

Advanced Structured Materials

Volume 113

Series Editors

Andreas Öchsner, Faculty of Mechanical Engineering, Esslingen University of Applied Sciences, Esslingen, Germany

Lucas F. M. da Silva, Department of Mechanical Engineering, Faculty of Engineering, University of Porto, Porto, Portugal

Holm Altenbach, Faculty of Mechanical Engineering,

Otto-von-Guericke-Universität Magdeburg, Magdeburg, Sachsen-Anhalt, Germany

Common engineering materials reach in many applications their limits and new developments are required to fulfil increasing demands on engineering materials. The performance of materials can be increased by combining different materials to achieve better properties than a single constituent or by shaping the material or constituents in a specific structure. The interaction between material and structure may arise on different length scales, such as micro-, meso- or macroscale, and offers possible applications in quite diverse fields.

This book series addresses the fundamental relationship between materials and their structure on the overall properties (e.g. mechanical, thermal, chemical or magnetic etc.) and applications.

The topics of *Advanced Structured Materials* include but are not limited to

- classical fibre-reinforced composites (e.g. glass, carbon or Aramid reinforced plastics)
- metal matrix composites (MMCs)
- micro porous composites
- micro channel materials
- multilayered materials
- cellular materials (e.g., metallic or polymer foams, sponges, hollow sphere structures)
- porous materials
- truss structures
- nanocomposite materials
- biomaterials
- nanoporous metals
- concrete
- coated materials
- smart materials

Advanced Structured Materials is indexed in Google Scholar and Scopus.

Preface

Different engineering disciplines such as mechanical, materials, computer and process engineering provide the foundation for the design and development of improved structures, materials and processes. The modern design cycle is characterized by an interaction of different disciplines and a strong shift to computer-based approaches where only a few experiments are performed for verification purposes. A major driver for this development is the increased demand for cost reduction, which is also connected to environmental demands. In the transportation industry (e.g. automotive or aerospace), this is connected with the demand for higher fuel efficiency, which is related to the operational costs and the lower harm for the environment. One way to fulfil such requirements is lighter structures and/or improved processes for energy conversion. Another emerging area is the interaction of classical engineering with the health and medical sector. This volume gives an update on recent developments in the mentioned areas of modern engineering design application.

We would like to express our sincere appreciation to the representatives of Springer, who made this volume possible.

Contents

Investigation of the Damage Behavior of Polyurethane in Stress Relaxation Experiments and Estimation of the Stress-at-Break σ_b with a Failure Envelope	1
Selina Neuhaus, Henning Seibert and Stefan Diebels	
Identification of Inelastic Parameters of the AISI 304 Stainless Steel . . .	17
Miguel Vaz Jr., E. R. Hulse and M. Tomiyama	
Effect of Fiber Volume Fraction on Mechanical Properties of Type E-Glass in Composite Materials	37
Zamzam A. Elsharif and Bashir M. Gallus	
Experimental Study of Temperature Effect on the Mechanical Properties of GFRP and FML Interface	47
Z. P. Chow, Z. Ahmad and K. J. Wong	
An Alternative Method for Modelling the Degradation of Hyperelastic Materials Within the Framework of Finite-Strain Elastoplasticity	59
L. Écsi and P. Élesztős	
Geometric Nonlinear Numerical Analysis of Shells in the Form of a Hyperboloid of Revolution	83
Ismael Taha Farhan Farhan, Gil-oulbé Mathieu and Timur Soibnazarovich Imomnazarov	
Numerical Experiments on Helicoids Stress-Strain State	95
Marina Rynkovskaya, A. S. Markovich, M. Gil-Oulbe and S. V. Strashnov	
Transversely Cracked Beams with Quadratic Function's Variation of Height	105
Matjaž Skrinar	

