# CONTENTS

Spectra of the Thermal and Stimulated Scattering of Light in the Wing of the Rayleigh Line G. I. Zaitsev . . . . .	1
Introduction . . . . .	1
Chapter I. Theoretical and Experimental Investigations of the Spectra of the Thermal and Stimulated Scattering of Light . . . . .	4
1. Spectral Composition of the Light Scattered by Anisotropy Fluctuations in Liquids . . . . .	4
2. Width and Profile of Depolarized Lines of the Raman Scattering of Light in Liquids . . . . .	9
3. Investigations of the Stimulated Scattering of Light in the Wing of the Rayleigh Line . . . . .	10
Chapter II. Apparatus and Methods Used in Investigations of the Spectra of the Thermal and Stimulated Scattering of Light . . . . .	15
1. Method Used in Investigations of the Thermal Rayleigh Wing and of the Raman Line Profiles . . . . .	15
2. Apparatus Used in Investigations of the Stimulated Scattering of Light . . . . .	17
Chapter III. Results of Investigations of the Spectrum of Light Scattered by Anisotropy Fluctuations in Liquids . . . . .	19
1. Wing of the Rayleigh Line of Viscous Liquids . . . . .	19
2. Angular Distribution of the Intensity in the Thermal Wing of the Rayleigh Line . . . . .	24
3. Experimental Investigation of the Wings of Depolarized Raman Lines of Liquids . . . . .	27
Chapter IV. Results of an Investigation of the Stimulated Molecular Scattering of Light . . . . .	30
1. Influence of Temperature on the Stimulated Scattering in the Wing of the Rayleigh Line . . . . .	30
2. Four-Photon Interaction in the Stimulated Wing of the Rayleigh Line . . . . .	35
Literature Cited . . . . .	36
Light Scattering Studies of the Propagation of Longitudinal and Transverse Hypersonic Waves in Liquids E. V. Tiganov . . . . .	39

Introduction . . . . .	39
Chapter I. Some Theoretical and Experimental Investigations of the Molecular Scattering of Light in Liquids. . . . .	42
1. Fine Structure of the Rayleigh Scattering of Light in Liquids . . . . .	42
2. Relaxation Theory of the Propagation of Sound in Condensed Media . . . . .	45
3. Phenomenological Theory of the Spectral Composition of Scattered Light and of the Propagation of Transverse Hypersonic Waves in Liquids . . . . .	47
4. Some of the Earlier Investigations of the Fine Structure and the Wing of the Rayleigh Line of Liquids . . . . .	50
Chapter II. Method for Experimental Investigation of the Thermal Scatter- ing of Light in Liquids . . . . .	51
5. Apparatus Used in Investigations of the Fine Structure of the Rayleigh Line . . . . .	51
6. Helium-Neon Gas Laser Used in Investigations of the Molecular Scattering of Light . . . . .	54
7. Method Used in the Analysis of Spectrograms and Estimated Precision of the Optical Measurements . . . . .	55
Chapter III. Dispersion of the Velocity of Sound and the Absorption of Sound in Liquids . . . . .	57
8. Results of Measurements of the Velocity and Absorption of Hyper- sound in Liquids. . . . .	57
9. Discussion of Experimental Results on the Propagation of Hyper- sound in Liquids. . . . .	60
10. Velocity of Hypersound and Absorption of Sound in Water and Ace- tone. Negative Dispersion of the Velocity of Sound. . . . .	64
11. Ratio of the Integrated Intensities of the Fine Structure Components of the Rayleigh Line . . . . .	67
Chapter IV. Transverse Hypersonic Waves in Low-Viscosity Liquids . . . . .	68
12. Narrow Wing of the Rayleigh Line and Fluctuations of the Aniso- tropy Due to Shear Strains . . . . .	68
Literature Cited . . . . .	72
Stimulated Molecular Scattering of Light in Gases	
V. V. Morozov . . . . .	75
Introduction . . . . .	75
Chapter I. Theoretical and Experimental Investigations of the Spectra of Molecular Scattering of Light in Gases . . . . .	78
1. General Aspects of the Theory of Molecular Scattering of Light in Gases (Continuous Medium Approximation) . . . . .	78
2. Fine Structure of the Rayleigh Scattering of Light in Gases ( $\bar{l} \ll \Lambda$ ) . . . . .	80
3. Molecular Scattering of Light in Gases for $\bar{l} \geq \Lambda$ . . . . .	83
4. Stimulated Brillouin Scattering in Gases . . . . .	86
5. Stimulated Temperature (Entropy) Scattering of Light . . . . .	89

