The series “Advances in Intelligent Systems and Computing” contains publications on theory, applications, and design methods of Intelligent Systems and Intelligent Computing. Virtually all disciplines such as engineering, natural sciences, computer and information science, ICT, economics, business, e-commerce, environment, healthcare, life science are covered. The list of topics spans all the areas of modern intelligent systems and computing such as: computational intelligence, soft computing including neural networks, fuzzy systems, evolutionary computing and the fusion of these paradigms, social intelligence, ambient intelligence, computational neuroscience, artificial life, virtual worlds and society, cognitive science and systems, Perception and Vision, DNA and immune based systems, self-organizing and adaptive systems, e-Learning and teaching, human-centered and human-centric computing, recommender systems, intelligent control, robotics and mechatronics including human-machine teaming, knowledge-based paradigms, learning paradigms, machine ethics, intelligent data analysis, knowledge management, intelligent agents, intelligent decision making and support, intelligent network security, trust management, interactive entertainment, Web intelligence and multimedia.

The publications within “Advances in Intelligent Systems and Computing” are primarily proceedings of important conferences, symposia and congresses. They cover significant recent developments in the field, both of a foundational and applicable character. An important characteristic feature of the series is the short publication time and world-wide distribution. This permits a rapid and broad dissemination of research results.

**** Indexing: The books of this series are submitted to ISI Proceedings, EI-Compendex, DBLP, SCOPUS, Google Scholar and Springerlink ****

Welcome Message from NBiS Steering Committee Co-chairs

Welcome to the 22nd International Conference on Network-Based Information Systems (NBiS-2019), which will be held at Oita University, Japan from September 5 to September 7, 2019.

The main objective of NBiS is to bring together scientists, engineers, and researchers from both network systems and information systems with the aim of encouraging the exchange of ideas, opinions, and experiences between these two communities.

NBiS started as a workshop and was held for 12 years together with DEXA International Conference as one of the oldest among DEXA Workshops. The workshop was very successful and in 2009 edition the NBiS was held at IUPUI, Indianapolis, the USA as an independent International Conference supported by many international volunteers. In following years, the NBiSs was held in Takayama, Gifu, Japan (2010), Tirana, Albania (2011) Melbourne, Australia (2012), Gwangju, Korea (2013), Salerno, Italy (2014), Taipei, Taiwan (2015), Ostrava, Czech Republic (2016), Toronto, Canada (2017), and Bratislava, Slovakia (2018).

In this edition of NBiS, many papers were submitted from all over the world. They were carefully reviewed and only high-quality papers will be presented during conference days. In conjunction with NBiS-2019 are held also eight International Workshops where specific and hot topics are deeply discussed.

Many volunteer people have kindly helped us to prepare and organize NBiS-2019. First of all, we would like to thank General Co-Chairs, Program Co-Chairs, and Workshops Co-Chairs for their great efforts to make NBiS-2019 a very successful event. We would like to thank all NBiS-2019 Organizing Committee Members, Program Committee Members, and other volunteers for their great help and support. We have special thanks also to Finance Chair and Web Administrator Co-Chairs. Finally, we thank the Local Organization Team at Oita University, Japan, for their good arrangements.

We do hope that you will enjoy the conference and have a good time in Oita, Japan.

NBiS Steering Committee Co-chairs

Leonard Barolli Fukuoka Institute of Technology (FIT), Japan
Makoto Takizawa Hosei University, Japan

Welcome Message from NBiS-2019

General Co-chairs

We would like to welcome you to the 22nd International Conference on Network-Based Information Systems (NBiS-2019), which will be held at Oita University, Japan, from September 5 to September 7, 2019.

It is our honor to chair this prestigious conference, as one of the important conferences in the field. Extensive international participation, coupled with rigorous peer reviews, has made this an exceptional technical conference. The technical program and workshops add important dimensions to this event. We hope that you will enjoy each and every component of this event and benefit from interactions with other attendees.