Effect of Vapour-Grown Carbon Nanofibres on Thermo-Mechanical Properties of High-Functionality Based Resin Used in CFRP Strengthening System Subjected Severe Service Conditions	117
R. Al-Safy, R. Al-Mahaidi, G. P. Simon and J. Habsuda	
Study on Closed-Die Forging in Stainless Steel as Standard ASTM F138 in Grain Size Function	133
Givanildo Alves dos Santos, Wagner Figueiredo, Ylich Peter Schmitt, Maurício Silva Nascimento, Fabio Miranda, Gilmar Ferreira Batalha and Antonio Augusto Couto	
Contribution to an Electrical Transport in Montmorillonite/ Polyaniline Composite	155
S. Rusnáková, K. Karvanis, P. Košťal, Z. Košťalová-Jančíková and A. Zimula	
Chosen Physical Properties of Menzolit BMC 3100	167
S. Rusnáková, K. Karvanis, P. Košťal, Z. Košťalová Jančíková and A. Zimula	
Structural Analysis by Finite Element Method in Ball Valves to Improve Their Mechanical Properties	175
M. Eigure-Hidalgo, J. M. Aburto-Barrera, C. R. Torres-San Miguel, J. Martinez-Reyes and B. Romero-Ángeles	
Modelling of Cavitation Around Hydrofoils with Included Bubble Dynamics and Phase Changes	187
Galina Ilieva and Christo Pirovsky	
Implementation of Beamforming Codes in 3D CFD Simulations for the Localization and Visualization of Rotating Sound Sources	201
Christian Maier and Wolfram Pannert	
Signal Analysis and Numerical Method Roles in Neural Interfaces Development	215
I. Kuzmanić, I. Vujović, J. Šoda and M. Rogić Vidaković	
Optimization of the Head Geometry for a Cable Car Passing over a Support	231
M. Wenin, A. Windisch, S. Ladurner, M. L. Bertotti and G. Modanese	
Comparison in Performance of Hybrid and Marvel NoKH Okra/Abelmoschus esculentus Fibre Reinforced Polymer Composites Under Tensile Load	243
Nadendla Srinivasababu	

Analysis of Stress-Strain State of Multi-wave Shell on Parabolic Trapezoidal Plan 257
 V. N. Ivanov, Timur Soibnazarovich Imomnazarov, Ismael Taha Farhan Farhan and Daou Tiekolo

General Boundary Element Method for the Dual-Phase Lag Equations Describing the Heating of Two-Layered Thin Metal Films..... 263
 Ewa Majchrzak

Numerical and Experimental Analysis of a Personalized Prosthesis for a Patient with Unilateral Hip Osteoarthritis 279
 Juan Alfonso Beltrán-Fernández, Omar Rolando Ruiz-Muñoz, Luis Héctor Hernández-Gómez, Alejandro González-Rebattú y González, Itzel Bantle-Chávez, Carolina Alvarado-Moreno, Pablo Moreno-Garibaldi and Nefi Pava Chipol

Biomechanical Fundamentals for Designing Machines that Allows Wear Testing 317
 Iván González-Urbe, Liliana Gutiérrez-Lonche, Diego Ivan Islas-Jiménez, Guillermo Manuel Urriolagoitia-Calderón and Guillermo Urriolagoitia-Sosa

Mechanical Design and Numerical Analysis of a Femorotibial Implant in Patients with Medial Knee Osteoarthritis 323
 José María Aburto-Barrera, Mildred Egure-Hidalgo, Christian Díaz-León, Juan Alejandro Vázquez-Feijoo and Guillermo Urriolagoitia-Sosa

Design and Comparative Numerical Analysis of Designs of Intramedular Telescopic Systems for the Rehabilitation of Patients with Osteogenesis Imperfecta (OI) Type III 333
 J. L. Rueda, C. R. Torres, V. Ramírez, L. Martínez and G. Urriolagoitia

Finite Element Analysis of 3D Models of Upper and Lower Limbs of Mexican Patients with Osteogenesis Imperfecta (OI) Type III 343
 V. Ramírez, C. R. Torres, J. L. Rueda, L. Martínez, B. Romero and G. M. Urriolagoitia

Manufacturing of a Human’s Hand Prosthesis with Electronic Movable Phalanges Based on a CT Image: An Amputation Case 355
 Juan Alfonso Beltrán-Fernández, Itzel Alejandrina Aguirre Hernández, Itzel Bantle-Chávez, Carolina Alvarado-Moreno, Luis Héctor Hernández-Gómez, Pablo Moreno-Garibaldi, Nefi Pava Chipol, Juan Carlos Hermida Ochoa, Adolfo Lopez Lievano and Guillermo Manuel Urriolagoitia-Calderón

Reconstruction and Finite Element Evaluation of a Calcaneous Implant by Stereolithographic 3D Printing Technique 397
Juan Alfonso Beltrán-Fernández, Juan Carlos Hermida-Ochoa, Adolfo López-Lievano, Luis Héctor Hernández-Gómez, Berenice Uribe-Cortes, Pablo Moreno-Garibaldi and Nefi Pava-Chipol

Development of an Auxiliary Biomechanical Assistance System for Blindness or Partial Vision 407
L. H. Hernández-Gómez, J. A. Beltrán-Fernández, J. Martínez-Paredes, J. Medel-Ortiz, Itzel Bantle-Chávez, Carolina Alvarado-Moreno, A. Vega-López, D. Villaseñor-Chávez and J. O. Miranda-Peña
