

**THE OCEAN BASINS
AND MARGINS**

Volume 5

The Arctic Ocean

THE OCEAN BASINS AND MARGINS

Volume 1: The South Atlantic

Volume 2: The North Atlantic

Volume 3: The Gulf of Mexico and the Caribbean

Volume 4A: The Eastern Mediterranean

Volume 4B: The Western Mediterranean

Volume 5: The Arctic Ocean

In Preparation:

Volume 6: The Indian Ocean

Volume 7: The Pacific Ocean

THE OCEAN BASINS AND MARGINS

Edited by

Alan E.M. Nairn

*Department of Geology
University of South Carolina
Columbia, South Carolina*

Michael Churkin, Jr.

*U.S. Geological Survey
Menlo Park, California*

and

Francis G. Stehli

*University of Florida
Gainesville, Florida*

Volume 5

The Arctic Ocean

SPRINGER SCIENCE+BUSINESS MEDIA, LLC

Library of Congress Cataloging in Publication Data

Nairn, A E M

The ocean basins and margins.

Includes bibliographies.

CONTENTS: v. 1. The South Atlantic.—v. 2. The North Atlantic.—v. 3. The Gulf of Mexico and the Caribbean.—v. 4A. The eastern Mediterranean.—v. 4B. The western Mediterranean.—v. 5. The Arctic Ocean.

1. Submarine geology. 2. Continental margins. I. Stehli, Francis Greenough, joint author. II. Churkin, Michael, 1932- III. Title.

CONTENTS

Chapter 1. Continental Plates and Accreted Oceanic Terranes in the Arctic

Michael Churkin, Jr., and James H. Trexler, Jr.

I. Introduction	1
II. Tectonostratigraphic Terranes	3
III. Relations between Terranes	5
IV. Review of Paleomagnetic Data	13
V. Discussion	14
VI. Conclusions	16
Acknowledgments	16
References	16

Chapter 2. Geology of Alaska Bordering the Arctic Ocean

J. Thomas Dutro, Jr.

I. Introduction	21
II. Analysis of Depositional Episodes	23
III. Orogenic History	29
IV. Hypothesis of Arctic Plate Movement	32
V. Summary	34
Acknowledgments	34
References	34

Chapter 3. The North American Plate from the Arctic Archipelago to the Romanzof Mountains

D. K. Norris and C. J. Yorath

I. Introduction	37
II. Stratigraphic Succession	40

A. Introduction	40
B. The Inuvikian Sequence (I)	41
C. The Franklinian Sequence (F)	44
D. The Ellesmerian Sequence (E)	46
E. The Brookian Sequence (B)	50
III. Tectonic Development	53
A. Geotectonic Elements	53
B. Geotectonic Patterns	78
C. Tectonic Synthesis	87
IV. Relationship of the Canada Basin to the American Plate	90
A. Introduction	90
B. Geophysical Information	91
C. Geological Information	94
V. Concluding Remarks	95
Acknowledgments	97
References	97

**Chapter 4. Evolution of the Canadian Arctic Islands: A Transition
between the Atlantic and Arctic Oceans**

J. Wm. Kerr

I. Introduction	105
A. Geographic Limits of Study	105
B. Objectives and Format	105
C. Relationship of Sequences to Major Geological Provinces	106
II. Constructional Phase: Evolution of the Continent as a Substructure	111
A. Sequence 1: Precambrian Crystalline Basement	111
B. Innuitian Mobile Belt	111
C. Sequence 2: Proterozoic Basins	112
D. Sequence 3: Late Proterozoic to Late Devonian	113
E. Sequence 3: Simple Evolution	117
F. Pearya Geanticline	125
G. Ellesmerian Orogeny, Unobstructed Pattern	127
H. Basement Uplifts Affecting Sequence 3	129
I. Sequence 3: Obstructed Evolution	136
J. Continent as a Substructure Prior to Ocean Development	140
III. Fragmentation Phase: Evolution of the Ocean Basins and Branches within the Continent	141
A. Foreword	141
B. Boreal Rifting Episode	141
C. Sequence 4: Mid-Mississippian (Visean) to Early Cretaceous (Pre-Isachsen Formation)	142
D. Sequence 5: Early Early Cretaceous (Valanginian) to Late Cretaceous (Campanian/Maastrichtian)	150

E. Connecting of Oceans by the Canadian Arctic Rift System . . .	153
F. Sequence 6: Late Cretaceous (Campanian/Maastrichtian) to Mid-Tertiary (Miocene)	154
G. Plate Reconstructions	157
H. Eurekan Deformation	165
I. Sequence 6: Penetration of the Continent by Rifting	169
J. Sequence 7: (Miocene) Severing of the Continent by Rifting . .	178
K. Sequence 8: Mid-Tertiary (Post-Miocene) to Present-Day Development	181
L. Mineral and Petroleum Deposits	184
IV. Summary and Discussion	187
Acknowledgments	190
References	190