Since its inception, NBiS has attempted to bring together people interested in information and networking, in areas that range from the theoretical aspects to the practical design of new network systems, distributed systems, multimedia systems, Internet/Web technologies, mobile computing, intelligent computing, pervasive/ubiquitous networks, dependable systems, semantic services, Grid, P2P, and scalable computing. For NBiS-2019, we have continued these efforts as novel networking concepts emerge and new applications flourish. NBiS-2019 consists of the main conference and eight workshops. We received 120 papers, and out of them, 30 were accepted (25% acceptance ratio), which will be presented during the conference days.

The organization of an international conference requires the support and help of many people. A lot of people have helped and worked hard for a successful NBiS-2019 technical program and conference proceedings. First, we would like to thank all the authors for submitting their papers. We are indebted to Track Co-Chairs, Program Committee members, and reviewers who carried out the most difficult work of carefully evaluating the submitted papers.

We would like to give our special thanks to Prof. Leonard Barolli and Prof. Makoto Takizawa the chairs of the Steering Committee for giving us the opportunity to hold this conference and for their guidance on organizing the conference. We would like to thank Program Co-Chairs and Workshops Co-Chairs for their excellent work. We would like to express our great appreciation to our keynote speakers for accepting our invitation as keynote speakers of NBiS-2019.

We would like to thank the Local Arrangements Chairs and Local Organization Team at Oita University, Japan, for making good local arrangements for the conference.

We hope that you have an enjoyable and productive time during this conference and have a great time in Oita, Japan.

Welcome Message from NBiS-2019 Program Committee Co-chairs

Welcome to the 22nd International Conference on Network-Based Information Systems (NBiS-2019), which will be held at Oita University, Japan, from September 5 to September 7, 2019.

The purpose of NBiS conference is to bring together developers and researchers to share ideas and research work in the emerging areas of network and information systems.

The contributions included in the proceedings of NBiS-2019 cover all aspects of theory, design, and application of computer networks and information systems. There are many topics of information networking such as cloud computing, wireless sensor networks, ad hoc networks, peer-to-peer systems, grid computing, social networking, multimedia systems and applications, security, distributed and parallel systems, and mobile computing.

In this edition, 120 submissions were received from all over the world. Each submitted paper was peer-reviewed by Program Committee members and external reviewers who are experts in the subject area of the paper. Then, the Program Committee accepted 30 papers (25% acceptance ratio). In the conference, program are also included the distinguished keynote addresses.

The organization of an International Conference requires the support and help of many people. First, we would like to thank all authors for submitting their papers. We would like to thank all Track Chairs and Program Committee Members, who carried out the most difficult work of carefully evaluating the submitted papers. We also would like to thank NBiS-2019 Workshops Chairs for organizing excellent workshops with NBiS-2019 conference.

We would like to give special thanks to Prof. Leonard Barolli and Prof. Makoto Takizawa, the Chairs of the Steering Committee of NBiS for their strong encouragement, guidance, insights, and for their effective coordination of conference organization. We would like to greatly thank General Co-Chairs for their great support and invaluable suggestions to make the conference a very successful event.

We hope you will enjoy the conference and have a great time in Oita, Japan.

Tomoya Enokido Rissho University, Japan
Marek R. Ogiela AGH University of Science and Technology, Poland
Isaac Woungang Ryerson University, Canada

Welcome Message from NBiS-2019 Workshops Co-chairs

Welcome to the NBiS-2019 Workshops to be held in conjunction with the 22nd International Conference on Network-Based Information Systems (NBiS-2019) at Oita University, Japan, from September 5 to September 7, 2019.

The goal of NBiS-2019 workshops is to provide a forum for international researchers and practitioners to exchange and share their new ideas, research results, and ongoing work on leading-edge topics in the different fields of network-based information systems and their applications. Some of the accepted workshops deal with topics that open up perspectives beyond the ordinary, thus enriching the topics usually addressed by the NBiS-2019 conference.

For this edition, the following workshops will be held with NBiS-2019.

