

INVERTEBRATE LEARNING

Volume 2

Arthropods and Gastropod Mollusks

INVERTEBRATE LEARNING

Volume 2

Arthropods and Gastropod Mollusks

Edited by

W. C. Corning and J. A. Dyal

Department of Psychology
University of Waterloo
Waterloo, Ontario, Canada

and

A. O. D. Willows

Department of Zoology
University of Washington
Seattle, Washington

PLENUM PRESS • NEW YORK-LONDON • 1973

Library of Congress Catalog Card Number 72-90335

ISBN-13: 978-1-4684-3011-0

e-ISBN-13: 978-1-4684-3009-7

DOI: 10.1007/978-1-4684-3009-7

CONTENTS OF VOLUME 2

Contents of Volume 1	ix
Contents of Volume 3	xiii

Chapter 6

The Chelicerates

Robert Lahue

I. Introduction	1
II. General Characteristics	3
A. Habitat	3
B. General Morphology	3
C. Nervous System—General	5
D. Nutrition	7
E. Mating and Reproduction	7
F. Respiration	9
G. Sense Organs	9
III. Learning Studies	11
A. Habituation	11
B. Conditioning	24
C. Acquired Orientations	28
D. Conditioning in <i>Limulus</i>	41
IV. Conclusions	43
References	44

Chapter 7

Learning in Crustacea

Franklin B. Krasne

I. Introduction	49
A. Evolutionary Relationships	49
B. Early Demonstrations of Learning	50
C. Reasons for Studying Crustacean Learning	51

II.	Characteristics of the Group Germane to Learning	52
A.	General Characteristics	52
B.	Ways of Life and Learning	53
III.	Features of the Nervous System Relevant to Learning	60
A.	General Features	60
B.	The Brain	61
C.	Neuron Numbers	62
D.	Ways of Economizing on Neurons	63
E.	Advantage of Conservation of Neurons for Studying Learning	64
IV.	Roles of Learning in Life	65
A.	Terrain and Place Learning	65
B.	Social Behavior	69
C.	Feeding Behavior and Food Preferences	70
D.	Sensorimotor Learning	71
E.	Approach and Avoidance Behavior	73
F.	Role of Experience During Development	74
G.	Hidden Learning	76
H.	Phases and Rhythms	83
V.	Formal Learning Experiments	86
A.	Changes in Level of Responsiveness	90
B.	Associative Learning	93
C.	Extent of Attainments	96
D.	Higher Mental Processes	103
VI.	Physiological Analysis of Learning	106
A.	Method 1: Raw Mechanisms and Analogues	107
B.	Method 2: Circuit Analysis	112
C.	Method 3: Holistic Procedures	121
VII.	Concluding Remarks	124
	References	124

Chapter 8

Learning in Insects Except Apoidea

Thomas M. Alloway

I.	Introduction	131
II.	Insect Body Plan	132
III.	Structure of the Insect Nervous System	133
IV.	Insect Evolution and Classification	136
V.	Insects as Subjects for Laboratory Investigations of Behavior and Neurophysiology	143
VI.	Habituation	145
VII.	Classical Conditioning	146

- VIII. Instrumental Conditioning: Tasks and Species 148
 - A. Cockroaches..... 148
 - B. Grain Beetles 152
 - C. Fruit Flies..... 152
 - D. Ants 152
 - E. Wasps 154
- IX. “Shock Avoidance Learning” in Certain Insect Preparations..... 154
- X. Olfactory Conditioning 160
- XI. Processes of Learning and Memory..... 162
 - A. Learning 162
 - B. Memory 164
- XII. Overview and Suggestions for Future Research..... 165
- References 167

Chapter 9

Honey Bees

Patrick H. Wells

- I. Introduction..... 173
- II. Experiments on Behavior of Bees..... 174
- III. Conclusions 183
- References 183

Chapter 10

Learning in Gastropod Mollusks

A. O. D. Willows

- I. Introduction..... 187
- II. Systematic Organization..... 189
 - A. Phylogenetic Relations 189
 - B. Evolution of Nervous Systems and Anatomy..... 192
 - C. Torsion 195
- III. Development 196
 - A. Copulation and Egg Laying 196
 - B. Larval Stages 198
- IV. Gastropod Behavior 200
 - A. Chemical and Tactile Senses 201
 - B. Geotaxis 203
 - C. Vision 203
 - D. Locomotion and Feeding Behavior 206
- V. Learning Studies 216
 - A. Purely Behavioral Studies of Learning 217
 - B. Neurophysiological Studies of Learning 249

C. Correlated Behavioral Learning and Neurophysiological
Studies of Habituation and Sensitization 261

VI. Summary and Conclusions 264

References 266

Appendix (by W. H. Dall) 273

Index 275

CONTENTS OF VOLUME 1

Contents of Volume 2 xiii
Contents of Volume 3 xvii

Chapter 1

Invertebrate Learning and Behavior Taxonomies

J. A. Dyal and W. C. Corning

I. Prologue to "Learning" 1
 A. Inadequacy of Contemporary Theories of Learning 1
 B. Toward a Definition of Learning 3
II. Basic Behavior Modifications 7
 A. Habituation (Nonassociative Response Decrement) 7
 B. Sensitization and Pseudoconditioning (Nonassociative
 Response Increments)..... 9
 C. Punishment..... 13
 D. Classical Conditioning and Associated Phenomena 15
 E. Instrumental Learning 21
 F. Other Major Learning Phenomena 29
 G. Critical Parameters in Behavior Modification 35
III. Perspectives on the Comparative Analysis of Learning 38
 A. Snarks and Boojums 38
 B. Simple System Research..... 39
References 40