Chapter 5. The Northern Margin of Greenland from Baffin Bay to the Greenland Sea

Peter R. Dawes and John S. Peel

I. Introduction	201
II. Regional Geological Outline	204
A. Physiography	204
B. Geological Provinces and Subprovinces	204
C. Sedimentary and Structural Model	204
III. The Precambrian Shield	206
A. Introduction	206
B. North-West Greenland	207
C. Central North Greenland	209
D. Eastern North Greenland and North-East Greenland	209
IV. The North Greenland Platform	211
A. Introduction	211
B. Proterozoic	211
C. Lower Paleozoic	215
V. The North Greenland Foldbelt	217
A. Introduction	217
B. Geosynclinal Sedimentation	217
C. Structure and Metamorphism	219
D. Age of Orogenesis	223
VI. The East Greenland Foldbelt	224
A. Introduction	224
B. Southern Part, 70° to 76°N	224
C. Northern Part, 76° to 82°N	225
VII. Late Cretaceous–Early Tertiary Acid Volcanic Suite	230
VIII. The Wandel Sea Basin	231
A. Introduction	231

B. Carboniferous and Permian	231
C. Triassic	234
D. Jurassic	235
E. Cretaceous–Tertiary	235
F. Structure	235
IX. Geology and Physiography of the Continental Margin	236
A. Introduction	236
B. Greenland Sea	238
C. Eurasian Basin	239
D. Baffin Bay–Nares Strait	242
X. Regional Crustal Structure and Relationships	244
A. Introduction	244
B. Deep Crustal Structure	245
C. Summary of Crustal Movements	246
D. Concluding Remarks	254
XI. Appendix	256
A. The North Greenland Platform	257
B. The North Greenland Foldbelt	258
C. The Wandel Sea Basin	258
Acknowledgments	259
References	259

Chapter 6. The Geology of Svalbard, the Western Part of the Barents Sea, and the Continental Margin of Scandinavia

K. Birkenmajer

I. Introduction	265
II. Caledonian Foldbelt of Svalbard	267
A. Main Precambrian through Early Paleozoic Successions	269
B. Stratigraphic Correlation of Rocks and Events	279
C. Problem of Precambrian Basement	280
D. Precambrian Sedimentation and Igneous Activity—Torellian Basin	281
E. Werenskioldian Diastrophism	281
F. Torellian Diastrophism	282
G. Late Precambrian Sedimentation—Jarlsbergian Basin	282
H. Jarlsbergian Diastrophism	283
I. Early Paleozoic Sedimentation—Hornsundian Basin	283
J. Hornsundian Unconformity	284
K. Main Caledonian (Ny Friesland) Orogeny	284
L. Late Orogenic Plutonism	285
III. Devonian Molasse of Svalbard and Plate Motions	285
A. Late Orogenic Sedimentation—Svalbardian Basin and Haakonian Movements	285
B. Svalbardian Movements	287

IV. Carboniferous through Tertiary Platform Basins of Svalbard	289
A. Carboniferous and Permian Sedimentation	289
B. Variscan Movements	291
C. Triassic through Basal Jurassic Sedimentation	292
D. Jurassic through Lower Cretaceous Sedimentation	294
E. Mesozoic Igneous Events	299
F. Early Tertiary Sedimentation	300
V. Tertiary Folding in Svalbard and Plate Motions	304
VI. Neogene to Quaternary Events	308
VII. Geological Features of the Western Barents Sea and the Continental Margin between Svalbard and Scandinavia	310
A. Structure of the Continental Margin and Slope	310
B. Relation to Mid-Ocean Ridges	315
VIII. Concluding Remarks	316
References	322

Chapter 7. Geology of the Soviet Arctic: Kola Peninsula to Lena River

Michael Churkin, Jr., George Soleimani, Claire Carter,
and Rhoda Robinson

I. Introduction	331
II. Kola Peninsula—Karelia—Area I	332
III. Timan—Pechora Region—Area II	336
IV. Northern Pechora Basin, Polar Urals, Pay-Khoy, Vaygach, and Novaya Zemlya—Area III	343
V. Franz Josef Land—Area IV	348
VI. Western Siberian Lowland and Islands of the Kara Sea—Area V	350
VII. Taymyr and Severnaya Zemlya—Area VI	351
VIII. North Siberian Lowland—Area VII	366
IX. Eastern Part of the North Siberian Lowland and Lena River Depression—Area VIII	366
X. Geologic Development of the Western Soviet Arctic	372
References	374

Chapter 8. Tectonics of the Soviet Far East

Y. A. Kosygin and L. M. Parfenov

I. Introduction	377
II. Mesozoic Geosynclinal Systems	377
A. The Eugeosynclinal Systems of Type B	382
B. The Miogeosynclinal Systems	385
III. Median Massifs	390
IV. Continental Margin Volcanic Belts	391
V. Cenozoic Geosynclinal Systems	392