1. The 14th International Workshop on Network-based Virtual Reality and Tele-existence (INVITE-2019)
2. The 13th International Workshop on Advanced Distributed and Parallel Network Applications (ADPNA-2019)
3. The 10th International Workshop on Heterogeneous Networking Environments and Technologies (HETNET-2019)
4. The 10th International Workshop on Intelligent Sensors and Smart Environments (ISSE-2019)
5. The 10th International Workshop on Trustworthy Computing and Security (TwCSec-2019)
6. The 9th International Workshop on Information Networking and Wireless Communications (INWC-2019)
7. The 8th International Workshop on Advances in Data Engineering and Mobile Computing (DEMoC-2019)
8. The 8th International Workshop on Web Services and Social Media (WSSM-2019)

We would like to thank the research community for their great response to NBiS-2019 workshops. The excellent technical program of the workshops was the result of professional work from workshop chairs, workshop program committees, reviewers, and authors.

We would like to give our special thanks to Prof. Leonard Barolli and Prof. Makoto Takizawa, the Steering Committee Chairs of NBiS conference for their strong encouragement and guidance to organize the NBiS-2019 workshops. We would like to thank NBiS-2019 General Co-Chairs and Program Co-Chairs for their advices to make the possible organization of NBiS-2019 workshops.

We would like to express special thanks to NBiS-2019 Web Administration Chairs for their timely unlimited support for managing the conference systems. We also would like to thank NBiS-2019 Local Arrangement Co-Chairs and Local Organization Team at Oita University, Japan, for making the local arrangement for the conference and workshops.

We wish all of you an entertaining and rewarding experience in all workshops and NBiS-2019 conference.

Welcome Message from INVITE-2019 Workshop Organizers

Welcome to the 14th International Workshop on Network-based Virtual Reality and Tele-existence (INVITE-2019), which will be held in conjunction with the 22nd International Conference on Network-Based Information Systems (NBIS-2019) from September 5 to September 7, 2019, at Oita University, Japan.

The INVITE international workshop serves as a forum for the exchange of information and ideas regarding network-based Virtual Reality (VR) and tele-existence, 2D and 3D computer graphics, computer animation, multimedia, object-oriented approach, Web technology, and e-Learning. All participants of this workshop can share ideas and research work in the emerging areas of network-based VR and tele-existence.

Many people have kindly helped us to prepare and organize the INVITE workshop. First of all, we would like to thank the NBIS-2019 organization committee for their support, guidance, and help for making the workshop. We would like to express our special thanks to all of the INVITE program committee members and reviewers for organizing the workshop and reviewing the submitted papers, respectively.

We hope you will enjoy the workshop and have a great time in Oita, Japan.

Welcome Message from ADPNA-2019 Workshop Co-chairs

Welcome to the 13th International Workshop on Advanced Distributed and Parallel Network Applications (ADPNA-2019), which will be held in conjunction with the 22nd International Conference on Network-Based Information Systems (NBIS-2019) from September 5 to September 7, 2019, at Oita University, Japan.

The purpose of this workshop is to bring together developers and researchers to share ideas and research work in the emerging areas of distributed and parallel network applications.

The papers included in ADPNA-2019 cover aspects of theory, design, and application of distributed and parallel systems and applications. ADPNA-2019 contains high-quality research papers. Each submitted paper was peer-reviewed by Program Committee members who are experts in the subject area of the paper.

For organizing a workshop, the support and help of many people are needed. First, we would like to thank all of the authors for submitting their papers. We also appreciate the support from Program Committee members and reviewers who carried out the most difficult work of carefully evaluating the submitted papers.

We would like to thank NBIS-2019 Co-Chairs, Program Co-Chair, and Workshops Co-Chairs, for their support and strong encouragement and guidance in organizing the workshop. We would like to express special thanks to NBIS-2019 Web Administrator Chairs for their timely unlimited support for managing the conference system.

We also would like to thank NBIS-2019 local arrangement members for making the local arrangement for the conference and workshops.

We hope you will enjoy ADPNA-2019 and NBIS-2019 International Conference and have a great time in Oita, Japan.

