About the Editors

Dr. Angela Million is professor and head of the chair of urban design and urban development at the Department of Urban and Regional Planning, Technische Universität Berlin (TU Berlin). Since October 2014, she and Prof. Dr. Thomas Coelen have been heading the DFG-funded research project “Local Educational Landscapes and Urban Development—Interfaces and Interlacings”. She cofounded and is a board member of JAS—Jugend Architektur Stadt e.V. (YOUTH ARCHITECTURE CITY), an association for built environment education and participation children and young people. She is also a partner at the STADTIDEE city planning office. Her key research areas include the city as a space for education, children and youths in urban development, urban planning classification and participatory urban design.

Dipl.-Ing. Anna Juliane Heinrich has been a research fellow at the chair of urban design and urban development, Department of Urban and Regional Planning, Technische Universität Berlin (TU Berlin), since 2011. Since October 2014, she has been working on the DFG-funded research project “Local Educational Landscapes and Urban Development—Interfaces and Interlacings” (project managers Prof. Dr.-Ing. Angela Million and Prof. Dr. Thomas Coelen). She is writing a doctorate with the working title “Educational Landscapes and their Materialisation in the Built Environment”. Her research focuses not only on interfaces between education and urban development, but also on the participation of children and young people in urban development processes and built environment education.

Dr. Thomas Coelen is a professor of education specialising in socialisation, youth education and life course research at the Siegen Centre for socio-scientific educational research (SiZe), at the University of Siegen, Faculty of Education, Architecture and the Arts. Since October 2014, he and Prof. Dr.-Ing. Angela Million have been heading the DFG-funded research project “Local Educational Landscapes and Urban Development—Interfaces and Interlacings”. Coelen took his

doctorate in Hamburg, examining identity formation with relation to social spaces. His key research areas include cooperation between youth welfare services and the school, full-service community education, educational landscapes and pedagogical architecture.

Contributors

Dr.-Ing. Andrea Benze is a professor at Munich University of Applied Science, chair of urban design and urban theory. She is also an architect at Berlin Chamber of Architects, an urban researcher and a cofounder of OFFSEA (Office for Socially Engaged Architecture) in London/Berlin and member in Jugend-Architektur-Stadt e.V. (JAS e.V.).

Dr. Nils Berkemeyer is a professor at the Institute of Educational Science, Friedrich Schiller University, Jena (Germany). His research interests are fairness in the school system, school system development research, school system management/school governance/school reform, in-school management, regionalisation within the school system and education network, and school and teaching development. Since October 2013, he has been the chair of the Commission for Administration, Policy and Educational Law (KBBB).

Dipl.-Ing. Christa Böhme is a landscape planner and research fellow at the German Institute of Urban Affairs (Difu), urban development, legal and social division in Berlin.

Dr. Jeanette Böhme is a professor of the pedagogy of schools at the University of Duisburg-Essen's Pedagogical Institute, Faculty of Educational Sciences. Her research and work focus on the empirical corroboration of a media-culture-based schools theory, on spatio-temporal relationships of teaching/learning set-ups, on youth media education and alienation from school and on the methods and methodology of reconstructive approaches in the social sciences and art.

Dr. Petra Bollweg is an adjunct professor at the chair of social pedagogy and extracurricular education at the Institute of Educational Science, Faculty of Social and Behavioural Sciences, Friedrich Schiller University, Jena. Her fields of interest and research are child and youth welfare, school absenteeism, educational landscapes, informality from the perspective of institutional theory, school social work, the post-growth society, social pedagogical education theory and the social movement of urban gardening.

Dr. Wilfried Bos is a professor of educational research and quality assurance at the Institute for School Development Research (IFS) at TU Dortmund University, having directed the institute until 2014. His work focuses on empirical research methods, large-scale assessment studies (KESS, IGLU, TIMSS, ICILS), quality assurance in the education sector, international educational research, evaluation, pedagogical research on China and educational networking and regionalisation

processes. He publishes the Journal for Educational Research Online (JERO). He was previously the head of the KBBB and a convenor of EERA Network 9: Assessment, Evaluation, Testing and Measurement.

Wolfgang Brehmer is the administrative director and head of the Department of Municipal Education Management at the city of Munich's Office of Municipal Education Management and Regulation, part of the Unit of Education and Sport. He also runs the "Lernen vor Ort" ("Local Learning") project.

