We dedicate this book to all my trainees from whom we have received more than they ever have expected to give us. Among them Jwang Ling M.D., Eugene Agnone M.D., Francisco Martinez M.D., Gloria Calaf Ph.D., Daniel R. Ciocca M.D., Lee K. Tay Ph.D., Stephen P. Ethier Ph.D., Gustavo A. Moviglia M.D., Satori Higa M.D., Megan Mills Ph.D., Gustavo Rubio Coronel M.D., Anna Sapino M.D., Fulvio Basolo M.D., Gabriella Fontanini M.D., Josiah Ochieng Ph.D., Muneesh Tewari M.D., Ph.D., Pei-Li Zhang Ph.D., Maria Elena Alvarado M.D., Anthony Magliocco M.D., Teh-Yuan Ho Ph.D., Nandita Sohi Ph.D., Chai Yu-Li M.D., Saad El-Gendy Ph.D., Judith Gordon M.D., Eric G. Thomas D.O., Roupon Yagsession M.D., Kunle Adesina M.D., Ph.D., Ruth Padmore M.D., Ph.D., Yun-Fu Hu Ph.D., Ana Maria Salicione Ph.D., Betsy Bove Ph.D., Yajue Huang Ph.D., Ismael Dale Cotrin Silva M.D., Ph.D., Abdel-Rahman N. Zekri M.Sc., Ph.D., Xiaoshang Jiang Ph.D., Raquel Angela Silva Soares Lino Ph.D., Hasan M. Lareef M.D., Gabriela Balogh Ph.D., Fathima Sheriff M.D., Sandra Fernandez Ph.D., Johana Vanegas M.D., Raquel Moral Ph.D., Daniel Mailo Ph.D., Ricardo Lopez Ph.D., Julia Pereira Ph.D., Hilal I. Kocdor M.D., Ph.D., Mehmet A. Kocdor M.D., Sylvana Carrea de Noronha Ph.D., Samuel Ribeiro de Noronha Ph.Dc., and Yanrong Su Ph.D.

Acknowledgment

Our special acknowledgment and thanks to *Ms. Patricia A. Russo* for her insightful editorial and stylish suggestions, for her critiques and delightful moments discussing the manuscript and ideas, to *Ms. Rose Sonlin* for verifying the accuracy of the references and the search for not easy to find articles and to *Pathology Consultation Services* from Rydal, PA, that have financed the writing and editing of this book.

Contents

1	The Epidemiology of Breast Cancer and the Basis for Prevention	1
1.1	Introduction.....	1
1.2	Rodent Models of Mammary Carcinogenesis.....	5
1.3	Windows of Susceptibility to Carcinogenesis.....	5
1.4	Prevention of Mammary Cancer by Pregnancy	7
1.5	Prevention of Mammary Cancer by Hormones	8
1.6	Effect of Pregnancy on Cancer Progression.....	9
1.7	Effect of Hormones on Tumor Progression	10
1.8	Hormones as Carcinogens.....	13
1.9	When Does a Full-Term Pregnancy Reduce Breast Cancer Risk?	13
1.10	The Human Breast in Pregnancy and Disease	15
1.11	Breast Development Under the Endocrinological Influence of Pregnancy.....	17
1.12	Basis of the Protective Effect of Early Pregnancy	18
1.13	Influence of Fertility on Breast Cancer Risk.....	20
1.13.1	Ovarian Aging and Fertility	21
1.13.2	Aging of the Hypothalamic–Pituitary–Ovarian Axis and Fertility	21
1.14	Concluding Remarks.....	22
	References.....	22
2	An In Vivo Model of Breast Cancer Prevention.....	29
2.1	Introduction.....	29
2.2	The Differential Effect of Urinary hCG vs. Recombinant hCG.....	30
2.2.1	Human Chorionic Gonadotropin.....	30
2.2.2	Experimental Protocol	31
2.2.3	Effect of hCG in Mammary Cancer Prevention.....	36
2.2.4	Effect of hCG on Mammary Cancer Therapy.....	39