Welcome Message from HETNET-2019 Workshop Organizers

Welcome to the 10th International Workshop on Heterogeneous Networking Environments and Technologies (HETNET-2019), which will be held in conjunction with the 22nd International Conference on Network-Based Information Systems (NBiS-2019) from September 5 to September 7, 2019, at Oita University, Japan.

Due to advances in networking technologies, and especially, in wireless and mobile communication technologies, and devices with different networking interfaces, the networking systems are moving toward the integration of wired and wireless resources leading to Heterogeneous Networking Environments and Technologies (HETNET). Such environments comprise and integrate wireless LANs, multiple MANETs, Cellular Networks, Wireless Sensor Networks, Wireless Mesh Networks, and so on. Besides, other types of networking systems such as Grid and P2P systems are going wireless and mobile adding yet another dimension to the HETNET.

The integration of various networking paradigms into one networking system is requiring new understandings, algorithms and insights, frameworks, middleware and architectures for the effective design, integration, and deployment aiming at achieving secure, programmable, robust, transparent, and ubiquitous HETNETs.

The aim of this workshop is to present innovative researches, methods, and techniques related to HETNETs and their applications.

Many people contributed to the success of HETNET-2019. First, we would like to thank the organizing committee of NBiS-2019 International Conference for giving us the opportunity to organize the workshop. We would like to thank all authors for submitting their research works and for their participation. We are looking forward to meet them again in the forthcoming editions of the workshop.

We hope you will enjoy the workshop and have a great time in Oita, Japan.

Welcome Message from ISSE-2019 Workshop Co-chairs

To automatically provide human-centric services, it is desired to build smart environments for such purposes. The background system needs to first detect and collect needed information in the environment via various sensors like video cameras, RFIDs, infrared sensors, motion sensors, and pressure sensors. The information is then processed for understanding the context and intention of the people in the environment. Finally, the services are provided in a timely manner. Sensing technology, embedded systems, wireless communications, computer vision, and intelligent methods are the core to build integrated smart environments. Previous ISSE's were held in Fukuoka, Japan (2010), Barcelona, Spain (2011), Melbourne, Australia (2012), Gwangju, Korea (2013), Salerno, Italy (2014), Taipei, Taiwan (2015), Ostrava, Czech Republic (2016), Toronto, Canada (2017), and Bratislava, Slovakia (2018).

The 10th International Workshop on Intelligent Sensors and Smart Environments (ISSE-2019) will provide a platform for researchers to meet and exchange their thoughts. ISSE-2019 will be held in conjunction with the 22nd International Conference on Network-Based Information Systems (NBiS-2019) at Oita University, Japan, from September 5 to September 7, 2019.

Many people contributed to the CFP and paper review of ISSE-2019. We wish to thank the program committee members for their great effort. We also would like to express our gratitude to Steering Committee Co-Chairs, Program Co-Chairs, and Workshops Co-Chairs of NBiS-2019. Last but not least, we would like to thank and congratulate all the contributing authors for their support and excellent work.

Welcome Message from TwCSec-2019 Workshop Co-chairs

It is our great pleasure to welcome you to the 10th International Workshop on Trustworthy Computing and Security (TwCSec-2019), which will be held in conjunction with the 22nd International Conference on Network-Based Information Systems (NBiS-2019) at Oita University, Japan, from September 5 to September 7, 2019.

This international workshop is a forum for sharing ideas and research work in the emerging areas of trustworthy computing, security, and privacy. Computers reside at the heart of systems on which people now rely, both in critical national infrastructures and in their homes, cars, and offices. Today, many of these systems are far too vulnerable to cyber attacks that can inhibit their operation, corrupt valuable data, or expose private information. Future systems will include sensors and computers everywhere, exacerbating the attainment of security and privacy. Current security practices largely address current and known threats, but there is a need for research to consider future threats.

We encouraged contributions describing innovative work on security of next-generation operating systems (OS), secure and resilient network protocols, theoretical foundations and mechanisms for privacy, security, trust, human-computer interfaces for security functions, key distribution/management, intrusion detection and response, secure protocol configuration and deployment, and improved ability to certify and analyze system security properties, and integrating hardware and software for security.

