Preface

Versatile and effective techniques for knowledge representation and reasoning (KRR) are essential for the development of successful intelligent systems. Many representatives of next generation KRR systems are based on graph-based knowledge representation formalisms and leverage graph-theoretical notions and results. The goal of the workshop series on Graph Structures for Knowledge Representation and Reasoning (GKR) is to bring together the researchers involved in the development and application of graph-based knowledge representation formalisms and reasoning techniques.

This volume contains revised selected papers of the third edition of GKR, which took place in Beijing, China on August 3, 2013. Like the previous editions, held in Pasadena, USA (2009), and in Barcelona, Spain (2011), the workshop was associated with IJCAI (the International Joint Conference on Artificial Intelligence), thus providing the perfect venue for a rich and valuable exchange.

The scientific program of this workshop included many topics related to graph-based knowledge representation and reasoning such as representations of constraint satisfaction problems, formal concept analysis, conceptual graphs, argumentation frameworks and many more. All in all, the third edition of the GKR workshop was very successful. The papers coming from diverse fields all addressed various issues for knowledge representation and reasoning and the common graph-theoretic background allowed to bridge the gap between the different communities. This made it possible for the participants to gain new insights and inspiration.

We are grateful for the support of IJCAI and we would also like to thank the Program Committee of the workshop for their hard work in reviewing papers and providing valuable guidance to the contributors. But, of course, GKR 2013 would not have been possible without the dedicated involvement of the contributing authors and participants.

November 2013

Organization

Workshop Chairs

Madalina Croitoru	Université Montpellier 2, France
Sebastian Rudolph	Technische Universität Dresden, Germany
Stefan Woltran	Technische Universität Wien, Austria
Christophe Gonzales	LIP6, Université Paris 6, France

Program Committee

Simon Andrews	Sheffield Hallam University, UK
Manuel Atencia	Inria & Université de Grenoble 1, France
Jean-François Baget	Inria & LIRMM, France
Dan Corbett	DARPA, USA
Olivier Corby	Inria, France
Cornelius Croitoru	Universitatea A.I.I. Cuza, Romania
Madalina Croitoru	LIRMM, Université Montpellier II, France
Frithjof Dau	SAP, Germany
Jérôme David	Inria Rhône-Alpes, France
Paul Dunne	University of Liverpool, UK
Wolfgang Dvořák	University of Vienna, Austria
Catherine Faron Zucker	I3S, UNS-CNRS, France
Sebastien Ferre	Université de Rennes 1, France
Jerome Fortin	UMR IATE, France
Christophe Gonzales	LIP6, Université Paris 6, France
Léa Guizol	LIRMM, France
Tarik Hadzic	Cork Constraint Computation Centre, Ireland
Ollivier Haemmerlé	IRIT, Université Toulouse le Mirail, France
John Howse	University of Brighton, UK
Adil Kabbaj	INSEA, France
Mary Keeler	VivoMind, USA
Hamamache Kheddouci	Université Claude Bernard Lyon 1, France
Jérôme Lang	LAMSADE, France
Pierre Marquis	CRIL-CNRS & Université Artois, France
Tomasz Michalak	University of Warsaw, Poland
Nir Oren	University of Aberdeen, UK
Bruno Paiva Lima Da Silva	LIRMM, France
Simon Polovina	Sheffield Hallam University, UK
Julien Rabatel	GREY, Université de Caen, France
Sebastian Rudolph	Technische Universität Dresden, Germany
Eric Salvat	IMERIR, France

VIII Organization

Gem Stapleton	University of Brighton, UK
Nouredine Tamani	UMR IATE INRA-SUPAGRO, France
Dan Tecuci	Siemens Corporate Research, USA
Michaël Thomazo	Technische Universität Dresden, Germany
Thanh Tran	San Jose State University, USA
Srdjan Vesic	CRIL-CRNS, France
Nic Wilson	University College Cork, Ireland
Stefan Woltran	Technische Universität Wien, Austria
Pierre-Henri Wuillemin	LIP6, France

Additional Reviewers

Mustafa Al-Bakri
Peter Chapman

Table of Contents

Implementation of a Knowledge Representation and Reasoning Tool Using Default Rules for a Decision Support System in Agronomy Applications	1
<i>Patrice Buche, Virginie Cucheval, Awa Diattara, J�r�me Fortin, and Alain Gutierrez</i>	
Information Revelation Strategies in Abstract Argument Frameworks Using Graph Based Reasoning	13
<i>Madalina Croitoru and Nir Oren</i>	
Different Classes of Graphs to Represent Microstructures for CSPs	21
<i>Achref El Mouelhi, Philippe J�gou, and Cyril Terrioux</i>	
Finding Maximal Common Sub-parse Thickets for Multi-sentence Search	39
<i>Boris A. Galitsky, Dmitry Ilvovsky, Sergei O. Kuznetsov, and Fedor Strok</i>	
Intrusion Detection with Hypergraph-Based Attack Models	58
<i>Antonella Guzzo, Andrea Pugliese, Antonino Rullo, and Domenico Sacc�</i>	
Structural Consistency: A New Filtering Approach for Constraint Networks	74
<i>Philippe J�gou and Cyril Terrioux</i>	
Inductive Triple Graphs: A Purely Functional Approach to Represent RDF	92
<i>Jose Emilio Labra Gayo, Johan Jeuring, and Jose Mar�a �lvarez Rodr�guez</i>	
A Depth-First Branch and Bound Algorithm for Learning Optimal Bayesian Networks	111
<i>Brandon Malone and Changhe Yuan</i>	
Learning Bayes Nets for Relational Data with Link Uncertainty	123
<i>Zhensong Qian and Oliver Schulte</i>	
Concurrent Reasoning with Inference Graphs	138
<i>Daniel R. Schlegel and Stuart C. Shapiro</i>	

Formal Concept Analysis over Graphs and Hypergraphs	165
<i>John G. Stell</i>	
Automatic Strengthening of Graph-Structured Knowledge Bases	180
<i>Vinay Chaudhri, Nikhil Dinesh, Stijn Heymans, and Michael Wessel</i>	
Author Index	211
