## Preface

The aim of this book is to provide a comprehensive compendium of current methods and protocols to study posttranscriptional base modifications, in particular methylation, in RNA. The study of RNA methylation has emerged as an exciting new research area over the past few years not least due to the discovery that internal base methylation, such as N6-methyladenosine (m6A) and 5-methylcytosine (m5C), is widespread not only in abundant RNAs (tRNAs, rRNA) but also in mRNAs and in long noncoding RNAs (lncRNAs). Thus, it might represent an additional layer of gene regulation, leading to the coining of the terms “RNA epigenetics” and “epitranscriptomics.” Although RNA methylation research is still in its early stages, disruption of RNA methylation has been linked to a number of disease conditions, including obesity, type 2 diabetes mellitus, Alzheimer’s disease, cancer, and cardiovascular disease. Moreover, at least m6A is a reversible modification, which further underscores the regulatory potential of RNA methylation.

The protocols collected in this book represent the state-of-the-art methodology for investigating diverse aspects of RNA methylation on different types of RNA. Protocols include wet lab techniques for the detection of methylation, instructions for bioinformatics analyses of transcriptome-scale data sets as well as protocols for the functional examination of RNA modifications and enzymes. Thus, this laboratory manual may constitute a valuable source for biochemists and molecular biologists from different fields who wish to include the investigation of different types of RNA methylation in their studies.

# Contents

<i>Preface</i> . . . . .	<i>v</i>
<i>Contributors</i> . . . . .	<i>ix</i>
PART I MODIFICATIONS IN ABUNDANT RNA SPECIES	
1 LC-MS Analysis of Methylated RNA . . . . .	3
<i>Kathrin Thüring, Katharina Schmid, Patrick Keller, and Mark Helm</i>	
2 Comparative Analysis of Ribonucleic Acid Digests (CARD) by Mass Spectrometry . . . . .	19
<i>Mellie June Paulines and Patrick A. Limbach</i>	
3 Liquid Chromatography-Mass Spectrometry for Analysis of RNA Adenosine Methylation . . . . .	33
<i>Bi-Feng Yuan</i>	
PART II ANALYSIS OF N <sup>6</sup> -METHYLADENOSINE	
4 Genome-Wide Location Analyses of N <sup>6</sup> -Methyladenosine Modifications (m <sup>6</sup> A-Seq) . . . . .	45
<i>Benoit Molinie and Cosmas C. Giallourakis</i>	
5 Mapping m <sup>6</sup> A at Individual-Nucleotide Resolution Using Crosslinking and Immunoprecipitation (miCLIP) . . . . .	55
<i>Anya V. Grozhik, Bastian Linder, Anthony O. Olarerin-George, and Samie R. Jaffrey</i>	
6 Detection and Quantification of N <sup>6</sup> -Methyladenosine in Messenger RNA by TLC . . . . .	79
<i>Zsuzsanna Bodi and Rupert G. Fray</i>	
PART III ANALYSIS OF 5-METHYLCYTOSINE	
7 Illustrating the Epitranscriptome at Nucleotide Resolution Using Methylation-iCLIP (miCLIP) . . . . .	91
<i>Harry George, Jernej Ule, and Shobbir Hussain</i>	
8 Detection of 5-Methylcytosine in Specific Poly(A) RNAs by Bisulfite Sequencing . . . . .	107
<i>Thomas Amort and Alexandra Lusser</i>	
9 Transcriptome-Wide Detection of 5-Methylcytosine by Bisulfite Sequencing . . . . .	123
<i>Thomas Amort, Xueguang Sun, Daria Khokhlova-Cubberley, and Alexandra Lusser</i>	
10 Analysis of High-Throughput RNA Bisulfite Sequencing Data . . . . .	143
<i>Dietmar Rieder and Francesca Finotello</i>	

11 Statistical Methods for Transcriptome-Wide Analysis of RNA Methylation by Bisulfite Sequencing. . . . . 155  
*Brian J. Parker*

PART IV FURTHER RNA MODIFICATIONS

12 High-Throughput Mapping of 2'-O-Me Residues in RNA Using Next-Generation Sequencing (Illumina RiboMethSeq Protocol) . . . . . 171  
*Virginie Marchand, Lilia Ayadi, Aseel El Hajj, Florence Blanloeil-Oillo, Mark Helm, and Yuri Motorin*

13 RiboMeth-Seq: Profiling of 2'-O-Me in RNA. . . . . 189  
*Nicolai Krogh, Ulf Birkedal, and Henrik Nielsen*

14 In Silico Identification of RNA Modifications from High-Throughput Sequencing Data Using HAMR . . . . . 211  
*Pavel P. Kuksa, Yuk Yee Leung, Lee E. Vandivier, Zachary Anderson, Brian D. Gregory, and Li-San Wang*

15 High-Throughput Small RNA Sequencing Enhanced by AlkB-Facilitated RNA de-Methylation (ARM-Seq) . . . . . 231  
*Eva Hrabeta-Robinson, Erin Marcus, Aaron E. Cozen, Eric M. Phizicky, and Todd M. Lowe*

16 Transcriptome-Wide Mapping of N<sup>1</sup>-Methyladenosine Methylome . . . . . 245  
*Xiaoyu Li, Jinying Peng, and Chengqi Yi*

PART V FUNCTIONAL ASSAYS FOR MODIFIED AND UNMODIFIED RNA

17 In Vitro Assays for RNA Methyltransferase Activity . . . . . 259  
*Sara Haag, Katherine E. Sloan, Claudia Höbartner, and Markus T. Bobnsack*

18 Crosslinking Methods to Identify RNA Methyltransferase Targets In Vivo. . . . . 269  
*Sara Haag, Jens Kretschmer, Katherine E. Sloan, and Markus T. Bobnsack*

19 Methylated mRNA Nucleotides as Regulators for Ribosomal Translation. . . . . 283  
*Thomas P. Hoernes and Matthias D. Erlacher*

20 Automated Chemical Solid-Phase Synthesis and Deprotection of 5-Hydroxymethylcytosine-Containing RNA . . . . . 295  
*Christian Rimpl and Ronald Micura*

*Index* . . . . . 303