Many people contributed to the success of TwCSec-2019. First, we would like to thank the organizing committee of NBiS-2019 International Conference for giving us the opportunity to organize the workshop. We would like to thank all authors of the workshop for submitting their research works and for their participation. We

are looking forward to meet them again in the forthcoming editions of the workshop.

Finally, we would like to thank the Local Arrangement Chairs for the local arrangement of the workshop.

We hope you will enjoy the workshop and have a great time in Oita, Japan.

Welcome Message from INWC-2019 Workshop Organizers

It is our great pleasure to welcome you to the 9th International Workshop on Information Networking and Wireless Communications (INWC-2019), which will be held in conjunction with the 22nd International Conference on Network-Based Information Systems (NBiS-2019) at Oita University, Japan, from September 5 to September 7, 2019.

This international workshop is a forum for sharing ideas and research work in the emerging areas of information networking and wireless communications. Nowadays, information networks are developing very rapidly and evolving into heterogeneous networks. Thus, we have an increasing number of applications and devices. To optimize the communication in these heterogeneous systems, we need to propose and evaluate more complex schemes, algorithms, and protocols for wired and wireless networks.

Wireless communications are characterized by high bit error rates and burst errors, which arise due to interference fading, shadowing, terminal mobility, and so on. Since the traditional design of the algorithms, methods and protocols of the wired Internet did not take wireless networks into account, the performance over wireless networks is largely degraded. Especially, multi-hop communication aggravates the problem of wireless communication even further. To solve these problems, there has been increased interest to propose and design new algorithms and methodologies for wireless communication.

The aim of this workshop is to present the innovative researches, methods, and numerical analysis for wireless communication and wireless networks.

Many people contributed to the success of INWC-2019. First, we would like to thank the organizing committee of NBiS-2019 International Conference for giving us the opportunity to organize the workshop. We would like to thank all the authors of the workshop for submitting their research works and for their participation. We are looking forward to meet them again in the forthcoming editions of the workshop.

Finally, we would like to thank the Local Arrangement Chairs for the local arrangement of the workshop.

We hope you will enjoy the workshop and have a great time in Oita, Japan.

Welcome Message from DEMoC-2019 Workshop Chair

Welcome to the 8th International Workshop on Advances in Data Engineering and Mobile Computing (DEMoC-2019) which will be held in conjunction with the 22nd International Conference on Network-Based Information Systems (NBiS-2019) at Oita University, Japan, from September 5 to September 7, 2019.

This international workshop is to bring together practitioners and researchers from both academia and industry in order to have a forum for discussion and technical presentations on the current researches and future research directions related to these hot research areas: data engineering and mobile computing. We encouraged contributions describing innovative work on DEMoC-2019 workshop.

Many people contributed to the success of DEMoC-2019. First, we would like to thank the organizing committee of NBiS-2019 International Conference for giving us the opportunity to organize the workshop. We would like to thank all the authors of the workshop for submitting their research works and for their participation. We are looking forward to meet them again in the forthcoming editions of the workshop.

Finally, we would like to thank the Local Arrangement Chairs for the local arrangement of the workshop.

We hope you will enjoy the workshop and have a great time in Oita, Japan.

Welcome Message from WSSM-2019 Workshop Co-chairs

Welcome to Bratislava and the 8th International Workshop on Web Services and Social Media (WSSM-2019), which is held in conjunction with the 22nd International Conference on Network-Based Information Systems (NBiS-2019) at Oita University, Japan from September 5 to September 7, 2019.

Web systems with IoT technology produce big data and they are becoming increasingly important in our society. The AI engine enables us to build novel web services for home and business use. In the next-generation social network services, not only consumer but also IoT will generate contents, which will drive our activity on the Internet.

The International Workshop on Web Services and Social Media (WSSM) encompasses a wide range of topics in the research, design and implementation of Web-related things, especially, social activity on the Internet. The 1st edition of the workshop (WSSM-2012) was held in Melbourne, Australia, the 2nd edition in Gwangju, Korea, the 3rd edition in Salerno, Italy, the 4th edition in Taipei, Taiwan, the 5th edition in Ostrava, Czech Republic, the 6th edition in Toronto, Canada, and the 7th edition in Bratislava, Slovakia. This time, we are honored to hold the 8th edition of the workshop.

