effect of Ramp Metering	17
8. Feedback Control	25
8.1 Control Design Steps	26
8.2 Ordinary Differential Equations	27
8.3 Difference Equations	28
8.4 Feedback Control Example	28
9. Summary	30
10. Questions	30
11. Problems	31
12. References	32
 Chapter 2 Distributed Ramp Model	 35
1. Conservation Equation	34
2. Density Flow Relationship	38
2.1 Greenshield's Model	38
2.2 Greenberg's Model	41
2.3 Underwood's Model	41
2.4 Northwestern University Model	42
2.5 Drew Model	42
2.6 Pipes Munjal Model	42
2.7 Multi Regime Model	42
2.8 Diffusion Models	43
3. Microscopic Traffic Characteristics	44
4. Classification of PDEs	48
5. Existence of Solution	49
5.1 Traffic Problem	51
6. Method of Characteristics to Solve First order PDEs	54
7. Traffic Shock Wave Propagation	60

8. Traffic Measurements	63
8.1 Time Mean Speed	63
8.2 Space Mean Speed	64
8.3 Time Headway	64
8.4 Space Headway	64
8.5 Flow Measurements	65
8.6 Traffic Density Measurements	65
8.7 Occupancy	65
8.8 Distributed Measurements	66
8.9 Moving Observer Method	66
9. Summary	66
10. Exercises	66
11. References	69
 Chapter 3 Distributed Modeling and Problem Formulation	 71
1. System	71
2. Control Objective	75
3. Limitations of the Model	78
3.1 Jam Density	78
3.2 Maximum Queue Length	79
3.3 Negative Density	79
3.4 Negative Queue Length	79
3.5 Traffic Jam Time	79
3.6 Projection Dynamics	80
3.6.1 Right Face	81
3.6.2 Left Face	85
3.6.3 Top face	87
3.6.4 Bottom Face	88
4. Summary	90
5. Questions	90
6. Problems	90
7. References	91
 Chapter 4 Simulation Software for Distributed Model	 93
1. Basic Model	93
2. Numerical Algorithm	95
3. Matlab Software	98
4. Simulations	101
5. Limitations	102
5.1 Large Queue Length	103
5.2 Negative Queue Length	105
5.3 Negative Traffic Density on Mainline	108
5.4 Higher than Jam Density	108
5.5 Traffic Diffusion	115

6. Summary	124
7. Questions	124
8. Problems	124
9. References	124

Chapter 5 Feedback Control Design Using the Distributed Model	127
1. Model Summary	127
2. Control Objective	128
3. Feedback Control Law for the Basic Model	130
3.1 Implementation of the Basic Feedback Control Law	129
3.2 Limitations on Achievable Performance	135
3.3 Software Simulation for the Closed-Loop System	135
3.4 Integral Term in Control	141
3.5 Parametric Effect on Simulations	144
4. Summary	149
5. Questions	149
6. Problems	149
7. References	150

Chapter 6 Feedback Control Design Using the Distributed Model with Diffusion	151
1. Model Summary of the Diffusion Model	151
2. Control Objective	152
3. Feedback Control Law for the Diffusion Model	152
3.1 Implementation of the Basic Feedback Control Law	153
3.2 Control Discretization	155
3.3 Integral Term	158
3.4 Software Simulation for the Closed-Loop System	159
4. Summary	165
5. Questions	165
6. Problems	166
7. References	166

Chapter 7 Feedback Control Design for the Distributed Model for Mixed Sensitivity	167
1. Summary of the Basic Model	167
2. Control Objective	168
3. Feedback Control Design	169
4. Software	172
5. Simulation Results	176

6. Summary	182
7. Questions	182
8. Problems	183
9. References	183

Chapter 8 Feedback Control Design for Coordinated Ramps Using Distributed Modeling	185
1. Coordinated Ramp Metering	185
2. Motivation Example for Isolated Ramp Problem	186
2.1 Control Objective	186
2.2 Feedback Control Design	188
2.3 Simulation Program	189
2.4 Simulation Results	193
2.4.1 Basic Control Law on Basic Model	194
2.4.2 Basic Control Law on Diffusion Model	196
2.4.3 Diffusion Control Law on Diffusion Model	198
2.5 Analysis of the Control Objective and the Performance of the Controller	199
3. Coordinated Ramp Control	201
3.1 Control Objective	201
3.2 Feedback Control Design	201
4. Coordinated Mixed Sensitivity Feedback Ramp Control	205
4.1 Control Objective	205
4.2 Feedback Control Design	206
5. Summary	208
6. Questions	209
7. Problems	209
8. References	210

Chapter 9 Feedback Control Design Using the ODE Model	211
1. Mathematical Model	211
2. Control Objective	213
3. Control Design	214
3.1 Control Objective 1	214
3.1.1 Comparison with Wattleworth Model	215
3.1.2 Comparison with ALINEA Model	216
3.2 Control Objective 4	217
3.3 Control Objective 5	218
3.3.1 Region 1	219
3.3.2 Region 2	220

3.3.3 Overall Control	221
4. Software and Simulation Results	221
5. Coordinated Ramp Control in ODE Setting	226
5.1 Dynamics	227
5.2 Control Design	227
5.2.1 Region 1	228
5.2.2 Region 2	229
5.2.3 Region 3	230
5.2.4 Region 4	232
5.2.5 Overall Control	233
5.2.5.1 Decoupled Control	233
5.2.5.2 Coupled Control Laws	235
5.3 Simulation Files	235
5.4 Simulation Results	240
6. Summary	243
7. Questions	243
8. Problems	244
9. References	244

Chapter 10 Feedback Control Design Using the Finite Difference Model

	245
1. Finite Difference Model	245
2. Control Objective	246
3. Control Design	247
3.1 Control Objective 1	247
3.2 Control Objective 3	248
3.2.1 Region 1	248
3.2.2 Region 2	249
3.2.3 Overall Control	250
4. Coordinated Ramp Control in ODE Setting	251
4.1 Dynamics	251
4.2 Control Design	252
4.2.1 Region 1	252
4.2.2 Region 2	254
4.2.3 Region 3	255
4.2.4 Region 4	257
4.2.5 Overall Control	259
4.2.5.1 Decoupled Control	259
4.2.5.2 Coupled Control Laws	260
4.3 Simulation Files	261
4.4 Simulation Results	266
5. Summary	268
6. Questions	268
7. Problems	269

8. References	269
Chapter 11 Nonlinear H_∞ Feedback Control Design Using the ODE Model	271
1. Introduction	271
2. System Modeling	271
2.1 Discretized System Dynamics	272
3. Background (Nonlinear H_∞ Control)	275
4. Ramp Control Design	278
4.1 Continuous-Time Case	278
4.1.1 Nonlinear H_∞ Solution for Two Cost Functions	281
4.1.1.1 Derivation of the Optimal Control for J_a	282
4.1.1.2 Derivation of the Optimal Control for J_b	284
4.1.2 Discretization of the Resulting System	286
4.2 Discrete-Time Case	287
5. Software and Simulation Results	287
6. Summary	290
7. Questions	290
8. Problems	291
