Evolutionary Biology

VOLUME 11

Evolutionary Biology

VOLUME 11

Edited by

MAX K. HECHT

*Queens College of the
City University of New York
Flushing, New York*

WILLIAM C. STEERE

*New York Botanical Garden
Bronx, New York*

and

BRUCE WALLACE

*Cornell University
Ithaca, New York*

SPRINGER SCIENCE+BUSINESS MEDIA, LLC

The Library of Congress cataloged the first volume of this title as follows:

Evolutionary biology. v. 1- 1967- New York, Appleton-Century-Crofts. v. illus. 24 cm. annual.		
Editors: 1967- T. Dobzhansky and others.		
1. Evolution – Period. 2. Biology – Period. I. Dobzhansky, Theodosius Grigorievich, 1900-		
QH366.A1E9	575'.005	67-11961

Library of Congress Catalog Card Number 67-11961

ISBN 978-1-4615-6958-9 ISBN 978-1-4615-6956-5 (eBook)

DOI 10.1007/978-1-4615-6956-5

Preface

The first volume of *Evolutionary Biology* was published eleven years ago. Since that time eleven volumes and one supplement have appeared. As stated in earlier prefaces, we are continuing the focus of this series on critical reviews, commentaries, original papers, and controversies in evolutionary biology. It is our aim to publish papers primarily of greater length than normally published by society journals and quarterlies. We therefore invite colleagues to submit chapters that fall within the focus and standards of *Evolutionary Biology*.

The Editors

Contents

1. Precambrian Evolution of Photosynthetic and Respiratory Organisms

John M. Olson

Outline	1
Introduction	2
Basic Assumptions	6
Photosynthetic Energy Conversion and Electron Transport	6
Oxygen-Evolving Organisms	6
Photosynthetic Bacteria	9
Photoassimilation and Cyclic Electron Flow	13
Acetate Assimilation	15
The Common Ancestor	17
Chlorophyll	18
Quinone	19
Linear Electron Transport	22
Light-Harvesting Systems	22
Evolution of Photosynthetic Bacteria	22
Purple and Green Bacteria	23
Evolution of Blue-Green Algae	24
Weak Electron Donors for the Protoalgae	25
Evolution of Respiration	29
General Remarks	31
References	32

2. Molecular Structure and Protein Variation within and among Populations

Richard K. Koehn and Walter F. Eanes

Introduction	39
Molecular Properties and Structural Variation	45
Amino Acid Composition and Quaternary Structure	46
Protomer Size and Quaternary Structure	47

Enzyme Polymorphism and Quaternary Structure	50
Enzyme Polymorphism and Subunit Size	53
Data and Analyses	54
<i>Drosophila</i> Enzyme Polymorphism	60
Human Enzyme Polymorphism	63
Enzyme Polymorphism: Structure and Size	67
Models of Size- and Structure-Dependent Polymorphism	68
Further Implications	72
Molecular Structure and Differentiation	73
Patterns of Among-Population Differentiation	76
Genetic Differences among Species	80
References	88

3. Multilocus Systems in Evolution

Philip Hedrick, Subodh Jain, and Larry Holden

Gametic Disequilibrium	104
Other Measures of Gametic Disequilibrium	107
Factors Other than Linkage and Selection Affecting Gametic Disequilibrium	108
Mating or Reproductive Systems	108
Finite Population Size	111
Migration	112
Mutation and Hitchhiking	113
Selection and Gametic Disequilibrium	115
Fitness Epistasis	115
Directional Selection at Two Loci	117
General Two-Locus Polymorphisms	119
Special Cases of Two-Locus Polymorphisms	122
Multiple Loci	126
Estimation of Gametic Disequilibrium	129
Two Codominant Loci	130
Two Dominant Loci	132
Direct Identification of Gametes	133
Extensions to Multiple Loci and Multiple Alleles	133
Sample Size	135
Evidence of Gametic Disequilibrium (and Gene Interaction)	136
Supergenes	137
Complex Loci	142
Association between Inversions	145
Allozymes and Inversions in <i>Drosophila</i>	146
Gametic Disequilibrium for Allozymes and/or Mutants in <i>Drosophila</i>	147

Gametic Disequilibrium in Nonrandom Mating Species.....	151
Genetic Disequilibrium in Other Organisms.....	156
Gene Interactions.....	157
Phenotypic, Karyotypic, and Other Evidence.....	158
Coadaptation.....	159
Epistasis and Polygenic Variation.....	162
Karyotype Evolution in Plants.....	163
Modifier Loci.....	165
Linked-Gene Effect.....	167
Concluding Remarks.....	169
References.....	173

4. The Origin of Isolating Mechanisms in Flowering Plants

Donald A. Levin

Introduction.....	185
Ecological Isolation.....	187
Temporal Isolation.....	202
Ethological Isolation.....	211
Flower Color and Pollinator Color Perception.....	212
Flower Odorants and Animal Olfaction.....	215
Nectar Chemistry and Pollinator Nutrition.....	218
Mechanical Isolation.....	224
Isolation by Reproductive Mode.....	231
Cross-Incompatibility.....	236
Hybrid Inviability and Weakness.....	250
Hybrid Floral Isolation.....	256
Hybrid Sterility.....	257
Advanced Generation Breakdown.....	270
The Juxtaposition and Concurrence of Isolating Barriers.....	274
The Origin of Isolating Mechanisms.....	275
Character Displacement.....	278
The Tempo of Barrier Building.....	283
Conclusions.....	288
References.....	289