This workshop provides an international forum for researchers and participants to share and exchange their experiences, discuss challenges, and present original ideas in all aspect of Web Services and Social Media.

Many people contributed to the success of WSSM-2019. First, we would like to thank the organizing committee of NBiS-2019 International Conference for giving us the opportunity to organize the workshop. We would like to thank our program committee members and all authors for submitting their research works and for their participation.

Finally, we would like to thank the Local Arrangement Chairs of NBiS-2019 conference. We hope you will enjoy WSSM-2019 workshop and NBiS-2019 International Conference and have a great time in Oita, Japan.

NBiS-2019 Keynote Talks

3D Graphics Applications for Education and Visualization

Yoshihiro Okada

Kyushu University, Kyushu, Japan

Abstract. In this talk, I will introduce the research activities about 3D graphics applications. We have developed environments for 3D graphics applications for many years. We have proposed a new system for 3D graphics applications called IntelligentBox. I will present the IntelligentBox and several applications, especially for education and visualization. There are many education applications such as collaborative dental training system, Tai Chi-based physical therapy game, and so on. While as visualization applications, we can mention room layout system, Time-tunnel (a visual analytics tool for multi-dimensional data), Treecube (a visualization tool for browsing 3D multimedia data), and so on. I will introduce the development activities of our laboratory for e-learning materials using 3D graphics and VR/AR, such as web-based interactive educational materials for Japanese history and IoT security, and games for medical education.

Secure Resilient Edge Cloud Designed Network

Tarek Saadawi

The City University of New York, City College, New York, USA

Abstract. IoT systems have put forth new requirements in all aspects of their existence: a diverse QoS requirement, resiliency of computing and connectivity, and the scalability to support massive number of end devices in a plethora of envisioned applications. The trustworthy IoT/cyber-physical system (CPS) networking for smart and connected communities will be realized by distributed secure resilient Edge Cloud (EC). This distributed EC system will be a network of geographically distributed EC nodes, brokering between end devices and Backend Cloud (BC) servers. In this talk, I will present three main topics in the secure resilient cloud designed network: (1) resource management in mobile cloud computing; (2) information management in dynamic distributed databases; and (3) biological-inspired intrusion detection system (IDS). A focus in the presentation will be on the biological-inspired IDS.

Container-Leveraged Service Realization Challenges for Cloud-Native Computing

JongWon Kim

Gwangju Institute of Science & Technology (GIST), Gwangju, Korea

Abstract. Cloud-native computing, employing container-based microservices architecture, is accelerating its adoption for agile and scalable service deployment over worldwide multi-cloud infrastructure. In order to transparently enable diversified inter-connections for container-based cloud-native computing, by leveraging SDN/NFV technology, we need to tie distributed IoT things through multi-site edge clouds to hyper-scale core clouds. Thus, in this talk, I first attempt to relate the open-source-driven development for CNI (Container Networking Interface) and CSI (Container Storage Interface) to the required container-enabled cloud-native computing/storage with end-to-end (i.e., IoT–SDN/NFV–Cloud) inter-connections. Then, selected container-leveraged service realization challenges such as multi-tenant/multi-cluster Kubernetes orchestration, pvc (physical+virtual+containerized) harmonization, kernel-friendly accelerated and secured networking, and network-aware service meshes will be briefly discussed.

