# Preface

This LNCS volume contains papers presented at SEAL 2017, the 11th International Conference on Simulated Evolution and Learning, held during November 10–13, 2017, in Shenzhen, China. SEAL is a prestigious international conference series in evolutionary computation and learning. This biennial event was first held in Seoul, Korea, in 1996, and then in Canberra, Australia (1998), Nagoya, Japan (2000), Singapore (2002), Busan, Korea (2004), Hefei, China (2006), Melbourne, Australia (2008), Kanpur, India (2010), Hanoi, Vietnam (2012), and Dunedin, New Zealand (2014). The Steering Committee decided to change the conference year from even to odd years from 2017 to avoid clashing with WCCI.

We received 145 paper submissions from nearly 30 countries. After a rigorous peer-review process involving at least three reviewers for each paper, the best 40 papers were selected to be presented at the conference as oral presentations (acceptance rate of 27.6%) and an additional 45 papers as poster presentations.

The papers included in this volume cover a wide range of topics in simulated evolution and learning. The accepted papers have been classified into the following main categories: (a) evolutionary optimization, (b) evolutionary multi-objective optimization, (c) evolutionary machine learning, (d) theoretical developments, (e) feature reduction and dimensionality reduction, (f) dynamic and uncertain environments, (g) real-world applications, (h) adaptive systems, and (i) swarm intelligence.

The conference featured seven distinguished keynote speakers: Professors Kenneth De Jong, Sanaz Mostaghim, Yew Soon Ong, Philip C.L. Chen, Jun Wang, Hisao Ishibuchi, and Yiu-ming Cheung. The seven keynotes covered the state-of-the-art research topics in simulated evolution and learning such as co-evolution, multi-objective and many-objective optimization, neuro-evolution, broad and deep learning, transfer learning, and multitask optimization. In addition, SEAL 2017 also featured an Editor-in-Chief Forum, including the current and past Editor-in-Chiefs of the prestigious journals such as *IEEE Transactions on Evolutionary Computation* (Prof. Xin Yao and Prof. Kay Chen Tan); *IEEE Transactions on Cybernetics* (Prof. Jun Wang); *IEEE Transactions on Systems, Man, and Cybernetics: Systems* (Prof. Philip C.L. Chen); *IEEE Transactions on Emergent Topics in Computational Intelligence* (Prof. Yew Soon Ong); and *IEEE Computational Intelligence Magazine* (Prof. Hisao Ishibuchi). We were very fortunate to have such internationally renowned research leaders giving talks at SEAL 2017, given their busy schedules. Their presence at the conference was yet another indicator of the importance of the SEAL conference series on the international research map.

SEAL 2017 also included the opening of the Shenzhen Key Lab for Computational Intelligence, with a number of distinguished professors including fellows (academicians) from the Chinese Academy of Sciences. The first SUSTech-VUW Joint Workshop on Evolutionary Optimization and Learning was also held at the conference, with the key people in this field from Southern University of Science and Technology

(SUSTech) and Victoria University of Wellington (VUW). SEAL 2017 also included five tutorials delivered by Prof. Kenneth De Jong, Prof. Xiaodong Li, Prof. Mengjie Zhang, Prof. Jing Liu, and Prof. Mustafa Misir, which were free to all conference participants. These five tutorials covered some of the hottest topics in evolutionary computation and learning and their applications such as unified evolutionary computation, evolutionary large-scale global optimization, genetic programming and evolutionary deep learning, evolutionary complex and social networks, and online–offline algorithm selection. They provided an excellent start to the four-day conference.

The success of a conference depends on its authors, reviewers, participants, and Organizing Committees. SEAL 2017 was no exception. We are very grateful to all the authors for their paper submissions and to all the reviewers for their outstanding effort in refereeing the papers within a tight schedule. We relied heavily upon a team of volunteers to keep SEAL 2017 running smoothly and efficiently. They were the true heroes working behind the scene. We are most grateful to all the student volunteers for their great efforts and contributions.

We would also like to thank our sponsors for providing all the support to SEAL 2017, including the Department of Computer Science and Engineering, Southern University of Science and Technology (China), School of Engineering and Computer Science and Evolutionary Computation Research Group, Victoria University of Wellington (New Zealand), City University of Hong Kong (China), RMIT University (Australia), Springer, and EasyChair. Particular thanks should go to Southern University of Science and Technology (China), who provided significant financial support to the conference.

