Contents

Part I Introduction to Cancer and Nanotechnology

- 1 Introduction** 3
Praveena Velpurisiva, Janel L. Kydd, Rahul Jadia,
Stephanie A. Morris, and Prakash Rai
- 2 Biological Events and Barriers to Effective Delivery
of Cancer Therapeutics** 13
Erica N. Bozeman and Lily Yang
- 3 Cancer Diagnostics and Therapeutics** 33
Uma Prabhakar, Yalia Jayalakshmi, and C. Katherine Wang
- 4 Nanomedicine in Cancer** 67
Liang Ma, Phuong Le, Manish Kohli, and Andrew M. Smith
- 5 Theranostics: A Historical Perspective of Cancer Nanotechnology
Paving the Way for Simultaneous Use Applications** 91
Christopher M. Hartshorn and Stephanie A. Morris

Part II Cancer Nanodiagnostics and Nanotherapeutics

- 6 In Vitro Cancer Diagnostics** 109
Jung-Rok Lee, Chin Chun Ooi, and Shan X. Wang
- 7 Translational Nanodiagnostics for In Vivo Cancer Detection** 133
Christina H. Liu, Pushpa Tandon, and Luisa M. Russell
- 8 Delivery of Cancer Nanotherapeutics** 163
Bomy Lee Chung, Joseph Kaplinsky, Robert Langer,
and Nazila Kamaly
- 9 Oral Nanotherapeutics for Cancer with Innovations in Lipid
and Polymeric Nanoformulations** 207
Alexander J. Donovan and Ying Liu

10	Topical and Transdermal Nanomedicines for Cancer Therapy	231
	Yanqi Ye, Jinqiang Wang, Wujin Sun, Hunter N. Bomba, and Zhen Gu	
11	Cancer Nanotherapeutics Administered by Non-conventional Routes	253
	Kyle C. Roche, Yusra Betul Medik, Zach Rodgers, Sam Warner, and Andrew Z. Wang	
Part III Regulatory Considerations for Nanomaterial Drug Products		
12	Regulatory Considerations for Cancer Drug Products Containing Nanomaterials	277
	Mamta Kapoor, Kathryn Hughes, and Katherine M. Tyner	
13	Perspectives for Characterizing Drug Component of Theranostic Products Containing Nanomaterials	301
	Christie M. Sayes and Anthony J. Hickey	
Part IV Cancer Nanotheranostics		
14	Engineering Multifunctional Nanomedicine Platforms for Drug Delivery and Imaging	319
	James Grant, Mana Naeim, Youngshin Lee, Darron Miya, Theodore Kee, and Dean Ho	
15	Image-Guided Drug Delivery	345
	Camila Gadens Zamboni, Keyvan Farahani, and Jordan J. Green	
16	Nanotheranostics-Based Imaging for Cancer Treatment Monitoring	395
	Tianxin Miao, Rachael A. Oldinski, Gang Liu, and Xiaoyuan Chen	
17	Remotely Triggered Nanotheranostics	429
	Abdul K. Parchur, Jaidip M. Jagtap, Gayatri Sharma, Venkateswara Gogineni, Sarah B. White, and Amit Joshi	
18	Concluding Remarks and the Future of Nanotheranostics	461
	Janel L. Kydd, Praveena Velpurisiva, Stephanie A. Morris, and Prakash Rai	
	Index	471

About the Editors

Prakash Rai, Ph.D. joined the Department of Chemical Engineering at the University of Massachusetts Lowell as an Assistant Professor in September 2012. Prior to this, he was an Instructor at the Center for Engineering in Medicine at Massachusetts General Hospital (MGH) and Harvard Medical School. He received his Bachelor's degree in Chemical Engineering from the University of Mumbai, India, in 2003 and his Ph.D. in Chemical and Biological Engineering from Rensselaer Polytechnic Institute in 2007. He is currently working on developing translational nanotechnology-based platforms for the imaging, prevention, and treatment of cancer. His research involves designing, synthesizing, characterizing, and evaluating the efficacy of these multifunctional nanoparticles in cell culture as well as animal models of the disease. He has authored over 30 publications in peer-reviewed journals with several first author publications in journals including *Nature Biotechnology*, *Proceedings of the National Academy of Sciences*, *Angewandte Chemie*, and *Cancer Research*. In 2010, he was chosen to receive the "Scholar in Training" award by the American Association of Cancer Research. He has also received a cancer nanotechnology "Pathway to Independence" grant award from the National Cancer Institute at the National Institutes of Health to carry out research in the area of cancer theranostics.

Stephanie Morris, Ph.D. joined the National Institutes of Health (NIH) as a Program Director at the National Cancer Institute in 2012 where she managed a portfolio of nanotechnology research projects and centers in the Alliance for Nanotechnology in Cancer program. She also developed new research initiatives such as the Innovative Research in Cancer Nanotechnology program and participated on several NIH and interagency committees and working groups, especially those focused on nanotechnology data sharing. She received her Bachelor's degree in Biology and Neuroscience and Behavior (dual majors) from Wesleyan University in Middletown, CT, and her Ph.D. in Biochemistry and Biophysics from the University of North Carolina at Chapel Hill where she was a Ford Foundation Fellow. She is also the recipient of a UNCF-Merck Postdoctoral Research Fellowship, which she received while in the National Cancer Institute's Laboratory

of Receptor Biology and Gene Expression. Her research background includes the study of transcription and chromatin-modifying enzymes. Dr. Morris recently moved to the Office of Strategic Coordination in the National Institutes of Health Office of the Director where she is involved in strategic planning for the NIH Common Fund and serves as a Program Officer for the Molecular Transducers of Physical Activity and the Somatic Cell Genome Editing programs.