Dr. Marta Brković was a Ph.D. student at the Sheffield School of Architecture. Today, as the founding director of the NGO ARQubator in Serbia, she carries out research and design on issues related to sustainable learning environments. In her research, practice and teaching, she deals with the topics of sustainable architecture, learning environments, research and design methods in architecture, participative architecture and the educational potential of research and design activities, on the one hand, and the built environment, on the other.

Dr. Thomas Brüsemeister is a professor of sociology, specialising in socialisation and education, at the Justus Liebig University Giessen's Institute of Sociology. His work focuses on research on school development and educational governance, as well as methods of qualitative social research.

Dipl.-Ing. Frauke Burgdorff is a director of the German Foundation for Urban Space and a managing director of German private limited non-profit company specialised in real estate development to enhance the quality of an urban neighbourhood in the city of Krefeld. Her fields of interest and research are spatial planning, professional practice in regional development, future studies and urban planning and project development at the interface between education and urban development and in urban renewal. She is a member of the German Academy for Urban and Regional Spatial Planning and the Association of German Architects (BDA), chair of the User Advisory Council at the Research Institute for Regional and Urban Development (ILS) and a member of the scientific advisory council at the Federal Institute for Research on Building, Urban Affairs and Spatial Development (BBSR).

Dr. Sven De Visscher is a lecturer and researcher in the field of social pedagogy and social work at the University College Ghent. He gained a doctorate in educational sciences based on research into the social pedagogical significance of the neighbourhood for children. His current research interests comprise processes of municipal development in close relationship with social work, adult education and community art practices in an urban context, youth work and youth policy, and the concepts of child-friendly cities.

Dr. Ulrich Deinert is the director of the research centre for socio-spatial action research and development and professor of the methodology of teaching and social pedagogy at Düsseldorf University of Applied Sciences, as well as copublishing the online journal "Sozialraum.de". His work focuses on cooperation between the

youth welfare services and schools, educational landscapes, socio-spatial youth work, the socio-spatial approach, and strategy and quality development.

Dr. Marcus Emmerich is head of the chair of learning and education in adolescence at the University of Applied Sciences and Arts north-western Switzerland FHNW. Previously, he was a senior assistant at Zurich University's Institute of Educational Science. His work focuses on organisation and interaction in the education system, childraising and inequality in a migration society, pedagogical discourses on difference, school improvement and regionalisation.

Viktoria Flasche M.A. is a research fellow on the DFG project "School sites. Study on school buildings over the course of urban neighbourhood change" at the University of Duisburg-Essen's Pedagogical Institute, Faculty of Educational Sciences.

Dr. Thomas Franke is a research fellow at the German Institute of Urban Affairs (Difu), urban development, legal and social division in Berlin.

Dr. Axel Gehrmann is a professor of school education and the director of the Centre for Research in Teacher Training, Vocational Training and School Education at the Technical University Dresden. His research focuses on the history and theory of schools and teaching; empirical research on teachers and teacher training; changing careers to work as a teacher; indicator-supported education reporting; regional school improvement; and educational governance.

Björn Hermstein M.A. is a research fellow at the chair of school pedagogy and school development at the Institute of Educational Science, Friedrich Schiller University, Jena (Germany). His topics of interest are school improvement planning, educational sociology, the theory and empirical study of managing the school system, sociological theory and justice as an observational category.

Ian Hextall is a research fellow at the University of Roehampton and Goldsmiths College in London. He taught for many years in higher education at Goldsmiths College and at the Institute of Education at the University of Kent, South Bank University and the Laban Centre. Policy research has been the main focus of the four ESRC projects in which he has been involved. He is currently doing research on the cooperative school movement and plays an active role in water aid.

Katharina Hoffmann B.A. is currently studying a master's degree in education at Kiel University, focusing on human geography. Since 2010, she has been working in the Department of Geography, Europa-Universität Flensburg, first as a student assistant and then as a research assistant. Her work focuses on research in the geography of education.

Dr. Holger Jahnke is a professor of geography and the didactics of geography at the Interdisciplinary Institute of Environmental, Social and Human Sciences,

Department of Geography, Europa-Universität Flensburg. He is also a long-term member of the research group on the geography of education at the German Geographical Society (DGfG); since 2010, he has been a society spokesman. In geographical educational research, his work currently focuses on peripheral spaces and the development of educational landscapes in European border regions.

Anja Jungermann M.A. studied international politics and European studies in Bremen and Warsaw. After her studies, she started out by working for the European Commission's Directorate-General for Education and Culture, going on to become a fellow at the non-profit initiative Teach First Deutschland, at a secondary school in Duisburg. Since September 2009, she has been a research fellow at TU Dortmund University's Institute for School Development Research (IFS). She carries out research in the field of education, local educational networks between schools and their surroundings, and network-based school improvement.

