Preface

The aim of the publication “*Storm Water Management, Examples from Czech Republic, Slovakia and Poland*” is to provide a knowledge and experience mainly for professionals, researchers, lecturers and academics in the field of storm water management. The importance of this topic in the time of climate change is growing. There is increasing emphasis these days on storm water management mainly in urban areas. The publication deals with the topic of incorporating rainwater back into the natural water cycle as close as possible to its source. This solution is hydrologically and technically meaningful and may be advantageous in terms of the national economy. The *publication* aims to familiarize candidates with the procedures and principles of the use, retention and infiltration of rainwater mainly from point of view of the experts from V4 countries. Rainwater management measures applied to individual property are among those that can be described as measures applied at the source. These measures are usually not only technically effective but also cost-effective. We hope that professionals and scientists in the field of interest covered in the book will find it a useful reference source. The publication is output of International Visegrad Fund’s Strategic Grant No. 31210009. The support of International Visegrad Fund is greatly appreciated.

Contents

Stormwater Management in Urbanised Areas.	1
Petr Hlavínek	
Review of the Implementation Process of Sustainable Stormwater Management in the Czech Republic.	13
David Stransky and Ivana Kabelkova	
Storm Water Quality	27
Petr Hlavínek	
Pretreatment of Stormwater	33
Petr Hlavínek	
Stormwater Management and Retention in Urban Catchment.	43
Józef Dziopak and Daniel Słyś	
The Analysis of Possibilities of Using the Rainwater Harvesting Systems in Residential Buildings in Poland.	67
Daniel Słyś, Agnieszka Stec and Józef Dziopak	
Research of Infiltration Facility Efficiency and Quality of Rainwater Harvested from Surface Runoff in Real Conditions.	83
Gabriel Markovič, Martina Zeleňáková, Zuzana Vranayová and Daniela Kaposztásová	
Stormwater Management in Compliance with Sustainable Design of Buildings	113
Zuzana Vranayová, Daniela Kaposztasova, Martina Zeleňáková and Gabriel Markovic	
Protection of Slopes Against Erosion by Flowing Rain Water	137
Miloslav Šlezinger, Petr Pelikán, Jana Marková and Lenka Gernešová	

Classification, Resources and Elimination of Xenobiotics in Stormwater.	157
Petr Hlavínek and Adéla Žižlavská	
Basic Principles of the Czech Technical Standard on Sustainable Stormwater Management	179
Ivana Kabelkova, David Stransky and Vojtech Bares	
The Law Regulations on the Subject of Rainwater Management in Poland	197
Daniel Słyś, Sabina Kordana and Józef Dziopak	
Index	211
