

## **SECTION I**

### **ADVANCED AUTHORIZING TOOLS**

The goal of this section is to point out how advances in authoring can reduce the cost of creating training materials whether they be for simulators, embedded training, CBI, or a combination of these delivered with the latest in hardware technology.

- Chapter 1:    Development of an Authoring System Data Base  
                  R. Seidel and O.C. Park, *Army Research Institute (US)*
  
- Chapter 2:    An Authoring System for Intelligent Training  
                  D. Gregory, *Dent Lee White plc*  
                  P. French, *Kingston Business School (UK)*
  
- Chapter 3:    An Authoring System for Training Simulators  
                  Hilbert Kuiper and Tom Amgagtsheer  
                  *TNO Physics and Electronics Laboratory (NE)*