Chapter 2

Protozoa

W. C. Corning and R. Von Burg

I. Introduction 49
II. General Characteristics 51
 A. Habitat 51

B. Cell Surface and Associated Organelles	53
C. Cell Inclusions	53
D. Respiration	54
E. Digestion and Nutrition	54
F. Reproduction	55
G. Protective Devices	55
III. Phylogeny and Taxonomy	55
A. Classification of Protozoa	56
B. Protistan Characteristics and Evolution of Protozoans	57
C. Metazoan Origins?	58
IV. Protozoan Specializations Relevant to Behavioral Research	58
A. General Phylogenetic Advances and Limitations	58
B. Reproduction in Paramecia	59
C. Behavior and Ciliary Mechanisms	62
D. Amoeboid Movement	64
V. Learning Studies	64
A. Habituation	64
B. Associative Conditioning	81
VI. Conclusions	117
References	117

Chapter 3

Behavioral Modifications in Coelenterates

N. D. Rushforth

I. Introduction	123
II. Coelenterate Nervous Systems	125
III. Coelenterate Behavioral Physiology	127
A. Conducting Systems	127
B. Pacemaker Activity	129
C. Nonnervous Conduction	132
IV. Behavioral Modifications in Coelenterates	133
A. Simple Behavioral Responses	133
B. Studies of the Physiological Bases of Habituation in <i>Hydra</i> ...	142
C. Complex Behavioral Responses	155
V. Summary and Conclusions	161
References	165

Chapter 4

Platyhelminthes: The Turbellarians

W. C. Corning and S. Kelly

I. Introduction	171
-----------------------	-----

II. General Characteristics	172
A. Cell Characteristics	172
B. Respiration	174
C. Digestion	174
D. Reproduction	175
E. Movement	176
F. Receptors	177
III. Phylogeny and Taxonomy	178
A. Phylum Platyhelminthes	178
B. Evolution	178
IV. Specializations Relevant to Behavioral Research.....	179
A. Summary of General Phylogenetic Advances	179
B. Regeneration	179
C. Cannibalism	180
D. Receptor Properties	181
E. Slime	182
F. Galvanotaxis and Shock Responses	182
V. Learning Studies	183
A. The Planarian Controversy—A Last Look	183
B. Categories of Learning	195
VI. Conclusions	217
References	218

Chapter 5

Behavior Modification in Annelids

J. A. Dyal

I. Introduction	225
II. Taxonomy and Phylogeny	226
A. Class Polychaeta	226
B. Class Oligochaeta	228
C. Class Hirudinea	228
III. Special Annelid Characteristics Relevant to Behavior	229
A. Sensory Capacities	229
B. Nervous System	230
IV. Reflexes, Coordinations, and Orientations	234
V. Habituation	235
A. Class Oligochaeta	235
B. Class Polychaeta (Sedentary)	238
C. Class Polychaeta (Errant)	240
D. Class Hirudinea	244
E. Neurophysiological Factors in Habituation of Reflexive Responses in Annelids	245

F. Biological Significance of Habituation of the Rapid Withdrawal Reflex	247
G. Conclusions Regarding Habituation in Annelida	248
VI. Sensitization	249
A. Class Oligochaeta	250
B. Class Polychaeta (Sedentary)	250
C. Class Polychaeta (Errant)	251
D. Class Hirudinea	254
E. Neurophysiological Basis of Sensitization	254
F. Biological Significance of Sensitization	256
VII. Aversive Inhibitory Conditioning (Punishment)	257
A. Class Oligochaeta	257
B. Class Polychaeta (Errant)	259
C. Neurophysiological Basis of Aversive Inhibitory Conditioning ..	260
D. Biological Significance of Aversive Inhibitory Conditioning ...	260
VIII. Classical Conditioning	260
A. Class Oligochaeta	261
B. Class Polychaeta (Sedentary and Errant)	265
C. Hirudinea	266
D. Neurophysiological Factors in Classical Conditioning	266
E. Biological Significance of Conditioning	267
IX. Instrumental Conditioning	268
A. Class Oligochaeta	268
B. Class Polychaeta (Errant)	278
C. Sedentary Polychaetes and Hirudinea	279
D. Neurophysiological Factors in Instrumental Conditioning	279
E. Biological Significance of Instrumental Conditioning	282
X. Conclusions and Directions for Future Research	283
References	285
Index	291

CONTENTS OF VOLUME 3

Chapter 11

Octopus Learning

G. D. Sanders

Chapter 12

The Echinoderms

A. O. D. Willows, J. A. Dyal, and W. C. Corning

Chapter 13

Synthesis

M. E. Bitterman

Appendix:

Learning in Fungi and Bacteria

P. B. Applewhite
