To my family for so much
unwavering encouragement and unconditional support

Contents

1	Introduction	1
2	Theoretical Framework	5
2.1	Generalised Firm Program	7
2.2	Previous Approaches	8
2.3	Flexible Cost Model (FCM)	11
2.3.1	Primal Characterisation	11
2.3.2	Dual Characterisation: Globally Regular Func- tional Forms	13
2.3.3	Dual Characterisation: General Case	15
2.4	Comparative Statics	20
3	Empirical Modelling	23
3.1	Empirical Context and Issues	25
3.2	Output and Input Measurement	27
3.3	Dataset	29
3.4	Empirical Specification	37
3.4.1	Parametric Specification	37
3.4.2	Stochastic Specification and Estimation Method- ology	37
3.4.3	Dual Characterisation	40

4	Empirical Results	45
4.1	Econometric Results	47
4.1.1	Single Equation Estimation: Core Results . . .	47
4.1.2	Single Equation Estimation: Restrictions and Extensions	50
4.1.3	System Estimation	52
4.1.4	Evidence of Output Measurement Error	54
4.2	Scale Effects	54
4.2.1	Primal Measurement	56
4.2.2	Dual Measurement	58
4.3	Capacity Utilisation Effects	63
4.3.1	Allocative Efficiency Indices	63
4.3.2	Capacity Utilisation Rates	68
4.3.3	Economic Consequences	78
4.4	Impact of Labour Market Rigidities	83
4.5	Sources of International Cost Position Differences . . .	84
5	Conclusion	89
6	Bibliography	93
7	Appendix: Dataset Statistics	101
	Index	117

Acknowledgments

I wish to express my particular gratitude to: Kenneth Arrow, for his ever kind and patient guidance; Richard Smethurst and John Vickers, who generously opened Oxford's doors to me; Colin Mayer, for his essential counsel and insightful observations; Steve Bond and Bronwyn Hall, to whom I owe a considerable intellectual debt; and Allard Winterink, senior editor at Kluwer Academic Publishers, for his remarkable efficiency.

Naturally, the responsibility for any errors or inaccuracies rests solely with me.

LIST OF FIGURES

3.1. Evolution of price of labour	33
3.2. Evolution of price of technology	34
3.3. Evolution of mean labour/technology ratio	35
3.4. Cost/income ratio vs. number of employees.....	36
4.1. Evolution of mean production function residual.....	55
4.2. Scale effects metric vs. number of employees.....	57
4.3. Cost/income ratio vs. logarithm of output value: first derivative.	59
4.4. Cost/income ratio vs. logarithm of output value: second derivative	60
4.5. Cost/income ratio vs. number of employees: ceteris paribus relation	62
4.6. Evolution of mean value of first-order condition residual.....	64
4.7. Distribution of first-order condition residual	67
4.8. Production function residual vs. first-order condition residual.....	69
4.9. Production function residual vs. first-order condition residual: first sub-sample	70
4.10. Production function residual vs. first-order condition residual: second sub-sample	71
4.11. Output approximation error: first-order Taylor series	73
4.12. Output approximation error: second-order Taylor series ..	74
4.13. Output approximation error: third-order Taylor series ...	75
4.14. Labour capacity utilisation rate vs. first-order condition residual.....	79
4.15. Cost/income ratio vs. first-order condition residual: first derivative	80
4.16. Cost surcharge vs. first-order condition residual.....	81

LIST OF TABLES

3.1. Mean value of cost/income ratio	37
4.1. Production function estimation: results	48
4.2. Production function estimation: notes	49
4.3. Cobb-Douglas estimation	51
4.4. System estimation	53
4.5. Mean value of first-order condition residual: detail	66
4.6. Mean output approximation error	76
4.7. Mean value of labour capacity utilisation rate	77
4.8. Mean value of technology capacity utilisation rate	78
4.9. Mean value of cost surcharge	82
4.10. Impact of labour market rigidities	83
4.11. Sources of cost differences: first sub-sample	85
4.12. Sources of cost differences: second sub-sample	86
7.1. Number of observations by sub-sample	103
7.2. Observations meeting production function regularity conditions	104
7.3. Observations meeting all regularity conditions	105
7.4. Selected firm-level statistics: France	106
7.5. Selected firm-level statistics: Germany	108
7.6. Selected firm-level statistics: Japan	109
7.7. Selected firm-level statistics: UK	110
7.8. Selected firm-level statistics: US	112
