

Palgrave Series in Indian Ocean World Studies

Series Editor

Gwyn Campbell, Indian Ocean World Centre, McGill University,
Montreal, QC, Canada

This is the first scholarly series devoted to the study of the Indian Ocean world from early times to the present day. Encouraging interdisciplinarity, it incorporates and contributes to key debates in a number of areas including history, environmental studies, anthropology, sociology, political science, geography, economics, law, and labor and gender studies. Because it breaks from the restrictions imposed by country/regional studies and Eurocentric periodization, the series provides new frameworks through which to interpret past events, and new insights for present-day policymakers in key areas from labor relations and migration to diplomacy and trade.

ACKNOWLEDGEMENTS

It is somewhat unusual to write an acknowledgements section for an edited volume, but on this occasion, I wish to break with convention.

As readers of the introductory chapter will discover, this book's origins lie in mid-2019. A lot has changed since then. Originally, the plan was to develop a project leading to a publication through an international conference at the Indian Ocean World Centre, McGill University, entitled 'Drought, floods, and rainfall anomalies in the Indian Ocean World.' That conference was scheduled to be held in May 2020. For obvious reasons, it did not go ahead. With this in mind, I wish to state on record how thankful I am to all of the contributors for seeing this project through. This includes all those who responded to the original conference call and those who joined at a later date. Thank you for your patience, your resilience, and your hard work, especially given the challenging circumstances.

I also wish to thank Peter Hynd for his instrumental role in developing the conference theme and for his encouragement thereafter. Thanks also to Sam Stocker, Supraja Ganesh, Chitra Gopalraj and their colleagues at Palgrave and Springer for turning the manuscript into this book. Thanks furthermore to the Social Sciences and Humanities Research Council (SSHRC) of Canada whose funds via a Partnership Grant held by Prof. Gwyn Campbell and an Insight Development Grant held by myself were

essential to the editorship of this book. And thank you to my family, especially to Émilie, Adèle, and Mathis, for all their love, particularly in the last two years.

Philip Gooding

CONTENTS

- 1 Introduction: Droughts, Floods, and Global Climatic Anomalies in the Indian Ocean World 1
Philip Gooding
- 2 The Economy of Floods and Inundations in the Southern Song Capital Prefecture Lin'an (Hangzhou) on the Shore of the Zhe River Estuary and the Hangzhou Bay in Southeastern China During the Twelfth and Thirteenth Centuries 31
Silvia Freiin Ebner von Eschenbach
- 3 Epidemic and Environmental Change in China's Early Modern Maritime World During the 'Little Ice Age' (ca. 1500–1680) 63
Angela Schottenhammer
- 4 The El Nino of 1685–1687 in Golconda and Northern Coromandel, South Asia: Drought, Famine, and Mughal Wars 97
Archisman Chaudhuri
- 5 Rainfall and Floods in the Upper Zambezi Basin, 1680s to 1910s 127
William Gervase Clarence-Smith

6	Droughts and Political Crisis in Imerina, Madagascar, 1825–1829	165
	Gwyn Campbell	
7	The Great Ilocos Flood of 1867	199
	James Francis Warren	
8	El Niño and the Human–Environment Nexus: Drought and Vulnerability in Singapore, 1877–1911	231
	Fiona Williamson	
9	ENSO, IOD, Drought, and Floods in Equatorial Eastern Africa, 1876–1878	259
	Philip Gooding	
10	A Forgotten Drought and Famine in East Africa, 1883–1885	289
	Stephen J. Rockel	
11	‘A Drought so Extraordinary’: The 1911 ENSO and Disaster Nationalism in the American Colonial Philippines	345
	Theresa Ventura

NOTES ON CONTRIBUTORS

Gwyn Campbell is founding Director of the Indian Ocean World Centre, McGill University, General Editor of the Palgrave Series in Indian Ocean World Studies, and Editor-in-Chief of the *Journal of Indian Ocean World Studies*. He holds degrees in Economic History from the Universities of Birmingham and Wales, and he has held a Canada Research Chair in Indian Ocean World History (2005–2019) and a Humboldt Award (2017–2019). He is the director of a SSHRC Partnership Project entitled, ‘Appraising Risk, Past and Present: Interrogating Historical Data to Enhance Understanding of Environmental Crises in the Indian Ocean World.’ Among his many publications are: *Africa and the Indian Ocean World from Early Times to circa 1900* (2019) and *An Economic History of Imperial Madagascar* (2005).

