

Lecture Notes in Networks and Systems

Volume 138

Series Editor

Janusz Kacprzyk, Systems Research Institute, Polish Academy of Sciences,
Warsaw, Poland

Advisory Editors

Fernando Gomide, Department of Computer Engineering and Automation—DCA,
School of Electrical and Computer Engineering—FEEC, University of Campinas—
UNICAMP, São Paulo, Brazil

Okyay Kaynak, Department of Electrical and Electronic Engineering,
Bogazici University, Istanbul, Turkey

Derong Liu, Department of Electrical and Computer Engineering, University
of Illinois at Chicago, Chicago, USA; Institute of Automation, Chinese Academy
of Sciences, Beijing, China

Witold Pedrycz, Department of Electrical and Computer Engineering,
University of Alberta, Alberta, Canada; Systems Research Institute,
Polish Academy of Sciences, Warsaw, Poland

Marios M. Polycarpou, Department of Electrical and Computer Engineering,
KIOS Research Center for Intelligent Systems and Networks, University of Cyprus,
Nicosia, Cyprus

Imre J. Rudas, Óbuda University, Budapest, Hungary

Jun Wang, Department of Computer Science, City University of Hong Kong,
Kowloon, Hong Kong

The series “Lecture Notes in Networks and Systems” publishes the latest developments in Networks and Systems—quickly, informally and with high quality. Original research reported in proceedings and post-proceedings represents the core of LNNS.

Volumes published in LNNS embrace all aspects and subfields of, as well as new challenges in, Networks and Systems.

The series contains proceedings and edited volumes in systems and networks, spanning the areas of Cyber-Physical Systems, Autonomous Systems, Sensor Networks, Control Systems, Energy Systems, Automotive Systems, Biological Systems, Vehicular Networking and Connected Vehicles, Aerospace Systems, Automation, Manufacturing, Smart Grids, Nonlinear Systems, Power Systems, Robotics, Social Systems, Economic Systems and other. Of particular value to both the contributors and the readership are the short publication timeframe and the world-wide distribution and exposure which enable both a wide and rapid dissemination of research output.

The series covers the theory, applications, and perspectives on the state of the art and future developments relevant to systems and networks, decision making, control, complex processes and related areas, as embedded in the fields of interdisciplinary and applied sciences, engineering, computer science, physics, economics, social, and life sciences, as well as the paradigms and methodologies behind them.

**** Indexing: The books of this series are submitted to ISI Proceedings, SCOPUS, Google Scholar and Springerlink ****

Contents

1	Introduction	1
1.1	Motivation and Goals	1
1.2	Contribution	2
1.3	Literature Review	4
	References	8
2	Consistent Conjectural Variations Equilibrium in a Semi-mixed Duopoly	13
2.1	Model Specification	13
2.2	Exterior Equilibrium	16
2.3	Interior Equilibrium	17
2.4	A Special Case: An Affine Demand Function	18
2.4.1	Consistent Conjectural Variations Equilibrium	19
2.4.2	Cournot-Nash Equilibrium	19
2.4.3	Perfect Competition Equilibrium	20
2.4.4	Comparison of Consistent CVE with Cournot-Nash and Perfect Competition Equilibriums	20
2.4.5	Optimality Criterion for β	21
2.5	Numerical Results	22
2.5.1	Experiment 1	23
2.5.2	Experiment 2	24
2.5.3	Experiment 3	26
	References	27
3	Consistent Conjectural Variations Coincide with the Nash Solution in the Meta-Model	29
3.1	Model Specification	29
3.2	Exterior Equilibrium	31
3.3	Interior Equilibrium	32

3.4	Consistent Conjectures as Optimal Nash Strategies in the Meta-Game.	34
3.5	Numerical Experiments	36
	References	39
4	Bilevel Tolls Optimization Problem with Quadratic Costs	41
4.1	The Bilevel Tolls Optimization Problem's Formulation	41
4.2	Linear-Quadratic Bilevel Program Reformulation	44
4.3	The Solution Methodology	46
4.4	The Allowable Ranges to Stay Basic Procedure	47
4.5	The Filled Function Adaptation	48
4.6	The Algorithm's Description	50
4.6.1	The Main Algorithm	50
4.6.2	The ARSB Algorithms	51
4.6.3	The FF Method Algorithm	55
4.7	The Algorithm's Description	55
4.7.1	The Main Algorithm	56
4.7.2	The ARSB Algorithms	57
4.7.3	The FF Method Algorithm	61
4.8	Numerical Results	61
	References	71
5	Conclusions and Future Research	73
	References	75
	Appendix A: Proofs of Results from Chapter 2	77
	Appendix B: Proofs of Results from Chapter 3	133
	Appendix C: Proofs of Results from Chapter 4	143
