*Si la science n'a pas de patrie,
l'homme de science doit en avoir
une et c'est à elle qu'il doit
reporter l'influence que ses
travaux peuvent avoir dans le
monde.*

Louis Pasteur
Discours prononcé à l'inauguration
de l'Institut Pasteur
Paris, 14 novembre 1888

*If Science has no Motherland,
the man of science must have one
and it is to her that he must
credit the influence that his
work may have in the world.*

Louis Pasteur
Speech delivered on the inauguration of
the Pasteur Institute in Paris on 14th
November 1888

*This book is dedicated to
the memory of my father
Louis Abel Célestin
C.B.E., M.C., M.D.*

Acknowledgments

Credit for this book goes to Brown-Séquard himself. His diaries, letters, notes, and scientific writings and likewise the letters and reminiscences of his relatives, friends, countrymen, colleagues, patients and acquaintances have been scrupulously consulted in preparing this book. Indeed, it is his personal and private papers composing the impressive Goody-McCausland Collection in the Archives of the Library of the Royal College of Physicians of London (abbreviated GMcCC in the footnotes) as well as his published books, lectures, and innumerable articles which have been extensively used in presenting his life and scholarly achievements. However, this is not to say that thanks are not due to all those who have been engaged in the realization of this book, which has been written and constantly revised over a period of 20 years.

First and foremost of these is Kenneth E. Curtis who has painstakingly read through the typescript and made a number of valuable suggestions that have all been implemented. His gracious help is gratefully acknowledged here. However, he is not, in any way, responsible for any fault that remains.

Since 2005, I have enjoyed the friendship and support of Bianca Bellissima and Samuele Lodato and truly, this book would not have seen the light of day without their encouragements. My special thanks to both of them.

Mr. Jeffries Davenport, the Librarian; Ms. Julia Allum, the Assistant-Librarian; and Ms. Teresa Sutton, the Librarian's Secretary at the Library of the Royal College of Physicians of London, have been of inestimable help in providing all the archive material relating to Brown-Séquard which was consulted, in the course of daily visits to the Library, from September 1993 to July 1995.

The Library staff of the Wellcome Institute for the History of Medicine gave me much help in tracing and providing medical books and periodicals of the nineteenth century. Their courtesy and helpfulness were greatly appreciated in the course of weekly visits to the Institute from September 1994 to June 1995.

Finally, the works of many Authors, past and present, listed in the 'Secondary Sources' or referred to in the 'footnotes' have been of great assistance, and every effort has been made to give proper credit to them.

London, September 2013

Louis-Cyril Celestin

Contents

1	Physiology in the Nineteenth Century	1
2	The Birthplace	5
3	The Forebears	9
4	The Formative Years: 1817–1837	15
5	The Medical Student: 1838–1846.	21
