PREFACE AND ACKNOWLEDGMENTS

Contemporary digital media have enabled what impresses most observers as a dizzying proliferation of new forms of communicative interaction and cultural production, provoking all manner of multimodal experimentation, artistic and entrepreneurial innovation, and adaptive construction and reconstruction. Working with the concept of genre, scholars in multiple fields have begun to explore these processes of innovation, emergence, and stabilization. Genre has thus become newly important in rhetoric, literature, media studies, game studies, library and information science, applied linguistics, and other disciplinary locations. Understood as social recognitions that embed histories, ideologies, and contradictions, genres function as recurrent social actions which help to constitute culture: thus systems of genres can tell us a great deal about social values and cultural power. Because genres are dynamic sites of tension between stability and change, they are also sites of inventive potential.

Conceptually positioned between communication medium, commodity-product, and social action, genre serves as an interdisciplinary tool, possibly as what sociologists have called a “boundary object,” taking on different functions and meanings in different theoretical and disciplinary contexts that are “plastic enough to adapt to local needs and constraints of the several parties employing [it], yet robust enough to maintain a common identity across sites” (Star and Griesemer 1989, 393). Genre analysis offers an important way to understand the communicative capacities of new media, and conversely, these new capacities and the creative social practices that they enable offer new angles of vision on the highly interdisciplinary history and theory of genres as indexes of culture.

This volume originated with the Fourth Annual Research Symposium sponsored by North Carolina State University's doctoral program in Communication, Rhetoric, and Digital Media, held during April 19–20, 2013, in Raleigh, North Carolina.¹ The theme of the symposium, “Emerging Genres, Forms, Narratives—in New Media Environments,” attracted an unanticipated number of submissions, and the resulting program featured speakers from Brazil, Canada, Finland, and the UK, as well as from across the USA, representing several different research traditions and a range of experience levels, from senior scholars to graduate students. From this symposium we have selected compelling papers, all focused on how the central concept of genre can address timely questions of social innovation and media transformation.

We have organized these essays into three parts, focusing on medium, genre transformation, and values, themes that are central to the processes of genre change and emergence that are documented and explored in these fascinating studies. If we see genres as more than literary or linguistic (i.e. textual) structures but also as social recognitions that structure our material-symbolic worlds and enable us to engage in meaningful interaction—i.e. if we see genre as a pragmatic, rather than primarily syntactic or semantic category—then we need to understand the ways that media technologies and platforms affect our capacities for and habits of social action. And conversely, we can use genre expectations, and the ways these change and evolve, to help interrogate media transformations themselves. The medium of communication—including modes of representation and technologies of transmission and dissemination—both enables and constrains the possibilities for communicative action and for the development of patterned and recurrent actions that we call genres. At the same time, such media are themselves shaped and interpreted through their cultural contexts, which include systems and collections of antecedent genres, as well as social values and ideologies with various modes and moments of expression. Values are manifested in and reproduced by genres, even as they may enable or provoke genre transformation. The process of genre emergence thus has multiple shaping sources and multiple implications and is difficult to generalize. It is best explored case by case, example by example, in all its historical and situational particularity, as the 14 studies in this collection do.

These studies, all published here for the first time, are preceded by an introductory essay that reviews the ways that genre emergence has been previously treated and conceived in a variety of literatures. This

introduction examines the nature of “emergence” as an explanatory concept for understanding genre innovation, contrasting it with the associated concept of “evolution,” which has also been used widely in such discussions. Overall, it addresses the question: Where do genres come from? In asking this question, we seek to understand not only “where” they come from (i.e. their antecedent conditions and causes), but also how they come about (i.e. the social and material promoters of and motives for change), and why they “emerge” (i.e. why their reception is as something new, something different from what came before). In reviewing prior studies, this essay examines how genre has been conceived, how change is understood and documented, how causes and motives and conditions are characterized, and how the role of technological medium has been implicated. We also include a brief Postscript, reflecting on these themes and looking forward to future work in this area.

