# Preface

This book was conceived and written to provide a contemporary view of critical urban transport issues, policies, and initiatives in 12 countries with emerging economies, each at somewhat different stages of development. With dedicated chapters on Brazil, China, Colombia, India, Indonesia, Iran, Mexico, Nigeria, Russia, South Africa, Turkey, and Vietnam, the book contains detailed, comparable information about the current urban transport situation in the major cities in these countries. Written by specialists in the field, the book draws on a wide range of information sources to provide up-to-date accounts of each of these countries. By assembling this information in one volume, it provides a valuable source for academics as well as policy-makers with an interest in the current and emerging urban transport needs of a large portion of the world's population.

# Acknowledgments

Our thanks to all of the authors for their valuable contributions to this volume. Our thanks also to Sherestha Saini from Springer for her trust, advice, and patience during the book project. In addition, we greatly appreciate the input that we received from the reviewers of each chapter. Special thanks to our families in various parts of the world—Australia, Albania, the Netherlands, and the UK.

# Contents

<b>1 The Urban Transport Crisis in Emerging Economies: An Introduction</b> .....	1
Dorina Pojani and Dominic Stead	
<b>2 Brazil</b> .....	11
Eduardo A. Vasconcellos	
<b>3 China</b> .....	33
Yuan Gao and Jeffrey Kenworthy	
<b>4 Colombia</b> .....	59

# About the Editors

**Dorina Pojani** is a Lecturer (Assistant Professor) of urban planning at the University of Queensland in Australia. Her research is focused on urban transport in both developed and developing countries. She has lived, worked and/or studied in Albania, Austria, Belgium, Italy, The Netherlands, and the USA.

**Dominic Stead** is an Associate Professor of urban and regional development at Delft University of Technology, The Netherlands. His current research interests include comparative urban and regional governance, and policy transfer.

## About the Authors

**Priscilla Connolly** is a distinguished professor at the Universidad Autónoma Metropolitana, Azcapotzalco, Mexico City, where she lectures on urban sociology, urban planning, and environmental policy. At present, she is coordinating several financed studies on the different dimensions of automobility—spatial, personal, social, and economic—which condition the mobility afforded by the city.

**David Dewar** is currently emeritus professor and senior research scholar in the School of Architecture, Planning and Geomatics at the University of Cape Town.

**Yuan Gao** is a Ph.D. candidate at Curtin University Sustainability Policy Institute, Australia. The topic of her research is resilient Chinese urban transport. In 2013 she was a recipient of the Intergovernmental Panel on Climate Change Scholarship granted by the prestigious Prince Albert II of Monaco Foundation.

**José Gomez-Ibañez** is the Derek C. Bok Professor of Urban Planning and Public Policy at Harvard University, where he teaches courses on policy analysis, transportation, and economics. His research interests focus on the role of transportation and other forms of infrastructure in supporting urban development and on the advantages and disadvantages of private provision of infrastructure.

**Roger Gorham** is a transport economist and urban development specialist with the World Bank, with over 20 years of experience in urban transport, land use, air quality, and climate change. His current portfolio centers on Africa, with work on urban transport projects in Lagos, Addis Ababa, and Nairobi. He also works extensively with the Africa Transport Policy Program (SSATP), on urban transport and sustainability policy. He holds master's degrees in city planning and transportation from the University of California at Berkeley.

**Dario Hidalgo** leads EMBARQ's international team of transport, planning, and environment specialists, which is involved in sustainable transport and urban development projects in India, Mexico, Brazil, Turkey, the Andean Region, and China. He also coordinates the Observatory of the BRT-ALC Center of Excellence. In the past 20 years, he has partaken in urban transport projects and lectured in more than ten countries of Latin America, Asia, and Africa. He holds Ph.D. and M.Sc. degrees in transportation planning from Ohio State University.