Dr. Fabian Kessl is a professor for theory and methods of social work at the University of Duisburg-Essen's Faculty for Educational Sciences, department for social work and social policy. His work focuses on how the welfare state can transform situations of education, formative education and care, especially issues around producing and reproducing urban spaces, and analyses of power and discourse.

Dipl.-Sozialwiss. Julia Klausning is a research fellow in sociology at Justus Liebig University Giessen, specialising in socialisation and education. Her tasks include working on accompanying academic research for the national "Lernen vor Ort" ("Local Learning") programme in cooperation with Rambøll Management Consulting GmbH. At the same time, as part of her proposed doctoral thesis, she is working on issues around managing and coordinating educational processes and actors on the municipal level.

Dr. Gerd Kuhn is a research fellow at the Department of the Sociology of Architecture and Housing, Institute of Housing and Design, Faculty of Architecture and Urbanism, University of Stuttgart. He is the managing director of various research projects, a copublisher of "Informationen zur Modernen Stadtgeschichte" (IMS), a supervisory board member of Bau- und Heimstättenverein Stuttgart, a committee member of Stiftung Selbsthilfe and the Ernst May Society, chair of the Bundesverband Baugemeinschaften advisory board and, since 2014, urbi_et stadt forschung praxis, Tübingen office: an interdisciplinary network for urban research and its practical implementation. His research focuses on social and spatial professionalism of suburban urbanism, the history of urban life, the culture of social mixtures in the city; housing co-ops as the new building contractors, and how we shape and use public spaces.

Markus Lindner M.A. has a master's degree in political science, Hamburg. He was a project manager for the research team behind the federal programme "Lernen

vor Ort” (“Learning Locally”) and senior advisor at the Department of Education, Family and Social Participation at Rambøll Management Consulting GmbH. Currently, he works as a scientific assistant at the German Children and Youth Foundation (Deutsche Kinder und Jugendstiftung), where he mainly works on background research and evaluation for education policy programmes. On all these projects, one focus of his qualitative research is on analysing processes of implementation, as well as structural issues around cooperation, networking and managing actors in the education system. His current work is related to the programme “Transfer Agencies”, a kind of successor programme of “Learning Locally” funded by the Federal Ministry of Education and Research.

Christine Loth M.Sc. is a research fellow of the DFG-funded research project “Local Educational Landscapes and Urban Development—Interfaces and Interlacings” at the Siegen Centre for socio-scientific educational research (SiZe), at the Siegen University's Faculty of Education, Architecture and the Arts. Her topics of interest are urban development, public spaces, local educational landscapes and pedagogical architecture.

Dr. Joana Lúcio gained her doctorate at the Faculty of Educational Sciences of the University of Porto (Portugal) on the subject of the Educating Cities movement. She has run several research intervention projects in the field of local development, taking a particular interest in informal educational processes and the role of civic associations, municipalities and SMEs. She is currently a research fellow at the CIEC Research Centre on Childhood Studies at the University of Minho, Braga (Portugal), and a link convenor for Network 14, Communities, Families and Schooling in Educational Research, at the EERA, as well as being a trainer in the field of social and pedagogical mediation.

Dr. Wolfgang Mack is a professor of special education, focusing on SEN adult and vocational training, at Ludwigsburg University of Education. His work focuses on the fields of educational research, the theory of coping with life, transitions in education, training and paid work, educational landscapes and cooperation between the youth welfare system and the school.

Dr. Pat Mahony is Emerita Professor of education at the University of Roehampton and visiting professor at King's College and Goldsmiths College, London. She has extensive experience in research and publications in teacher education and social justice, taking part in more than 30 projects financed by a series of organisations. She has written nine books and more than 70 articles and chapters.

Dr. Laura Healey Malinin AIA is a licensed architect, a cognitive scientist and an assistant professor of interior design at Colorado State University. Her interest in school design is based on her experience in the architectural schoolroom planning and her work in schools, including developing school curricula for middle and high schools which combine the STEM subjects and design-based learning. She also

teaches students from the faculties of architecture and interior design the principles of school design and participative design/build activities. Her research interests cover the relationship between cognition and the designed environment, such as the question of how workplaces and educational settings can promote creativity, health, well-being and environmental awareness.

