PREFACE

This book consists essentially of a collection of papers that were contributed to a national meeting held in Houston, Texas, in 1983. The papers contained herein cover a wide range of electrochemical engineering topics and should serve as useful starting points in the design of electrochemical cells.

The editor would like to thank the authors for their contributions and patience and the typists, Mrs. Susan Firth and Mrs. Jeri Saulsbury, for their efforts. Also, the editor would like to thank Mr. T. Nguyen and Ms. M. A. Nictrolson for their help in preparing the index of this book.