2.2.5	Special Studies	46
2.2.6	Considerations	50
2.3	Time-Dependent Preventive Effects of Human Chorionic Gonadotropin on Rat Mammary Carcinogenesis.....	52
2.3.1	hCG Effect on Body Weight and Gland Morphology.....	53
2.3.2	hCG Effect on Tumorigenic Response to DMBA	55
2.3.3	Considerations on the Dose and Timing of hCG Treatment	59
2.4	The Study of Side Effects of hCG in Reproduction	64
2.4.1	Experimental Evidence	64
2.4.2	Side Effect of hCG.....	67
2.5	Concluding Remarks.....	67
	References.....	68
3	Comparative Effects of the Preventive Effect of Pregnancy, Steroidal Hormones, and hCG in the Transcriptomic Profile of the Rat Mammary Gland.....	73
3.1	Introduction.....	73
3.2	Experimental Protocol	74
3.3	Morphological Changes Induced by the Hormonal Treatment.....	75
3.4	Transcriptomic Profile.....	76
3.4.1	Functional Significance of the Common Genes Induced by the Three Preventive Modalities	88
3.4.2	Functional Significance of the Biological Processes Overrepresented Among the Upregulated Genes Induced by the Three Preventive Modalities	97
3.4.3	Transcriptome Profile Induced by hCG	104
3.4.4	Transcriptome Profile Induced by Pregnancy	114
3.4.5	Transcriptome Profile Induced by Estrogen and Progesterone.....	118
3.5	Enrichment of the Genomic Signature of Prevention	123
3.6	Concluding Remarks.....	178
	References.....	178
4	The Use of In Vitro Three-Dimensional System for Studying Breast Cancer and Preventing Agents	191
4.1	Introduction.....	191
4.2	The Three-dimensional Growth of Human Breast Epithelial Cells.....	192
4.3	Importance of an In Vitro Model	194
4.3.1	Developing a Carcinogenicity Index for Testing the Carcinogenicity of Environmental Agents.....	196
4.3.2	Construction of an Index of Carcinogenesis.....	197
4.3.3	Design	198
4.4	An In Vitro In Vivo Model for Studying the Basal Breast Cancer	199

4.5	Stem Cell and the Asymmetric Cell Division.....	206
4.5.1	Genomic Alterations in the trMCF Cells Indicate That the Asymmetric Cell Division Is the Target Mechanism of Neoplastic Transformation.....	207
4.5.2	Cell Partitioning in Asymmetric Cell Division.....	208
4.5.3	Mitotic Apparatus	213
4.5.4	Cell Polarity and Asymmetric Cell Division	214
4.5.5	Cell Positioning and Asymmetric Cell Division.....	215
4.6	The Molecular Pathway of Epithelial Mesenchymal Transition.....	216
4.7	The Metastatic Phenotype	217
4.8	Human Chorionic Gonadotropin Prevents the Transformed Phenotypes Induced by 17 β -Estradiol in Human Breast Epithelial Cells.....	223
4.8.1	Human Chorionic Gonadotropin Prevented the Formation of Solid Masses Induced by 17 β -Estradiol (E ₂)	226
4.8.2	Human Chorionic Gonadotropin Induced Longer Tubules with Tertiary Branching	226
4.8.3	The 17 β -Estradiol (E ₂) Treatment Increased Cell Proliferation.....	228
4.9	Concluding and Summary Remarks	231
	References.....	232
5	Methodological Approach for Studying the Human Breast.....	243
5.1	Introduction.....	243
5.2	Recruitment and Consent Process.....	243
5.3	Specimen Collection Procedures	261
5.4	Laser Capture Microdissection	262
5.5	RNA Preservation for Affymetrix Studies	263
5.6	RNA Extraction for mRNA Sequencing	265
5.6.1	Total RNA Isolation	265
5.7	PicoPure® DNA Extraction Kit	265
5.8	RNA Processing and Quality Control for cDNA Microarray Analysis.....	266
5.9	Blood Collection for Hormone Determination	267
5.10	Blood Collection for Genomic Analysis	267
	References.....	267
6	The Transcriptome of Breast Cancer Prevention	269
6.1	Introduction.....	269
6.2	Methodologic Approach	270
6.3	The Genomic Analysis.....	285
6.4	Functional Significance of the Signature of Pregnancy	300
6.4.1	The Spliceosome Machinery.....	301
6.4.2	Non-coding RNAs.....	304
6.4.3	Downstream to the Estrogen Receptor Pathway	304