VI. Nature of Deep Basins of Marginal Seas	394
VII. Basement of Mesozoic and Cenozoic Eugeosynclines	395
VIII. Tectonic Position and Nature of Volcanic Belts	395
IX. Some Characteristics of Granitic Magmatism	397
X. Main Fault Systems	398
A. Island Arc Fault Systems	398
B. Transform Fault Systems	402
C. Continental Margin Strike-Slip Faults	403
D. Oroclinal Fault System	403
E. Collision Fault Systems	404
F. Fault Systems Connected with Horizontal Displacement within the Continental Blocks	406
Acknowledgments	407
References	407

**Chapter 9. The Tectonic Zones of Northeastern USSR and the
Formation of Its Continental Crust**

N. A. Shilo and S. M. Til'man

I. Introduction	413
II. Siberian Platform and Miogeosynclinal Zones	415
III. Alazeia-Oloi System	418
IV. Late Mesozoic Rifts	426
V. Problem of the Kolyma Massif	428
VI. Koni-Taigonos Zone	429
VII. Okhotsk-Chukotsk Volcanic Belt	429
VIII. Tectonic Nature of the Inyali-Debina Synclinorium	432
IX. The Koryak Upland	434
X. Conclusions	436
References	437

**Chapter 10. Geology and Physiography of the Continental Margin
North of Alaska and Implications for the Origin of the
Canada Basin**

Arthur Grantz, Stephen Eittreim, and Olive T. Whitney

I. Introduction	439
II. Physiography	440
A. Major Features	440
B. Western Beaufort Shelf	444
C. Chukchi Shelf	444
D. Sea Valleys and Submarine Canyons	445
E. Chukchi Continental Borderland	447

F. Continental Shelf Break and Beaufort Ramp.....	448
G. Alaska Continental Slope and Northwind Escarpment.....	449
H. Canada Continental Rise and Abyssal Plain and Alaska Continental Rise	449
III. Regional Stratigraphy and Tectonic Setting	450
A. Franklinian Sequence and Precambrian Rocks	451
B. Arctic Platform and Ellesmerian Sequence	451
C. Colville Foredeep and Brookian Sequence	454
D. Hope Basin Sequence	456
IV. Geology	456
A. Structural Provinces	456
B. Barrow Arch	459
C. Arctic Platform and Colville Foredeep	461
D. Herald and Wrangel Arches	463
E. Herald and Wrangel Fault Zones	464
F. Chukchi Syntaxis.....	466
G. Hope Basin.....	467
H. North Chukchi Basin	470
I. Western Beaufort Shelf Sedimentary Prism.....	471
J. Diapiric Folds beneath the Continental Rise	481
K. Solid Gas Hydrate.....	483
L. Canada Basin	483
M. Segmentation of the Alaskan Continental Margin	484
V. Summary of Tectonic Implications and Constraints	486
Acknowledgments	488
References	489

**Chapter 11. The Greenland–Norwegian Sea and Iceland Environment:
Geology and Geophysics**

P. R. Vogt, R. K. Perry, R. H. Feden, H. S. Fleming,
and N. Z. Cherkis

I. Introduction	493
II. Physiography and Morphology	496
III. Sediments and Paleoclimate	510
A. Surface Sediments.....	510
B. Late Quaternary Climate	514
C. Late Quaternary Sedimentation Rates	517
D. Paleoclimate and Sedimentation during Earlier Plio- Pleistocene Glaciations	518
E. Preglacial, Post-Mesozoic Sediments	521
F. Mesozoic and Older Rocks.....	532
IV. Geophysical Signatures and the Igneous Crust	537
A. Magnetic Field Anomalies and Implications for the History of Plate Motion	537

B. Crustal and Mantle Structure: Seismic Evidence.....	552
C. Gravity	557
D. Heat Flow.....	563
E. Seismicity.....	567
V. Igneous Geochemistry and the Iceland Mantle Plume.....	571
VI. Early Tertiary Volcanism and Possible Antecedents	573
VII. Direct Measurement of Crustal Motion on Iceland	577
VIII. Concluding Remarks	579
Acknowledgments	581
References	581

Chapter 12. Geology and Geophysics of the Amerasian Basin

David L. Clark

I. Introduction	599
II. Amerasian Basin.....	602
A. Canada Abyssal Plain	602
B. The Alpha Cordillera	607
III. Chukchi Plateau and Adjacent Areas.....	615
A. Introduction	615
B. Physiography	616
C. Sediment.....	616
D. Structure and Origin	617
IV. Wrangel and Fletcher Abyssal Plains.....	617
A. Description.....	617
B. Sediments.....	618
C. Structure.....	618
V. Origin of the Amerasian Basin	619
VI. Paleontology of the Amerasian Basin	624
A. Phylum Protozoa.....	624
B. Other Protistians	626
C. Ostracodes	626
D. Miscellaneous Invertebrates	626
E. Fish Remains	627
F. Trace Fossils	627
VII. Paleoecology of the Amerasian Basin	627
References	631
Index	635