**Du The Huynh** is a senior lecturer at the Fulbright Economics Teaching Program in Ho Chi Minh City. His teaching and research interests are urban economics, infrastructure development, and finance and banking. He received his doctorate from Harvard Graduate School of Design.

**Tri Basuki Joewono** is lecturer in the Department of Civil Engineering, Faculty of Engineering, Parahyangan Catholic University, Indonesia. He holds a master's degree in transportation from Bandung Institute of Technology, Indonesia, and a Ph.D. from Saitama University, Japan. His research interests include public transportation, travel behavior, and transportation in developing countries.

**Jeffrey Kenworthy** is professor of sustainability at Curtin University, Australia. He has spent 35 years in the transport and urban planning fields. His research focuses on large international comparisons of cities from a transport and land-use perspective. He has received two awards from the German government for his research and teaching in the field, including a Mercator Guest Professorship (Goethe University) and is currently a guest professor at the University of Applied Sciences in Frankfurt.

**Jen JungEun Oh** is a senior transport economist at the World Bank. She has led several World Bank investment operations and advisory projects on urban transport and low-carbon transport. More recently, her work has focused on the transition economies of Eastern Europe and Central Asia. Before joining the World Bank, she worked in the USA and South Korea, in transport policy-making, public financing policies, and transport demand analysis and modeling, with partners in government and academia. She holds a Ph.D. in transportation systems and a master's degree in economics from Purdue University, USA.

**Sujaya Rathi** is a principal researcher at the Center for Study of Science, Technology and Policy (CSTEP) in India. She has more than 15 years of experience in land-use and transportation research and planning in India and the USA. Recently she has assisted the Planning Commission of the Government of India in developing future development scenarios for India, based on systems analysis. She holds a master's degree in community and regional planning from Iowa State University, USA, and a master's degree in economics from Jadavpur University, India.

**Ali Soltani** completed his graduate studies in Australia and completed postdoctoral residencies in Australia, Japan, and Turkey. He is associate professor at Shiraz University in Iran. His research interests include sustainable transport, urban design/planning relevance to travel patterns, and urban modeling techniques.

**Yusak Octavius Susilo** is associate professor at the KTH Royal Institute of Technology, Stockholm, Sweden. His research interests include travel behavior, activity-based analysis, land use, and transportation in developing countries. He received his Ph.D. from the Department of Urban Management, Kyoto University, Japan. Before joining KTH, he was a postdoctoral fellow at Delft University of Technology, the Netherlands, and a senior lecturer in transport and spatial planning at the Centre for Transport and Society at the University of the West of England, UK.

**Ela Babalık Sutcliffe** is associate professor in the Department of City and Regional Planning of the Middle East Technical University, Turkey. She holds a Ph.D. in urban rail systems from the University College London, Centre for Transport Studies. She has carried out a number of research projects on sustainable mobility, accessibility, public transport planning, and organizational reforms in transport service delivery. She is a member of the Permanent Scientific and Technical Committee of Cooperation for Urban Mobility in the Developing World.

**Fabio Todeschini** is currently emeritus professor and senior research scholar in the School of Architecture, Planning and Geomatics at the University of Cape Town.

**Eduardo A. Vasconcellos** is a civil engineer and a sociologist. He holds a Ph.D. in public policy and conducted his postdoctoral training on urban transport in developing countries at Cornell University, USA. Currently, he is the technical advisor for the Brazilian Public Transport Association (ANTP) and director of Instituto Movimento, in São Paulo, Brazil.

**Juan Miguel Velásquez** is a research associate at EMBARQ, where he works on evaluating the impact of transport projects, improving decision-making for transit vehicles and fuels, planning sustainable urban transport solutions, and supporting the Centre of Excellence in Bus Rapid Transit (BRT). Prior to joining EMBARQ, he was a researcher and lecturer at the Regional and Urban Sustainability Research Group at Universidad de los Andes, in Bogotá, Colombia. He holds a master of science degree in transport from Imperial College and University College in London.
