ACKNOWLEDGMENT

This book has benefited from the examples, discussion and feedback provided by scholars attending the annual Conferences on Computation in Economics and Finance, sponsored by the Society for Computational Economics, Geneva, 1996, Palo Alto, 1997, and Cambridge, 1998. Particular thanks are due to the participants in the interest group on Agent-Based Computational Economics. The assistance, encouragement, suggestions, and collaboration of my wife, Katherine W. McCain, have also been invaluable.