Dr. Veronika Manitius studied educational science at TU Dortmund, going on to work there as a research fellow at the Institute for School Development Research (IFS) and gaining her doctorate. Subsequently, she became a research fellow at the chair of school pedagogy and school development, Friedrich Schiller University, Jena, where she mainly dealt with issues around the justness of the school system, teachers' views of justness, research into school system development, regionalisation within education, network-based school improvement and social indicators research. Currently, she is a consultant of the State Institute for Schools QUA-LiS NRW (Germany) and is working towards a lecturing qualification at Friedrich Schiller University, Jena.

Dominique Matthes M.Ed. is a doctoral student and research fellow at the chair of school education/general didactics at the Technical University Dresden, Institute of Education. Her research focuses on spatial concepts adopted by teachers as part of an investigation into the symbolic structures of school architecture in the teaching profession.

Dr. Stephan Maykus is a professor of social work at Osnabrück University of Applied Sciences and an outside lecturer in educational science at Universität Hamburg. His work focuses on child and youth welfare theory, research and practice, and the foundations of municipal social pedagogy.

Dipl.-Pol. Sebastian Niedlich is a researcher at Freie Universität Berlin, Department of Education and Psychology, Division of General Education. His research focuses on educational governance and networks, including evaluations of the federal programmes “Lernen vor Ort” (“Learning Locally”) and “Lernende Regionen” (“Learning Regions”). He is a copublisher of the book series “Institutionenforschung im Bildungsbereich”, which first came out in 2013.

Dr. Lars Niemann is a project manager at GK Software AG. After studying urban and regional planning and architecture in Cottbus and Valladolid (Spain), he freelanced for various planning offices in the Berlin area. He is a research fellow at the chair of urbanism and design at Brandenburg University of Technology Cottbus and research fellow from 2003–2013 at the Department of Urban Design and Land-Use Planning at the Faculty of Spatial Planning, TU Dortmund. He was a visiting lecturer in urbanism at the Universidad del ISTMO, Guatemala, and founded the office Stadtidee—Städtebau.Prozess.Kommunikation, which he co-owned until 2013. In 2013, he gained a doctorate on the subject of “managing local educational landscapes”.

Dr. Alexandra Nonnenmacher is a professor of methods of empirical educational and social research at the Department of Educational Science/Psychology at the University of Siegen. Her work currently focuses on methodical and methodological issues around context analyses, urban sociology, social inequality and political sociology.

Dr. Thomas Olk was a professor of social pedagogy and social policy at Martin Luther University of Halle-Wittenberg since March 2016. His work focused on research into children and young people (and their welfare services), civil society and local education.

Dr. Dr. h.c. mult. Hans-Uwe Otto is a senior research professor and spokesperson for the North Rhine-Westphalia research school on “Education and Capabilities” at the University of Bielefeld and TU Dortmund. He is a spokesperson for the Bielefeld Center for Education and Capability Research at the University of Bielefeld and an adjunct professor at the School of Social Policy and Practice, University of Pennsylvania, Philadelphia, USA. His fields of interest and research are informal education, child and youth welfare, theory of professionalism, social justice, welfare production and the capability approach.

Dr. Rosie Parnell is a reader in architecture at Northumbria University. Her research, practice and teaching combine interests in design process and participation, architecture education and children’s spaces. She often links these fields of interest in projects to engage children in architectural design, or in teaching that seeks to engage students in directing their own learning. Her most recent research project—*Designing with Children*—explores spatial designers’ experiences of working directly with children. Rosie is a founder member of the international children’s architecture education network, PLAYCE.

Dipl.-Päd. Sascha Pelzmann is a Ph.D. student at the Technical University Dresden, Institute of Education. His research focuses on new forms of management in the school system, educational governance and vocational teaching at the Anna-Haag-Schule in Backnang (pedagogy/psychology/social pedagogy).

Dr. Christian Reutlinger is a professor at the University of Applied Sciences St. Gallen (FHS). He is the head of the Institute of social work and senior lecturer in social education and social policy and is responsible for the Competence Centre for Research on Social Spaces at FHS St. Gallen. His areas of expertise include the analysis of social spheres, social geographies of childhood and youth, European youth research, social neighbourhood, community and transnational social work.

Hari Sacré M.A. is a researcher in the field of social work at the University College Ghent. He studied social work and cultural studies. His current research interests are related to youth work, processes of municipal development, concepts of child-friendly cities and semiotics.

Rainer Schweppe has been the city of Munich schools inspector since July 2010; he is also a member of the selection panel for the Bosch Foundation/Heidehof Foundation German Schools Award.