Contents

The 22nd International Conference on Network-Based Information Systems (NBIS-2019)	
Evaluation of an OI (Operation Interruption) Protocol to Prevent Illegal Information Flow in the IoT	3

Ring-Based Routing for Industrial Wireless Sensor Networks 526
Ching-Lung Chang, Hao-Ting Lee, and Chuan-Yu Chang

Proposal of Research Information Collection System 537
Takahiro Uchiya, Ryoa Sugisaki, and Ichi Takumi

Agricultural Pests Damage Detection Using Deep Learning 545
Ching-Ju Chen, Jian-Shiun Wu, Chuan-Yu Chang, and Yueh-Min Huang

The 10th International Workshop on Trustworthy Computing and Security (TwCSec-2019)

Analysis of Actual Propagation Behavior of WannaCry Within an Intranet (Extended Abstract) 557
Takanori Oikawa, Masahiko Takenaka, and Yuki Unno

Proposal and Evaluation of Authentication Method Having Shoulder-Surfing Resistance for Smartwatches Using Shift Rule 560
Makoto Nagatomo, Kazuki Watanabe, Kentaro Aburada, Naonobu Okazaki, and Mirang Park

Evaluation of Manual Alphabets Based Gestures for a User Authentication Method Using s-EMG 570
Hisaaki Yamaba, Shotaro Usuzaki, Kayoko Takatsuka, Kentaro Aburada, Tetsuro Katayama, Mirang Park, and Naonobu Okazaki

Analysis of the Reasons Affecting the Simulation Results of SAR Imaging 581
Xing-Xiu Song

Finite Element Simulation of Blasting Robote with ANSYS 586
Xing-Xiu Song

The 9th International Workshop on Information Networking and Wireless Communications (INWC-2019)

Performance Evaluation of VegeCare Tool for Tomato Disease Classification 595
Natwadee Ruedeeniraman, Makoto Ikeda, and Leonard Barolli

Performance Analysis of WMNs by WMN-PSODGA Simulation System Considering Load Balancing: A Comparison Study for Exponential and Weibull Distribution of Mesh Clients 604
 Seiji Ohara, Admir Barolli, Shinji Sakamoto, and Leonard Barolli

Evaluation of 13.56 MHz RFID System Considering Tag Magnetic Field Intensity 620
 Yuki Yoshigai and Kiyotaka Fujisaki

Numerical Analysis of Fano Resonator in 2D Periodic Structure for Integrated Microwave Circuit 630
 Hiroshi Maeda, Naoki Higashinaka, and Akihito Ochi

The 8th International Workshop on Advances in Data Engineering and Mobile Computing (DEMoC-2019)

Evaluation of I/O Performance Regulating Function with a Virtual Machine 641
 Takashi Nagao, Nasanori Tanabe, Kazutoshi Yokoyama, and Hideo Taniguchi

A Continuous Media Data Broadcasting Model for Base Stations Moving Straight 650
 Tomoki Yoshihisa, Yusuke Gotoh, and Akimitsu Kanzaki

A Support System for Second Tourism 658
 Yusuke Gotoh

Omotenashi Robots: Generating Funny Dialog Using Visitor Geographical Information 669
 Kazuki Haraguchi, Satoshi Aoki, Tomohiro Umetani, Tatsuya Kitamura, and Akiyo Nadamoto

The 8th International Workshop on Web Services and Social Media (WSSM-2019)

Web Service for Searching Halal Compliant Restaurants 683
 Imama, Masaki Kohana, and Masaru Kamada

Implementation of Interactive Tutorial for IslayPub by Hooking User Events 692
 Daisuke Tanaka, Masaki Kohana, Michitoshi Niibori, Yasuhiro Ohtaki, Shusuke Okamoto, and Masaru Kamada

A Smart Lock Control System with Home Situation 700
 Katsumi Ohkura and Masaki Kohana

Card Price Prediction of Trading Cards Using Machine Learning Methods 705
Hiroki Sakaji, Akio Kobayashi, Masaki Kohana, Yasunao Takano, and Kiyoshi Izumi

Kawaii in Tweets: What Emotions Does the Word Describe in Social Media?..... 715
Jun Iio

Development of Goals Achievement Sharing System Based on Approach Goals in Positive Psychology..... 722
Yoshihiro Kawano

A Real-Time Programming Battle Web Application by Using WebRTC..... 731
Ryoya Fukutani, Shusuke Okamoto, Shinji Sakamoto, and Masaki Kohana

Author Index..... 739