Chapter II. Method and Apparatus Used in Experimental Investigations of the Stimulated Molecular Scattering of Light in Gases . . . . .	91
6. Generation of High-Power Giant Ruby Laser Pulses with Narrow Emission Wavelengths . . . . .	92
7. Optical Components of the Apparatus . . . . .	96
8. Mechanism of Trigger Amplification of the Stimulated Brillouin Scattering and Stimulated Temperature Scattering Components . . .	100
Chapter III. Experimental Results of Spectroscopic Investigations of the Stimulated Brillouin Scattering in Gases . . . . .	103
9. Investigations of Interferometric Spectra of the Stimulated Brillouin Scattering in Compressed Gases . . . . .	103
10. Time Evolution of the Stimulated Brillouin Scattering in Gaseous Nitrogen at 150 atm . . . . .	105
11. Dependence of the Shifts of the Brillouin Scattering Components on the Intensity of the Exciting Radiation . . . . .	107
12. Stimulated Brillouin Scattering in Low-Pressure Hydrogen . . . . .	111
Chapter IV. Experimental Results of Spectroscopic Investigations of the Nonlinear Electrocaloric Interaction of High-Power Light Pulses with a Gas . . . . .	112
13. Investigations of the Spectra of the Amplified Stimulated Temperature Scattering in Low-Pressure Hydrogen . . . . .	112
14. Broadening of the Frequency Spectrum of High-Power Laser Pulses in Gases . . . . .	113
Literature Cited . . . . .	116
Experimental Investigations of the Thermal and Stimulated Molecular Scattering of Light in Solutions in a Wide Range of Wavelengths	
I. M. Aref'ev . . . . .	119
Introduction . . . . .	119
Chapter I. Optical Heterodyne Methods and Some of Their Applications in Investigations of Molecular Scattering of Light . . . . .	123
1. Optical Heterodyne Methods . . . . .	123
2. Experimental Investigations of the Thermal Scattering of Light in Liquids and Solutions by Optical Heterodyne Methods . . . . .	127
3. Heterodyning of Light Under Stimulated Scattering Conditions . . . .	131
Chapter II. Measurement of the Width of the Central Component of the Thermal Scattering Spectrum and Determination of Inter-diffusion Coefficients of Solutions of Acetone in Carbon Disulfide and of Bromoform in n-Propanol . . . . .	132
1. Spectrometer with Square-Law Detection . . . . .	132
2. Selection of Investigated Substances . . . . .	134
3. Results of Measurements and Discussion . . . . .	137
Chapter III. Thermal and Stimulated Brillouin Scattering, Velocity of Hypersound, and Dispersion of This Velocity in Aqueous Solutions of Tertiary Butyl Alcohol . . . . .	139
1. Some Features of the Propagation of Ultrasound in Aqueous Solutions of Tertiary Butyl Alcohol . . . . .	139

2. Apparatus and Measurement Method . . . . .	140
3. Results and Discussion . . . . .	143
Chapter IV. Fine Structure of the Rayleigh Line and Temperature Dependence of the Velocity of Hypersound and of Dispersion of This Velocity near the Critical Solution Point of Triethylamine-Water Systems . . . . .	146
1. Some Features of the Scattering of Light near the Critical Point of Solutions . . . . .	146
2. Velocity and Absorption of Ultrasound near the Critical Solution Point of Triethylamine-Water Systems . . . . .	147
3. Experimental Method . . . . .	148
4. Results and Discussion . . . . .	149
Chapter V. Stimulated Scattering of Light in Carbon Disulfide and in Solutions of Carbon Disulfide in Carbon Tetrachloride. Amplification of the $R_2$ -Line Radiation of a Ruby Laser by Four-Photon Interaction . . . . .	152
1. Stimulated Concentration Scattering. Estimate of the Gain Deduced from the Steady-State Theory . . . . .	152
2. Four-Photon Interaction in Stimulated Scattering Processes . . . . .	155
3. Stimulated Scattering in Carbon Disulfide and in Solutions of Carbon Disulfide in Carbon Tetrachloride . . . . .	158
4. Amplification of the $R_2$ Ruby Laser Line by the Four-Photon Interaction in the Stimulated Wing of the Rayleigh Line . . . . .	159
Literature Cited . . . . .	161