6.4.4	Cell Communication	305
6.4.5	Insulin-Like Growth Factor 1	305
6.5	Concluding Remarks	305
	References	306
7	Chromatin Remodeling and Pregnancy-Induced Differentiation	309
7.1	Introduction	309
7.2	The Methodological Approach	310
7.3	Architecture of Postmenopausal Women's Breast	310
7.4	Transcriptomic Differences	316
7.5	Functional Significance	323
7.6	Evidence of a Shifting of the Stem Cell Population in the Human Breast	324
7.7	Role of Noncoding RNA in Chromatin Remodeling	324
7.8	Inducing Chromatin Remodeling by HCG	326
7.9	Relevance of Chromatin Remodeling in Breast Cancer Prevention	331
	References	332
8	The Role of Spliceosome in the Human Breast	337
8.1	Introduction	337
8.2	The Splicing Mechanism	337
8.3	Spliceosome Assembly	342
8.4	The Role of Spliceosome in the Human Breast	343
8.4.1	Internal Methylation of mRNA and the Methyltransferase Like 3	345
8.4.2	Formation of Pre-mRNP or Heterogeneous Nuclear Ribonucleoproteins	346
8.4.3	Formation of the Spliceosome E Complex	356
8.5	mRNA 3' End Processing	365
8.6	Other Accessory Proteins Related to the Splicing Mechanism	367
8.7	Other Transcripts That Could Play a Role in RNA Splicing in the Human Breast	369
8.8	Functional Role of the Spliceosomes in Breast Cancer Prevention	378
	References	379
9	Noncoding RNAs and Breast Cancer Prevention	391
9.1	Introduction	391
9.2	Nuclear Organelles and ncRNAs	392
9.3	Defining the RNAs	394
9.4	Noncoding RNAs	395
9.4.1	Noncoding RNA Classes	395
9.4.2	Long Noncoding RNAs	395
9.5	Noncoding RNA in the Parous Breast and its Implications in Cancer Prevention	397

9.6 The Functional Role of XIST	398
9.7 The Functional Role of NEAT1	400
9.8 The Functional Role of NEAT2	402
References	403
10 The Role of Stem Cell in Breast Cancer Prevention	409
10.1 Evidence for a Stem Cell in the Mammary Gland	409
10.2 Cell Markers for Identifying the Stem Cell in the Mammary Gland	410
10.3 Estrogen Receptor as a Marker of Stem Cells in the Mammary Gland	412
10.3.1 Estrogen Receptor Beta and the Breast Stem Cells	413
10.3.2 Influence of the Stroma in the Genomic Profile of the MCF-10F Cell that Behaves as a Stem Cell In Vitro	416
10.3.3 The MCF-10F Cell as the Stem Cell in Estrogen-Induced Carcinogenesis	418
10.4 The Evidence for the Shifting of Stem Cell 1 to Stem Cell 2 in the Mammary Gland Post-Pregnancy	419
10.5 Isolation of the Stem Cells from the Rat Mammary Gland	422
10.5.1 Isolation of Stem Cells	422
10.5.2 Mammosphere Culture Conditions	422
10.5.3 Effect of hCG the Mimicking Hormone of Pregnancy in Mammospheres Formation	425
10.5.4 Characterization of Cells from Mammospheres	425
10.6 The Importance of the Mammary Gland Stem Cell and Pregnancy in the Prevention of Breast Cancer	431
References	432
Index	441
