About this Series

The series “Advances in Intelligent Systems and Computing” contains publications on theory, applications, and design methods of Intelligent Systems and Intelligent Computing. Virtually all disciplines such as engineering, natural sciences, computer and information science, ICT, economics, business, e-commerce, environment, healthcare, life science are covered. The list of topics spans all the areas of modern intelligent systems and computing.

The publications within “Advances in Intelligent Systems and Computing” are primarily textbooks and proceedings of important conferences, symposia and congresses. They cover significant recent developments in the field, both of a foundational and applicable character. An important characteristic feature of the series is the short publication time and world-wide distribution. This permits a rapid and broad dissemination of research results.

Preface

This four volume set of books includes the proceedings of the 2015 36th International Conference Information Systems Architecture and Technology (ISAT), or ISAT 2015 for short, held on September 20–22, 2015, in Karpacz, Poland. The conference was organized by the Department of Computer Science and Department of Management Systems, Faculty of Computer Science and Management, Wrocław University of Technology, Poland.

The International Conference Information Systems Architecture is organized by the Wrocław University of Technology from the seventies of the last century. The purpose of the ISAT is to discuss a state of the art of information systems concepts and applications as well as architectures and technologies supporting contemporary information systems. The aim is also to consider an impact of knowledge, information, computing, and communication technologies on managing the organization scope of functionality as well as on enterprise information systems design, implementation, and maintenance processes taking into account various methodological, technological, and technical aspects. It is also devoted to information systems concepts and applications supporting exchange of goods and services by using different business models and exploiting opportunities offered by Internet-based electronic business and commerce solutions.

ISAT is a forum for specific disciplinary research, as well as on multi-disciplinary studies to present original contributions and to discuss different subjects of today's information systems planning, designing, development, and implementation. The event is addressed to the scientific community, people involved in variety of topics related to information, management, computer, and communication systems, and people involved in the development of business information systems and business computer applications.

This year, we received 130 papers from 17 countries. The papers included in the four proceeding volumes published by Springer have been subject to a thorough-going review process by highly qualified peer reviewers. Each paper was reviewed by at least two members of Program Committee or Board of Reviewers. Only 74 best papers were selected for oral presentation and publication in the

36th International Conference Information Systems Architecture and Technology 2015 proceedings. The final acceptance rate was 57 %.

Professor Peter Nelsen (Denmark) presented his keynote speech on Some Insights from Big Data Research Projects. He also organized the special session on the advances in methods for managing complex planning environments.

The conference proceedings are divided into four volumes and present papers in the areas of managing complex planning environments, systems analysis and modeling, finance, logistics and market, artificial intelligence, knowledge-based management, Web systems, computer networks and distributed computing, high performance computing, cloud computing, multi-agent systems, Internet of Things, mobile systems, service-oriented architecture systems, knowledge discovery, and data mining.

We would like to thank the Program Committee and external reviewers, essential for reviewing the papers to ensure a high standard of the ISAT 2015 conference and the proceedings. We thank the authors, presenters, and participants of ISAT 2015; without them, the conference could not have taken place. Finally, we thank the organizing team for the efforts this and previous years in bringing the conference to a successful conclusion.

ISAT 2015 Keynote Speaker

Professor Peter Nielsen, Aalborg University, Aalborg, Denmark
Topic: Some Insights from Big Data Research Projects

ISAT 2015 Invited Session

Advances in Methods for Managing Complex Planning Environments
Chair: Peter Nielsen, Denmark

Contents

Part I Finance, Logistics and Market

Data Mining Methods for Long-Term Forecasting of Market Demand for Industrial Goods	3
Bartłomiej Gawęł, Bogdan Rębiasz and Iwona Skalna	
The Analyses of Factors Which Influence the Discount Rate—with an Example of IT Sector	15
Katarzyna Gwóźdź	
Risk Management on Different Types of Stock Exchange Markets	29
Anna Maria Kiłyk	
The Selection of Variables in the Models for Financial Condition Evaluation	39
Sebastian Klaudiusz Tomczak, Arkadiusz Górski and Zofia Wilimowska	
Global Financial Crisis and the Decoupling Hypothesis.	51
Joanna Wyrobek, Zbigniew Stańczyk and Marek Zachara	
Project Appraisal in the Transport Sector	63
Małgorzata Florczak-Strama and Agnieszka Parkitna	
Testing the Probability Distribution of Financial Ratios	75
Sebastian Klaudiusz Tomczak and Zofia Wilimowska	
The Methodology of Modeling the Decision-Making Process for Planning the Logistics Supply Chain	85
David Pérez, Maria del Mar Alemany and Marian Molasy	

Part II Artificial Intelligence Methods

Goal-Driven Inference for Web Knowledge Based System.	99
Roman Simiński and Agnieszka Nowak-Brzezińska	

A Simple Knowledge Base Software Architecture for Industrial Electrical Machine Design: Application to Electric Vehicle's In-Wheel Motor	111
Yannis L. Karnavas and Ioannis D. Chasiotis	
Genetic Diversity in the Multiobjective Optimization of Paths in Graphs	123
Łukasz Chomątek	
New Algorithm for On-line Signature Verification Using Characteristic Global Features	137
Marcin Zalasieński	
New Algorithm for On-line Signature Verification Using Characteristic Hybrid Partitions.	147
Marcin Zalasieński and Krzysztof Cpałka	
Nonlinear Pattern Classification Using Fuzzy System and Hybrid Genetic-Imperialist Algorithm	159
Krystian Łapa and Krzysztof Cpałka	
A Novel Approach to Fuzzy Rough Set-Based Analysis of Information Systems	173
Alicja Mieszkowicz-Rolka and Leszek Rolka	
Using Genetic Algorithm for Optimal Dispatching of Reactive Power in Power Systems	185
Robert Łukomski	
Computer-Aided Diagnosis System with Backpropagation Artificial Neural Network—Improving Human Readers Performance	197
Sławomir Stemplewski and Marek Polewski	
Hybrid Recognition Technology for Isolated Voice Commands	207
Gintarė Bartišiūtė, Kastytis Ratkevičius and Gintarė Paškauskaitė	
A New Knowledge Measure of Information Carried by Intuitionistic Fuzzy Sets and Application in Data Classification Problem.	217
Hoang Nguyen	
Author Index	227
