Acknowledgments

This book is based largely on the results of the “Generation and Application of Global Products of Essential Land Variables” project, which was funded and managed by the National Remote Sensing Center of China, Ministry of Science and Technology of China (Grant No. 2009AA122100), along with the participation of researchers from more than 20 universities and research institutes in China. Prof. Guanhua Xu, Academician of the Chinese Academy of Sciences and former Minister of Science and Technology of China, provided consistent support and advice. Without his encouragement and guidance, this project would not have been possible. In addition, we would like to express our deepest thanks for the support and guidance from many experts around the world.

We thank the SURFRAD, AERONET, and CarbonEuropeIP programs as well as the principal investigators of the selected sites where the ground measurement data were provided for our validation. We would also like to thank NASA/EOS for providing the MODIS and AVHRR data, NOAA for the GOES data, EUMESAT for the MSG SEVIRI data, and JMA for the MTSAT data. This work was also supported by the Natural Science Foundation of China (No. 40901167 and 41371323, 41101310).

We especially thank our colleagues, friends, and particularly our families who have provided enormous support throughout this project.

Contents

1	Introduction	1
	References	2
2	Leaf Area Index	3
2.1	Background	3
2.2	Algorithms	5
2.2.1	General Regression Neural Networks	7
2.2.2	Generating the Training Database	8
2.2.3	Training of the GRNNs	12
2.3	Product Characteristics and Quality Control	13
2.3.1	GLASS LAI Product Characteristics	13
2.3.2	Quality Control	14
2.4	Product Validation	15
2.4.1	Cross-Comparison of GLASS LAI with Other Global LAI Products	15
2.4.2	Direct Validation	25
2.5	Preliminary Analysis and Applications	28
2.5.1	Spatial and Temporal Variation of Global LAI	28
2.5.2	Three-North China Afforestation	29
2.6	Summary	29
	References	30
3	Shortwave Albedo	33
3.1	Background	33
3.2	Algorithms	34
3.2.1	Algorithm Overview	34
3.2.2	The AB1 Algorithm	35
3.2.3	The AB2 Algorithm	44
3.2.4	The STF Algorithm	46
3.3	Product Characteristics, Quality Control and Validation	49
3.3.1	Product Characteristics	49
3.3.2	Quality Control and Assessment	49
3.3.3	Validation	57

3.4	Preliminary Analysis	61
3.4.1	Global and Zonal Statistics and Trend Analysis	61
3.4.2	Regional Analysis	65
3.5	Summary	68
	References	69
4	Longwave Emissivity	73
4.1	Background	73
4.2	Algorithms	74
4.2.1	Determining the Optimal Broadband Emissivity Spectral Range	75
4.2.2	Estimating the Longwave Emissivity from MODIS Shortwave Albedos	82
4.2.3	Estimating Broadband Emissivity from AVHRR VNIR Data	97
4.3	Product Characteristics, Quality Control, and Validation	106
4.3.1	Product Characteristics	106
4.3.2	Quality Control	108
4.3.3	Validation	109
4.4	Preliminary Analysis	113
4.5	Summary	117
	References	118
5	Incident Shortwave Radiation	123
5.1	Background	123
5.2	Algorithms	125
5.2.1	Data Sources	126
5.2.2	Algorithm Description	127
5.3	Product Characteristics, Quality Control, and Validation	133
5.3.1	Product Characteristics	133
5.3.2	Quality Control	133
5.3.3	Validation	134
5.4	Preliminary Analysis	136
5.4.1	Global Mapping	136
5.4.2	Comparison with Other Products	140
5.5	Summary	140
	References	140
6	Incident Photosynthetic Active Radiation	143
6.1	Background	143
6.2	Algorithms	146
6.2.1	Data Sources	146
6.2.2	Algorithm Description	147

- 6.3 Product Generation, Quality Control and Validation 153
 - 6.3.1 Product Generation 153
 - 6.3.2 Quality Control. 153
 - 6.3.3 Validation 153
- 6.4 Preliminary Analysis and Applications. 154
 - 6.4.1 Spatial and Temporal Changes in GLASS PAR 154
 - 6.4.2 GPP Estimation Using GLASS PAR Over China 155
- 6.5 Summary 157
- References 158

- 7 Challenges and Prospects 161**