Dr. Otto Seydel is the head of the Institute of School Development. He is a member of the team of authors behind the fundamental work on schools construction: Montag Stiftungen Jugend und Gesellschaft I Urbane Räume (ed.) (2011). *Schulen planen und bauen. Grundlagen und Prozesse*. Berlin: Jovis. He is also a coauthor of the guidelines for efficient school buildings in Germany (2013) published by the Montag Foundation in cooperation with the BDA and the VBE.

Dr.-Ing. Christina Simon-Philipp is a professor of urban design and urban planning at HFT Stuttgart—University of Applied Sciences, Faculty of Architecture and Design. Since 2014, she has been working at *urbi_et stadt forschung praxis*, Stuttgart office, interdisciplinary network for urban research and its practical application. She is a member of the Baden-Württemberg Chamber of Architects (AKBW), the Association of Town, Regional and State Planning (SRL), the German Academy for Urban and Regional Spatial Planning (DASL), the Baden-Württemberg Regional Working Group of the Academy for Spatial Research and Planning (ARL), Deutscher Werkbund Baden-Württemberg (dwb), DOCOMOMO Germany and the City of Stuttgart Urban Design Committee. Her research focuses on housing construction and district development, the housing heritage from the 1950s to the 1970s, the design and use of public spaces and urban development and renewal.

Ivanka Somborski M.A. was a research assistant at the Siegen Centre for socio-scientific educational research (SiZe) at the University of Siegen, Faculty of Education, Architecture and the Arts until March 2016. Since October 2014, she has been working on the DFG-funded research project “Local Educational Landscapes and Urban Development—Interfaces and Interlacings” (project managers Prof. Dr.-Ing. Angela Million and Prof. Dr. Thomas Coelen). Her research activities focus on cooperations and governance arrangements in the field of local educational landscapes in the context of integrated urban development.

Dr. Heinz-Jürgen Stolz works at the Institute for Social Work e.V. (ISA) in Münster. He is currently working as the head of the regional liaison office “Leave no child behind! Preventative measures in NRW’s municipalities”.

Dr. Vicki Täubig is an assistant professor for educational research, focusing on informal learning in adolescence, at the University of Siegen. Her work focuses on youth research at the interface between school and child or youth welfare, and on migration research. While working at the German Youth Institute (Deutsches Jugendinstitut, DJI) on the research project “Local Education Networks in Cooperation of All-Day Schools and Youth Services” (2007–2010), she investigated the formation of educational landscapes. The project was funded by the BMBF, and its goal was empirical fundamental research in this field.

Mario Tibussek M.A. works in geography and Latin American studies. Since 2006, he has been working for the German Children and Youth Foundation (DKJS), where he has run several programmes and initiatives on the topics of educational landscapes, fair equality of opportunity and cooperation between the state/municipality and the foundation. Previously, he worked for several years in urban and regional development in Guatemala, Colombia and Chile. His greatest scholarly passion is the overlap between the two topics of urban development and education and the question of how these two disciplines can be brought together for the benefit of every single child or young person. He is responsible for this set of topics, which he also represents on various expert committees, as part of “Transferagenturen für Großstädte” (career transition agencies for cities).

Dipl.-Ing. Urs Walter is an architect and associate professor for architectural design and building technology at the Architecture and Urban Design Department of the German University in Cairo, Egypt. In cooperation with the Egyptian Ministry of Transport, he investigates how inner city areas left derelict for reasons related to transport can be activated as neighbourhood meeting zones for the rapidly growing residential areas. One particular focus is on spaces for young people, who are making up a growing section of the population, and for whom there are few activating programmes altogether in public spaces. Previously, Urs Walter taught for five years as a research fellow at the Institute of Architecture at TU Berlin; his subject was the development of educational landscapes within city districts and intelligent neighbourhood models during housing construction projects.

Dr. Günter Warsewa is a senior researcher and director of the Institute Labour and Economy (IAW) at the University of Bremen. His current fields of work are urban and regional research (structural change at ports), labour research (governance of the earning system) and institutional change (dissolution of boundaries within the school system).

Alexandra Wicht M.A. is a research fellow and doctoral student on the DFG project “The effects of regional and neighbourhood contexts on young people’s aspirations and access to vocational education and training in Germany” at the University of Siegen (project manager Prof. Dr. Wolfgang Ludwig-Mayerhof). While taking her master’s degree in social sciences, she already dealt particularly with the topic of school-to-work transitions, focusing on the interplay between the influence of individual educational qualifications, on the one hand, and the influence of opportunity structures on regional labour markets, on the other. Her research interests are in the field of the sociology of education and labour, especially taking spatial inequalities into account.