Finally, we would like to acknowledge those who have made this volume possible. In addition to the other participants in the 2013 Symposium, who made that event even richer than what can be represented here, the team of students who worked on the many logistics necessary to plan and implement the event, and the sponsors who helped pay for it all, we have a number of specific groups and people to thank. Support for the Symposium was provided by the Doctoral Program in Communication, Rhetoric, and Digital Media and the Department of English and the Department of Communication at North Carolina State University; SAS Institute, Cary, North Carolina; Parlor Press; and Herman Miller Office Furniture. Thanks to the doctoral students who assisted with the conference: Meagan Kittle Autry, assistant symposium planner; and also Kevin Brock, Dana Gierdowski, Molly Hartzog, Keon Pettitway, Wendi Sierra, and Brent Simoneaux. Thanks as well to Stephen Carradini and Danny Synk, who helped with initial manuscript preparation. In addition we thank Felicity Plester and Sophie Auld at Palgrave Macmillan for their efficiency and professionalism as this collection was published.

On a more personal note, Carolyn thanks Carl Blackman for doing her the very great favor of being just as obsessed with his work as she has been with hers. Ashley thanks Brad Mehlenbacher for contributing and consorting as always.

Carolyn R. Miller

NOTES ON CONTRIBUTORS

Risa Applegarth is Associate Professor of English and Women's and Gender Studies at the University of North Carolina at Greensboro. Her previous research has appeared in *College English*, *College Composition and Communication*, *Rhetoric Society Quarterly*, and in her book *Rhetoric in American Anthropology* (Pittsburgh 2014). Her current research includes studies of professional embodiment and rhetorical training in early 20th-century women's organizations, and studies of agency in relation to children's historical and contemporary public activism.

Lora Arduser is Assistant Professor in the Professional Writing program at the University of Cincinnati. She has published in journals including the *Journal of Technical Writing and Communication*, *Women's Studies in Communication*, *Computers and Composition*, and *Narrative Inquiry*. Her work focuses on the social and epistemological dimensions of public and expert patient engagement and using rhetorical theories and methodologies to help health-care practitioners become more reflective participants in the systems in which they work.

Christopher Basgier is Assistant Professor in the English Department at the University of North Dakota, where he also directs the composition program and assists with writing across the curriculum (WAC). His research, which crosses rhetorical genre studies, WAC, digital writing, and composition pedagogy, has appeared in *Computers and Composition* and *Across the Disciplines*.

Huilong Ding is Associate Professor of Technical Communication at North Carolina State University. Her research focuses on health communication, intercultural professional communication, medical rhetoric, scientific communication, comparative rhetoric, writing in the disciplines, and workplace communication. She is the author of the award-winning book, *Rhetoric of a Global Epidemic: Transcultural Communication about SARS* (Southern Illinois University Press, 2014).

Victoria J. Gallagher is Professor of Communication at North Carolina State University. Her research and scholarship in the areas of genre studies and visual and material rhetoric includes rhetorical analysis of civil rights-related public address, museums, and memorials, as well as analyses of public art sculptures and urban parks. She is the co-editor of *Communicative Cities in the 21st Century* and the principal investigator for the Virtual Martin Luther King Project.

Janet Giltrow is a Professor in the Department of English at the University of British Columbia. Taking rhetorical and linguistic approaches to discourse studies, she has published extensively on literary and non-literary stylistics, genre theory, ideologies of language, and writing in the research genres. Her most recent publications include *Genres in the Internet*, ed. with D. Stein (John Benjamins, 2009) and “Genre as Difference: The Sociality of Syntactic Variation” (2010).

E. Johanna Hartelius is Assistant Professor in the Department of Communication at the University of Pittsburgh. Her research areas are the rhetoric of expertise, digital culture, immigration, and public memory; she examines how people construct privileged knowledge and experience to wield political power in public discourse. She is the author of *The Rhetoric of Expertise* (Lexington, 2011) and the editor of *The Rhetorics of US Immigration* (Penn State, 2015).

Jason Kalin is Assistant Professor in the Department of Writing, Rhetoric, & Discourse at DePaul University. His teaching and research interests include rhetorical theory at the intersection of digital, material, and visual rhetorics, with a focus on practices of memory. He has published in *Space and Culture* and *Visual Communication Quarterly*, among others.