Archisman Chaudhuri received his doctorate in history at Leiden University (2019). Primarily trained as a historian specialising in reading the VOC (Dutch East India Company) archives, his doctoral dissertation, ‘From Camp to Port: Mughal warfare and the economy of Coromandel, 1682–1710,’ researched the impact of the southern military campaigns (1682–1707) of Mughal emperor Aurangzeb (r. 1658–1707) on the economy of the Coromandel Coast—a major trading hub of the erstwhile Indian Ocean. He was a postdoctoral researcher at the Indian Ocean World Centre (IOWC), McGill University (2019–2021), where he studied coeval climatic anomalies in early modern South Asia and South-east Asia, and where still serves as a research affiliate. He is a co-editor on

the international collaborative book project on the embassy of Sir William Norris to Mughal India (1699–1702), which will result in a scholarly edition of Norris' embassy diaries published by the Hakluyt Society.

William Gervase Clarence-Smith is Emeritus Professor of History at SOAS, University of London, and former chief editor of the *Journal of Global History*. He has taken part in collaborative environmental research projects on the Indian Ocean World, based at McGill University and at the University of Sussex. With Ed Emery, he coordinates the Interdisciplinary Animal Studies Initiative at SOAS. He has published on the history of various animals (including diseases of animals), agricultural and marine commodities, manufacturing, labour, diasporas, sexuality, science and technology, and religion. Much of his research has focused on the Portuguese empire, Central Africa, and Southeast Asia. He taught at the University of Zambia from 1975 to 1977, where the research for his contribution to this volume was largely carried out.

Philip Gooding is a Postdoctoral Fellow at the Indian Ocean World Centre, McGill University. He holds a Ph.D. in History from SOAS, University of London (2017). He is the author of *On the Frontiers of the Indian Ocean World: A History of Lake Tanganyika, c.1830–1890* (forthcoming), co-editor of *Animal Trade Histories in the Indian Ocean World* (2020), and holder of a SSHRC Insight Development Grant for a project entitled: 'Climate History and Human-Environment Interaction in Equatorial Eastern Africa, c.1780–1900.' He has published in several academic journals, including *The Journal of African History* and *Slavery and Abolition*. His research specialisations are the cultural and environmental histories of eastern Africa and the wider Indian Ocean World.

Stephen J. Rockel is Associate Professor of African History in the Department of Historical and Cultural Studies, University of Toronto Scarborough. He is a specialist in Tanzania and East Africa, with interests in African and Indian Ocean labour, slavery, urban, and environmental history. His book, *Carriers of Culture: Labor on the Road in Nineteenth-Century East Africa*, was published in the Heinemann Social History of Africa series (2006) and was awarded the Joel Gregory Prize by the Canadian Association of African Studies. Current projects include a history of slavery in Tanzania and the history of Tabora, a nineteenth-century commercial town.

Angela Schottenhammer (蕭婷) is Professor of the Chinese Middle Period & Early Modern World History at KU Leuven, Belgium, Selected Senior Researcher at the School of Economics at Shanghai University (经济学院, 上海大学), and research affiliate at the Geography Department, UGent. She obtained her Ph.D. in 1993 from Würzburg University with a thesis on ‘Song Period Tomb inscriptions’ and her Habilitation degree in 2000 from LMU Munich University, with a thesis on the port city of Quanzhou during the Song period (960–1279). She is director of the Crossroads Research Centre, and chief editor of the academic journal *Crossroads* and of two book series (*Crossroads—History of Interactions across the Silk Routes*; *East Asian Maritime History*). Her research focuses on Chinese history, archaeology, science and technology, and culture, and on China’s and Asia’s increasing worldwide integration, through both maritime and overland routes, with the main focus on the period between 650–1800.

