Contents

1	Introduction	1
1.1	The Importance of Non-Proportional Fatigue Loading for Machine Building	1
1.2	The Definition of Non-Proportional Fatigue Loading	4
	References	7
2	The Phenomena of Non-Proportionality in Loading Fatigue	9
2.1	The Influence of Non-Proportionality on the Microstructure of Metals	10
2.1.1	Slip Bands	10
2.1.2	Dislocations Structures	10
2.1.3	Strain Induced Phase Transformations	17
2.2	Stress–Strain Relationships	18
2.2.1	Additional Cyclic Material Hardening	18
2.2.2	The Cross-Hardening	18
2.2.3	Ratcheting	21
2.3	Thermal Effects	22
2.4	Fatigue Crack Growth	25
2.4.1	Initiation and Growth of Small Cracks	25
2.4.2	Fatigue Propagation of Long Cracks	29
2.5	Influence on Fatigue Strength and Life	32
2.5.1	The Influence of Non-Proportionality on Fatigue Strength	32
2.5.2	The Influence of Non-Proportionality on Fatigue Life	35
2.5.3	Block Loadings	39
2.5.4	The Influence of Non-Proportionality on Materials Not-Exhibiting Additional Hardening	41
2.6	Macrostructure of the Material	43
	References	45

3	The Sensitivity of Materials to Load Non-Proportionality	49
3.1	Mechanism of Destruction Under Fatigue Non-Proportional Load.	49
3.2	Model of Fatigue in Non-Proportional Load	50
3.3	Measures of Material Non-Proportional Sensitivity	52
	References	57
4	Load Non-Proportionality in the Computational Models	59
4.1	Cyclic Stress–Strain Models	60
4.1.1	Incremental Plasticity Models.	60
4.1.2	Non-Proportional Hardening Coefficient	67
4.2	Identifying Load Parameters for Damage Models	69
4.2.1	Cycle Counting Methods	70
4.2.2	Spectral Method	73
4.2.3	Identifying the Parameters of Calculation Models Based on the Analysis of Stress or Strain Paths	75
4.2.4	An Analysis of Methods for Identifying Load Parameters	89
4.3	Fatigue Damage Models.	96
4.3.1	Criteria Employing Nominal Non-Proportionality Measures (Experimental Criteria)	97
4.3.2	Criteria Based on the Stress Deviator Invariants.	98
4.3.3	Criteria for Critical Plane.	99
4.3.4	Criteria Based on Two Planes	104
4.3.5	Integral Criteria	104
4.3.6	Continuum Damage Mechanics.	106
4.4	Damage Accumulation Models	109
4.5	Fatigue Crack Growth	111
4.6	Summary	114
	References	119
5	Summary	125
	References	126