5. A Predator's View of Animal Color Patterns

John A. Endler

Introduction.....	319
I. The Determinants of Color Patterns.....	320

Background Matching	321
Predation Intensity	331
Predator Visual Acuity	333
Predator Color Vision	335
Prey-to-Background Distance	336
Predator Flicker Fusion	337
Sexual Selection vs. Predation	338
II. Color Patterns in Wild Guppy Populations	341
Color Patterns as a Function of Predator Risk	346
The Effect of Color Vision	352
Pattern Diversity	354
Conclusions	356
References	358

6. Mimicry in Plants

Delbert Wiens

Introduction	365
Definitions and Concepts	366
Classes of Mimicry	367
Excluded Categories	370
A Functional Approach to Mimicry	372
Mimicry and Nutrition	373
Mimicry and Predation	374
Batesian Mimicry	375
Crypsis	379
Reproductive Mimicry	388
Dispersal Mimicry	395
Summary and Conclusions	398
References	399

7. Case Studies in the Evolution of Species Complexes in *Mimulus*

Robert K. Vickery, Jr.

Introduction	405
The Genus <i>Mimulus</i> and Its Sections	406
Case Study I. The <i>Mimulus guttatus</i> Complex	410
Background	410
Crossing Barriers within the <i>M. guttatus</i> Complex	415
Niche Breadth Study	426

Rate of Evolution Study: The Lake Bonneville Time Clock	436
Microevolution Study in <i>Mimulus guttatus</i>	445
Case Study II. The <i>Mimulus glabratus</i> Complex	451
Background	451
Crossing Relationships within the Complex	458
Phylogeny of the <i>Mimulus glabratus</i> Complex	472
Ecoevolutionary Patterns	473
Esterases of the <i>Mimulus glabratus</i> Complex	474
Case Study III. The <i>Mimulus cardinalis</i> Complex	478
Background	478
Floral Pigment Studies	481
Overall Crossing Relationships of the <i>Mimulus cardinalis</i> Complex	485
Evolutionary Divergence of Pollination Systems	490
Comparisons, Discussion, and Conclusions	491
The Colonizing and Fugitive Species Strategy	491
The Cytological Patterns of Evolution	493
Evolutionary Strategies	494
Role of Crossing Barriers	495
Comparison of the Complexes	495
References	497

8. Morphometric Relationships and Rates of Evolution among Paleozoic Vascular Plants

Karl J. Niklas

Introduction	509
The Theory of Branching Strategy and Mechanical Design	511
Branching Patterns of Fossil Plants and Sources of Error	514
Rhyniophytes	520
Trimerophytes	522
Zosterophyllophytes and Lycopods	523
Progymnosperms	524
Rates of Change	525
Information-Valued Rates of Change	532
Discussion	536
Branching Strategies	536
Rates of Evolution	537
Phyletic Gradualism or Quantum Evolution?	539
Summary	541
References	542

9. Community Evolution and Rates of Cladogenesis

A. J. Boucot

Introduction	545
The High Correlation between Substrate and Evolving Taxa through Time	546
Community Constancy through Time	549
The Fossil Record	549
The Recent	561
The Paleontologist's Lament, or "Why I Can't Date Your Collection Very Closely"	565
Total Community Numbers through Time	567
Cladogenesis	568
Diacladogenetic Rate and Biogeographic Barrier Imposition Rate ..	571
Evolutionary and Ecologic Consequences of Biogeographic Barrier Oscillations in Time: The Consequent Evolutionary Rate Changes	572
Allopatric Speciation Constraints	578
Pace of Evolution on the Land and in the Sea	583
Area, Population Size, and Rate of Evolution	586
The Correlation of Area of Occupancy with Population Size ...	586
Population Size and Rates of Evolution	587
Provincialism and Diacladogenesis	589
Rates of Evolution, Area, and Population Size	590
Quantum Evolution	594
Introduction	594
Ecologic Implications	600
Allopatric Speciation and Subsequent Phyletic Descendants ...	602
Index Fossils and Quantum Evolution	608
Additional Ways of Viewing the Question	609
Phyletic Evolution, Sampling, and the Fossil Record	611
Phyletic Evolution and Community Evolution	611
Some Examples of Phyletic Evolution	613
The Difficulties of Testing Phyletic Evolution	615
Completeness and Continuity of the Record	616
Phyletic Evolution and Taxonomic Indecision	618
Differing Significance of Taxonomic Evolution Rates Prepared for Different Taxonomic Levels	621
Possible Genetic Inferences to be Drawn from the Fossil Record ..	624
Community Evolution and Natural Selection	625
Community Formation and Maintenance	630
Conclusions	632
Summary	633

Appendix: Temporal Pattern of Species Diversity among Some
Silurodevonian Brachiopods 636

 Introduction 636

 Methods 636

 Silurian Brachiopod Communities 637

 The *Dicoelosia* Parallel Communities 638

 Temporal Pattern of Diversity in *Dicoelosia* Parallel
 Communities 641

 Discussion 643

 Summary 644

 Data and References for the Description of the *Dicoelosia*
 Parallel Communities 644

References 647