Theresa Ventura is Associate Professor at Concordia University, Montreal where she teaches United States history. Her research on the American colonial Philippines places contests over environmental management and natural resource exploitation at the centre of US overseas state-building and power. More generally, she is concerned with the production of agricultural knowledge and labour regimes in plantation settings and the environmental politics and impact of the Plantationocene. Her articles on beriberi and medicalisation of food scarcity, land surveying and enclosure, and the fashioning of colonial expertise can be found in *Philippine Studies*, *Agricultural History*, *History and Technology*, and the *Journal of the Gilded Age and Progressive Era*.

Silvia Freiin Ebner von Eschenbach is Adjunct Professor for Sinology at the University of Würzburg and is currently working on a project at the University of München. Her project explores the ecology and economy of urban water supply on a micro-historical level under macro-historical conditions. She also has a special interest in Buddhism. Her recent publications include: ‘Managing Floods and Droughts by Invoking the Water Spirits: Analyzing Prayers for Rain (*daoyu* 禱雨) and Prayers for a Clear Sky (*qiqing* 祈晴). With Some Examples from Local Source Material of the Song 宋 Dynasty (960–1279),’ *Zeitschrift der Deutschen Morgenlaendischen Gesellschaft* 169 (2019), 205–229; ‘The Dilemma of Ecological and Nutritional Policies in view of Buddhist Campaigning: The Use of Hangzhou’s Xihu 西湖 as a Pool for the Release of Living

Beings during the Northern and Southern Song Dynasties (960–1279),’ *Monumenta Serica* 68:1 (2020), 69–106.

James Francis Warren is Emeritus Professor of Southeast Asian Modern History at Murdoch University, Perth, Western Australia. He is an award-winning historian who has published numerous monographs, journal articles, and book chapters. His books include *The Sulu Zone 1768–1898: The Dynamics of External Trade, Slavery and Ethnicity in the Transformation of a Southeast Asian Maritime State* (1981, 2007, 2021); *Iranun and Balangingi: Globalisation, Maritime Raiding and the Birth of Ethnicity* (2002); *Pirates, Prostitutes and Pullers: Explorations in the Ethno- and Social History of Southeast Asia* (2008); *Rickshaw Coolie A Peoples History of Singapore* (1986, 2003); and, *Ab Ku and Karayuki San Prostitution and Singapore Society, 1870–1940* (1993, 2003).

Fiona Williamson is Associate Professor of Science, Technology and Society at Singapore Management University. She specialises in the history of climate and environment and the history of science in colonial Singapore, Malaysia, and Hong Kong. She has worked extensively on the history of meteorological science in these three countries, alongside recovering their historical climate data. Her latest research rests at the nexus of human-environmental-climatic interaction, exploring the dynamics of extreme weather and weather events, society, health, infrastructure, and politics.

LIST OF FIGURES

Fig. 2.1	Map of region under review, with places mentioned in-text marked. Loosely based on: Elvin, <i>The Retreat of the Elephants</i> , map 3 (p. 142). Drawn by Philip Gooding	32
Fig. 2.2	Archival map of Hangzhou area and the Zhe River. <i>Zhejiang tu</i> 浙江圖, <i>XCLAZ</i> , j.1, p. 7 (north: left side)	36
Fig. 2.3	Archival map of Yanguan District. <i>Yanguan xian jingtu</i> 鹽官縣境圖, <i>XCLAZ</i> , j.16, p. 8 (north: on top)	37
Fig. 3.1	Map of coastal China, including locations of places and features mentioned in-text. Drawn by Philip Gooding	67
Fig. 3.2	Graphs showing numbers of inundations and epidemics in coastal Chinese provinces in the period c.1500–1680, according to the data collected as part of the ongoing TRANSPACIFIC and ‘Appraising Risk’ projects	74
Fig. 4.1	Map of South Asia with notable places mentioned in-text marked. Owing to the changeable political situation during the seventeenth century, borders between empires and sultanates are unmarked. Drawn by Philip Gooding	106
Fig. 4.2	Map of Southeast Asia, with places mentioned in-text marked. Drawn by Philip Gooding	117
Fig. 5.1	Map of the Upper Zambezi, its tributaries, floodplains, and notable settlements. Drawn by Philip Gooding	133
