# Lecture Notes in Chemistry

Volume 92

## The Lecture Notes in Chemistry

The series Lecture Notes in Chemistry (LNC), reports new developments in chemistry and molecular science-quickly and informally, but with a high quality and the explicit aim to summarize and communicate current knowledge for teaching and training purposes. Books published in this series are conceived as bridging material between advanced graduate textbooks and the forefront of research. They will serve the following purposes:

- provide an accessible introduction to the field to postgraduate students and nonspecialist researchers from related areas,
- provide a source of advanced teaching material for specialized seminars, courses and schools, and
- be readily accessible in print and online.

The series covers all established fields of chemistry such as analytical chemistry, organic chemistry, inorganic chemistry, physical chemistry including electrochemistry, theoretical and computational chemistry, industrial chemistry, and catalysis. It is also a particularly suitable forum for volumes addressing the interfaces of chemistry with other disciplines, such as biology, medicine, physics, engineering, materials science including polymer and nanoscience, or earth and environmental science.

Both authored and edited volumes will be considered for publication. Edited volumes should however consist of a very limited number of contributions only. Proceedings will not be considered for LNC.

The year 2010 marks the relaunch of LNC.

# Contents

**1 Supramolecular Artificial Photosynthesis** . . . . . 1
Mirco Natali and Franco Scandola

**2 Solar Energy Conversion in Photoelectrochemical Systems** . . . . . 67
Stefano Caramori, Federico Ronconi, Roberto Argazzi, Stefano Carli, Rita Boaretto, Eva Busatto, and Carlo Alberto Bignozzi

**3 Organic Light-Emitting Diodes (OLEDs): Working Principles and Device Technology** . . . . . 145
Umberto Giovanella, Mariacecilia Pasini, and Chiara Botta

**4 Light-Emitting Electrochemical Cells** . . . . . 197
Chia-Yu Cheng and Hai-Ching Su

**5 Industrial Photochromism** . . . . . 227
Andrew D. Towns

**6 Application of Visible and Solar Light in Organic Synthesis** . . . . . 281
Davide Ravelli, Stefano Protti, and Maurizio Fagnoni

**7 Photochemical Reactions in Sunlit Surface Waters** . . . . . 343
Davide Vione

**8 Photodynamic Therapy** . . . . . 377
Barbara Krammer and Thomas Verwanger

**9 Polymer Nanoparticles for Cancer Photodynamic Therapy Combined with Nitric Oxide Photorelease and Chemotherapy** . . . . . 397
Fabiana Quaglia and Salvatore Sortino

**10 Chemiluminescence in Biomedicine** . . . . . 427
Mara Mirasoli, Massimo Guardigli, and Aldo Roda

**11 Solar Filters: A Strategy of Photoprotection** . . . . . 459
Susana Encinas Perea

**12 Luminescent Chemosensors: From Molecules to Nanostructures** . . . . . 479
Nelsi Zaccheroni, Francesco Palomba, and Enrico Rampazzo

**13 Photochemistry for Cultural Heritage** . . . . . 499
Maria João Melo, Joana Lia Ferreira, António Jorge Parola, and João Sérgio Seixas de Melo

**Index** . . . . . 531
