Sustainability in Business is increasingly becoming the forefront issue for researchers, practitioners and companies the world over. Engaging with this immense challenge, Future Earth is a major international research platform from a range of disciplines, with a common goal to support and achieve global sustainability. This series will define a clear space for the work of Future Earth Finance and Economics Knowledge-Action Network. Publishing key research with a holistic and trans-disciplinary approach, it intends to help reinvent business and economic models for the Anthropocene, geared towards engendering sustainability and creating ecologically conscious organizations.