Christopher Kampe is a PhD candidate in the Communication, Rhetoric, and Digital Media program at North Carolina State University. His interests are primarily in game studies, specifically the use of games as a means of exploring complex issues towards pedagogical or didactic ends. Kampe is also interested in physical computing and embodied play, specifically spaces of play and the virtual specters that might come to dwell in them.

Ashley Rose Kelly is Assistant Professor in the Department of English Language and Literature at the University of Waterloo, in Canada. Kelly’s research examines how science communication is changing with new—especially networked—technologies and also with different communities (such as citizen scientists and hackers) becoming involved in scientific research and policy-making.

Jaqueline Barreto Lé is Assistant Professor in the Department of Linguistics and Literature at the Universidade Federal do Recôncavo da Bahia, in Brazil. Lé’s research examines the textual referentiality in the processes of construction of meaning, as well as the discursive practices in the journalistic domain, including the emerging genres in electronic newspapers.

Ben McCorkle is Associate Professor of English at the Ohio State University at Marion. He is the author of the book *Rhetorical Delivery as Technological Discourse: A Cross-Historical Study* (Southern Illinois University Press, 2012), as well as several articles in journals including *Computers and Composition Online*, *Rhetoric Society Quarterly*, and *Composition Studies*. He is also the co-director of the Digital Archive of Literacy Narratives.

Brad Mehlenbacher is Associate Professor of Distance Learning (Educational Leadership, Policy, and Human Development) at North Carolina State University. Mehlenbacher is author of the Conference on College Composition and Communication's 2012 Best Book in Technical and Scientific Communication, *Instruction and Technology: Designs for Everyday Learning* (MIT Press, 2010) and is co-author of *Online Help: Design and Evaluation* (Ablex, 1993).

Carolyn R. Miller is SAS Institute Distinguished Professor of Rhetoric and Technical Communication, Emerita, at North Carolina State University, where she taught from 1973 to 2015. Her professional service includes terms as president of the Rhetoric Society of America and as editor of its journal, *Rhetoric Society Quarterly*. She is a Fellow of the Rhetoric Society of America and a Fellow of the Association of Teachers of Technical Writing. In addition to genre studies, she is interested in rhetorical theory and rhetoric of science.

Neil Randall is Associate Professor in the English Department at the University of Waterloo, Canada, where he founded and is Director of the interdisciplinary Games Institute. He is the principal investigator of a major Partnership Grant from the Social Sciences and Humanities Research Council of Canada, which supports a university-industry research network called IMMERSe (The Interactive and Multi-Modal Research Syndicate). His research interests lie in adaptations of the works of J. R. R. Tolkien, in the study of gamification in health, education, and business, and in the rhetorical and semiotic analysis of complex simulation games.

Colbey Emmerson Reid is the Director of the Consumer Innovation Consortium in the Poole College of Management at North Carolina State University, an interdisciplinary alliance of faculty, industry, and graduate students for investigating consumer cultures and behaviors. Previously she was Associate Professor of English at York University (Pennsylvania). She has recently published a co-edited essay collection on *Design, Mediation and the Posthuman* (Lexington Press, 2014), exploring the implications of the material turn in the digital era.

Natalia Rulyova is Lecturer in Russian in the Department of Modern Languages at the University of Birmingham, UK. Her research has been focused on post-Soviet Russian mass media and new media. She co-authored *Television and Culture in Putin's Russia: Remote Control* (London and New York: Routledge, 2009). She has also co-edited several collections, including *Genre Trajectories: Identifying, Mapping Projecting* (Palgrave, 2015).

Tamar Tembeck (Media@McGill, Department of Art History and Communication Studies, McGill University) is an art historian and media studies scholar whose research engages with the visual cultures of illness and medicine. She is the editor of *Auto/Pathographies* (2014), co-editor of “Conflict[ed] Reporting,” a special issue of *Photography & Culture* (2015), and co-editor of *The Participatory Condition in the Digital Age* (University of Minnesota Press, 2016).