# Organization

The 11th International Conference on Simulated Evolution and Learning (SEAL 2017) was organised and hosted by Southern University of Science and Technology, Shenzhen, China.

## SEAL 2017 Conference Committee

### Honorary Chairs

Russell C. Eberhart, USA  
Xin Yao, China

### General Chairs

Yuhui Shi, China  
Kay Chen Tan, Hong Kong

### Programme Chairs

Mengjie Zhang, New Zealand  
Ke Tang, China

### Technical Co-chairs

Xiaodong Li, Australia  
Qingfu Zhang, Hong Kong  
Ying Tan, China  
Martin Middendorf, Germany  
Yaochu Jin, UK

### Advisory Committee Chairs

Hussein Abbass, Australia  
Kalyanmoy Deb, USA  
Zbigniew Michalewicz, Australia  
Lipo Wang, Singapore  
Carlos A. Coello Coello, Mexico  
Hisao Ishibuchi, Japan and China  
Jong-Hwan Kim, South Korea

### Local Organizing Chairs

Zexuan Zhu, China  
Guangming Lin, China  
Xuefeng Zhang, China

### Special Sessions Chairs

Ben Niu, China  
Cara MacNish, Australia

### Tutorial Chairs

Han Huang, China  
Frank Neumann, Australia

### Publicity Chairs

Yew-Soon Ong, Singapore  
Lam Thu Bui, Vietnam  
Carmelo Bastos Filho, Brazil  
Shi Cheng, China  
Vasile Palade, UK  
Bing Xue, New Zealand  
Hemant Singh, Australia  
Hisashi Handa, Japan  
Sung-Bae Cho, South Korea  
Bob Reynolds, USA

## **SEAL 2017 Keynotes**

### **Co-evolutionary Algorithms: Theory and Practice**

*Kenneth De Jong*

### **Multi-Objective Optimizaion and Decision Making in Dynamic Environments**

*Sanaz Mostaghim*

### **Why Restrict to One Task or Problem? From Transfer to Multitask Optimization**

*Yew Soon Ong*

### **Evolutionary Many-Objective Optimization and Performance Evaluation**

*Hisao Ishibuchi*

### **Neurodynamic Approaches to Distributed, Global, and Multi-objective Optimization**

*Jun Wang*

### **Broad Learning System: An Effective and Efficient Incremental Learning System Without the Need for Deep Architecture**

*C.L. Philip Chen*

### **On Learning from Imbalanced Data for Classification**

*Yiu-ming Cheung*

## **SEAL 2017 Tutorials**

### **Evolutionary Computation: A Unified Approach**

*Kenneth De Jong*

### **Evolutionary Large-Scale Global Optimization: An Introduction**

*Xiaodong Li*

### **Genetic Programming: Recent Developments and Applications**

*Mengjie Zhang*

### **Evolutionary Computation and Complex Networks**

*Jing Liu*

### **Algorithm Selection Online + Offline Techniques**

*Mustafa Misir*

## **Sponsoring Institutions**

Department of Computer Science and Engineering, Southern University of Science and Technology, China

School of Engineering and Computer Science and Evolutionary Computation Research Group, Victoria University of Wellington, New Zealand

Department of Computer Science, City University of Hong Kong, Hong Kong

Evolutionary Computation and Machine Learning Group (ECML),  
School of Science (Computer Science and Software Engineering),  
RMIT University, Australia

## **Acknowledgements**

We would like to thank particularly Southern University of Science and Technology, China for their financial support.

