

Springer Series on Environmental Management

Series Editors

Robert W. Howarth

Cornell University, Department of Ecology and Evolutionary Biology,
Ithaca, New York, USA

Lawrence R. Walker

University of Nevada, Las Vegas, Department of Biological Sciences,
Las Vegas, Nevada, USA

Lawrence A. Kapustka

LK Consultancy, Turner Valley, Alberta, Canada

More information about this series at <http://www.springer.com/series/412>

The Springer Series on Environmental Management is concerned with humanity's stewardship of the environment, our use of natural resources, and the ways in which we can mitigate environmental hazards and reduce risks. The main focus of the series is on applied ecology in the widest sense of the term, in theory and in practice, and above all in the marriage of sound principles with pragmatic innovation. It focuses on the definition and monitoring of environmental problems and the search for solutions to them at scales that vary from global to local according to the scope of analysis. No particular academic discipline dominates the series, for environmental problems are interdisciplinary almost by definition. The volumes include a wide variety of specialties, from oceanography to economics, sociology to silviculture, toxicology to policy studies.

The series contributes to the immense effort by ecologists of all persuasions to nurture an environment that is both stable and productive. Increasing rate of resource use, population growth, and armed conflict have tended to magnify and complicate environmental problems that were already difficult to solve a century ago. Attempts to modify nature for the benefit of humankind have often had unintended consequences, especially in the disruption of natural equilibria. Yet, at the same time human ingenuity has developed a new range of sophisticated and powerful techniques for solving environmental problems, such as pollution monitoring, restoration ecology, landscape planning, risk management, and impact assessment. The Springer Series on Environmental Management sheds light on the problems of the modern environment and contributes to the further development of solutions.

Contents

1	Introduction: Exotic Annual <i>Bromus</i> in the Western USA	1
	Matthew J. Germino, Jeanne C. Chambers, and Cynthia S. Brown	
Part I Environmental Impacts of <i>Bromus</i> Species		
2	Exotic Annual <i>Bromus</i> Invasions: Comparisons Among Species and Ecoregions in the Western United States	11
	Matthew L. Brooks, Cynthia S. Brown, Jeanne C. Chambers, Carla M. D’Antonio, Jon E. Keeley, and Jayne Belnap	
3	Ecosystem Impacts of Exotic Annual Invaders in the Genus <i>Bromus</i>	61
	Matthew J. Germino, Jayne Belnap, John M. Stark, Edith B. Allen, and Benjamin M. Rau	
Part II Invasiveness of <i>Bromus</i> Species (Emphasis on Biological Attributes of <i>Bromus</i>)		
4	Mating System, Introduction and Genetic Diversity of <i>Bromus tectorum</i> in North America, the Most Notorious Product of Evolution Within <i>Bromus</i> Section <i>Genea</i>	99
	Stephen J. Novak and Richard N. Mack	
5	Ecological Genetics, Local Adaptation, and Phenotypic Plasticity in <i>Bromus tectorum</i> in the Context of a Changing Climate	133
	Rebecca A. Hufft and Tamara J. Zelikova	
6	Attributes That Confer Invasiveness and Impacts Across the Large Genus <i>Bromus</i>: Lessons from the <i>Bromus</i> REEet Database	155
	Sheryl Y. Atkinson and Cynthia S. Brown	
7	Community Ecology of Fungal Pathogens on <i>Bromus tectorum</i>	193
	Susan E. Meyer, Julie Beckstead, and JanaLynn Pearce	

Part III Understanding Environmental Controls and <i>Bromus</i> Distribution (Invasibility of Landscapes by <i>Bromus</i>)	
8 Soil Moisture and Biogeochemical Factors Influence the Distribution of Annual <i>Bromus</i> Species	227
Jayne Belnap, John M. Stark, Benjamin M. Rau, Edith B. Allen, and Susan Phillips	
9 <i>Bromus</i> Response to Climate and Projected Changes with Climate Change	257
Bethany A. Bradley, Caroline A. Curtis, and Jeanne C. Chambers	
10 Plant Community Resistance to Invasion by <i>Bromus</i> Species: The Roles of Community Attributes, <i>Bromus</i> Interactions with Plant Communities, and <i>Bromus</i> Traits	275
Jeanne C. Chambers, Matthew J. Germino, Jayne Belnap, Cynthia S. Brown, Eugene W. Schupp, and Samuel B. St. Clair	
Part IV Relating the Science to Human Uses and Restoration of Western Rangeland Landscapes	
11 Land Uses, Fire, and Invasion: Exotic Annual <i>Bromus</i> and Human Dimensions	307
David A. Pyke, Jeanne C. Chambers, Jeffrey L. Beck, Matthew L. Brooks, and Brian A. Meador	
12 Assessing Restoration and Management Needs for Ecosystems Invaded by Exotic Annual <i>Bromus</i> Species	339
Thomas A. Monaco, Stuart P. Hardegree, Mike Pellant, and Cynthia S. Brown	
13 State-and-Transition Models: Conceptual Versus Simulation Perspectives, Usefulness and Breadth of Use, and Land Management Applications	371
Louis Provencher, Leonardo Frid, Christina Czembor, and Jeffrey T. Morisette	
14 Human Dimensions of Invasive Grasses	409
Mark W. Brunson and Halley Kartchner	
15 Economic Modeling and the Management of Exotic Annual <i>Bromus</i> Species: Accounting for Ecosystem Dynamics, Ecological Thresholds, and Spatial Interdependencies	429
Mark Eiswerth, Rebecca Epanchin-Niell, Kimberly Rollins, and Michael H. Taylor	
Index	457
