Series Preface

We are pleased to offer this volume from the 66th Nebraska Symposium on Motivation.

This year the volume editors are Maital Neta and Ingrid Haas. In addition to overseeing the development of this book, the volume editors coordinated the 66th Symposium, including selecting and inviting the contributors. I would like to express my appreciation to Professors Neta and Haas and the contributors for a stimulating meeting and an excellent series of papers on emotion, an important factor in behavior, motivation, and many forms of psychopathology.

This symposium series is supported by funds provided by the Chancellor of the University of Nebraska–Lincoln, Harvey Perlman, and by funds given in memory of Professor Harry K. Wolfe to the University of Nebraska Foundation by the late Professor Cora L. Friedline. We are also grateful for the University of Nebraska Foundation’s support via the Friedline bequest. This symposium volume, like those in the recent past, is dedicated in memory of Professor Wolfe, who brought psychology to the University of Nebraska. After studying with Professor Wilhelm Wundt in Germany, Professor Wolfe returned to his native state to establish the first undergraduate laboratory in psychology in the nation. As a student at the University of Nebraska, Professor Friedline studied psychology under Professor Wolfe.
