Preface

Fracture and Fatigue, Volume 7: Proceedings of the 2013 Annual Conference on Experimental and Applied Mechanics represents one of eight volumes of technical papers presented at the 2013 SEM Annual Conference and Exposition on Experimental and Applied Mechanics organized by the Society for Experimental Mechanics and held in Lombard, IL June 3–5, 2013. The complete Proceedings also includes the following volumes: *Dynamic Behavior of Materials*; *Challenges in Mechanics of Time-Dependent Materials and Processes in Conventional and Multifunctional Materials*; *Advancement of Optical Methods in Experimental Mechanics*; *Mechanics of Biological Systems and Materials*; *MEMS and Nanotechnology*; *Experimental Mechanics of Composite, Hybrid, and Multifunctional Materials*; and *Residual Stress, Thermomechanics & Infrared Imaging, Hybrid Techniques and Inverse Problems*.

Each collection presents early findings from experimental and computational investigations on an important area within Experimental Mechanics, Fracture and Fatigue being one of these areas.

Fatigue and fracture are two of the most critical considerations in engineering design. Understanding and characterizing fatigue and fracture has remained as one of the primary focus areas of experimental mechanics for several decades. Advances in experimental techniques, such as digital image correlation, has allowed for deeper study of phenomena related to fatigue and fracture. This volume contains the results of investigations of several aspects of fatigue and fracture, such as microstructural effects, the behavior of interfaces, the behavior of different and/or complex materials such as composites, and environmental and loading effects. The collection of experimental mechanics research included here represents another step toward solving the long-term challenges associated with fatigue and fracture.

Contents

1	Effect of Dynamic Film Debonding on Self-Assembled Monolayers	1
	Martha E. Grady, Philippe H. Geubelle, and Nancy R. Sottos	
2	Experimental Tools for Responsive Hydrogel Characterization	7
	C.C. Benjamin, J.C. Springmann, S.A. Chindhy, and W.C. Crone	
3	Fusion of Global and Local Measurements of Damage in Bonded Joints	13
	Sean C. Webb, Peter Shin, and Kara Peters	
4	DOE Testing of Diffusion Bonded Nickel Joints	21
	Erik Anderson and Matthew Cavalli	
5	Integrated Global Digital Image Correlation for Interface Delamination Characterization.....	27
	J.P.M. Hoefnagels, B. Blaysat, G. Lubineau, and M.G.D. Geers	
6	Lamb Wave Based Monitoring of Delamination Growth in Mode I and Mode II Fracture Tests	33
	Oleksii Y. Karpenko, Mahmoodul Haq, Anton Khomenko, Lalita Udpa, and Satish Udpa	
7	Investigation of Crack Growth Along Curved Interfaces in L-shaped Composite and Polymers	45
	D. Yavas, B. Gozluklu, and D. Coker	
8	Effect of Cold Spray Deposition of Similar Material on Fatigue Behavior of Al 6082 Alloy	51
	A. Moridi, S.M. Hassani-Gangaraj, M. Guagliano, and S. Vezzu	
9	Effect of Organic SAMs on the Evolution of Strength of Silicon Nanostructures	59
	Scott Grutzik, Brian Bush, Frank DelRio, Richard Gates, Melissa A. Hines, and Alan Zehnder	
10	An Apparatus for Creep Crack Growth Testing in Controlled Environments at High Temperatures	65
	D. Grierson, G. Cao, P. Brooks, P. Pezzi, A. Glaudell, D. Kuettel, G. Fisher, T. Allen, K. Sridharan, and W.C. Crone	
11	2D and 3D Analyses of Cracks Via DIC	73
	F. Mathieu and F. Hild	
12	Experimental and Numerical Fracture Analysis of a Pre-cracked Aluminum Specimen Using the Grid Method	79
	Rostand Moutou Pitti, Claudiu Badulescu, and Michel Grediac	
13	Influence of Stress State on the Ductile Fracture of Ti-6Al-4V	85
	J.T. Hammer, J.D. Seidt, and A. Gilat	
14	In-plane Shear Properties of High-Performance Filaments	91
	K.A. Slusarksi, M.S. Walter, T.A. Bogetti, and E.D. Wetzel
