

Part III

Approaches for Participation, Governance and Financing of Off-grid Electrification

This part focuses on the business and delivery of off-grid electrification and elaborates on three aspects, namely participatory approaches for electrification and off-grid electricity provision, governance and regulatory issues, and financing of electrification. [Chapter 8](#) presents a review of participatory approaches with a special emphasis on South Asia. [Chapter 9](#) presents the challenge of financing electrification and off-grid access globally while [Chapter 10](#) presents the governance issues related to electrification. [Chapter 11](#) elaborates on the regulatory challenges facing off-grid electrification.