*Adam Ghandar*

An Evolutionary Vulnerability Detection Method for HFSWR Ship Tracking Algorithm. . . . . 763  
*Pengju Zhang, Kun Wang, Ling Zhang, Zexiao Xie, and Liqin Zhou*

Genetic Programming for Lifetime Maximization in Wireless Sensor Networks with a Mobile Sink. . . . . 774  
*Ying Li, Zhixing Huang, Jinghui Zhong, and Liang Feng*

Unsupervised Change Detection for Remote Sensing Images Based on Principal Component Analysis and Differential Evolution. . . . . 786  
*Mi Song, Yanfei Zhong, Ailong Ma, and Liangpei Zhang*

Parallel Particle Swarm Optimization for Community Detection in Large-Scale Networks . . . . . 797  
*Shanfeng Wang, Maoguo Gong, Yue Wu, and Xiaolei Qin*

Multi-objective Memetic Algorithm Based on Three-Dimensional Request Prediction for Dynamic Pickup-and-Delivery Problem with Time Windows . . . . . 810  
*Yanming Yang, Xiaoliang Ma, Yiwen Sun, and Zexuan Zhu*

Optimization of Spectrum-Energy Efficiency in Heterogeneous Communication Network . . . . . 821  
*Fangqing Gu, Ziquan Liu, Yiu-ming Cheung, and Hai-Lin Liu*

Large Scale WSN Deployment Based on an Improved Cooperative Co-evolution PSO with Global Differential Grouping . . . . . 833  
*Yazhen Zhang and Wei Fang*

**Adaptive Systems**

Learning Fuzzy Cognitive Maps Using a Genetic Algorithm with Decision-Making Trial and Evaluation . . . . . 845  
*Xumiao Zou and Jing Liu*

Dynamic and Adaptive Threshold for DNN Compression from Scratch . . . . . 858  
*Chunhui Jiang, Guiying Li, and Chao Qian*

Cooperative Design of Two Level Fuzzy Logic Controllers for Medium Access Control in Wireless Body Area Networks . . . . . 870  
*Seyed Mohammad Nekooei, Gang Chen, and Ramesh Rayudu*

Statistical Analysis of Social Coding in GitHub Hypernetwork . . . . . 883  
*Li Kuang, Feng Wang, Heng Zhang, and Yuanxiang Li*

**Swarm Intelligence**

Sparse Restricted Boltzmann Machine Based on Multiobjective Optimization . . . . . 899  
*Yangyang Li, Xiaoyu Bai, Xiaoxu Liang, and Licheng Jiao*

A Knee Point Driven Particle Swarm Optimization Algorithm for Sparse Reconstruction. . . . . 911  
*Caitong Yue, Jing Liang, Boyang Qu, Hui Song, Guang Li, and Yuhong Han*

Multivariant Optimization Algorithm with Bimodal-Gauss . . . . . 920  
*Baolei Li, Jing Liang, Caitong Yue, and Boyang Qu*

Enhanced Comprehensive Learning Particle Swarm Optimization with Exemplar Evolution. . . . . 929  
*Xiang Yu, Yunan Liu, Xiangsheng Feng, and Genhua Chen*

Recommending PSO Variants Using Meta-Learning Framework for Global Optimization . . . . . 939  
*Xianghua Chu, Fulin Cai, Jiansheng Chen, and Li Li*

Augmented Brain Storm Optimization with Mutation Strategies . . . . . 949  
*Xianghua Chu, Jiansheng Chen, Fulin Cai, Chen Chen, and Ben Niu*

A New Precedence-Based Ant Colony Optimization for Permutation Problems. . . . . 960  
*Marco Baiocchi, Alfredo Milani, and Valentino Santucci*

A General Swarm Intelligence Model for Continuous Function Optimization . . . . . 972  
*Satoru Iwasaki, Heng Xiao, Toshiharu Hatanaka, and Takeshi Uchitane*

A Hybrid Particle Swarm Optimization for High-Dimensional Dynamic Optimization . . . . . 981  
*Wenjian Luo, Bin Yang, Chenyang Bu, and Xin Lin*

Visualizing the Search Dynamics in a High-Dimensional Space for a Particle Swarm Optimizer . . . . . 994  
*Qiqi Duan, Chang Shao, Xiaodong Li, and Yuhui Shi*

Particle Swarm Optimization with Winning Score Assignment for Multi-objective Portfolio Optimization . . . . . 1003  
*Karoon Suksonghong and Kittipong Boonlong*

Conservatism and Adventurism in Particle Swarm Optimization Algorithm . . . . . 1016  
*Guangzhi Xu, Rui Li, Xinchao Zhao, and Xingquan Zuo*

A Competitive Social Spider Optimization with Learning Strategy for PID Controller Optimization . . . . . 1026  
*Zhaolin Lai, Xiang Feng, and Huiqun Yu*
