

Numanities - Arts and Humanities in Progress

Volume 5

Series editor

Dario Martinelli, Kaunas, Lithuania

The series originates from the need to create a more proactive platform in the form of monographs and edited volumes in thematic collections, to discuss the current crisis of the humanities and its possible solutions, in a spirit that should be both critical and self-critical.

“Numanities” (New Humanities) aim to unify the various approaches and potentials of the humanities in the context, dynamics and problems of current societies, and in the attempt to overcome the crisis.

The series is intended to target an academic audience interested in the following areas:

- Traditional fields of humanities whose research paths are focused on issues of current concern;
- New fields of humanities emerged to meet the demands of societal changes;
- Multi/Inter/Cross/Transdisciplinary dialogues between humanities and social and/or natural sciences;
- Humanities “in disguise”, that is, those fields (currently belonging to other spheres), that remain rooted in a humanistic vision of the world;
- Forms of investigations and reflections, in which the humanities monitor and critically assess their scientific status and social condition;
- Forms of research animated by creative and innovative humanities-based approaches;
- Applied humanities.

Acknowledgements

A book is never the product of a sole author. This volume would never have existed without the books and the academic journals that published my previous studies, and without the many conferences where I presented pieces of my wider research on meat. Thus, many thanks to the editors, the organizers, and the many participants who encouraged, advised, and frankly criticized me and my research, both in Europe and the USA.

The same must be said for key colleagues and students at the universities where I have studied and taught: Università Cattolica in Milan, the University of Stirling, Queen Margaret University in Edinburgh, Università IUAV in Venice, Bournemouth University, and Università dell'Insubria in Como. They provided valuable feedback on what I have written in this book, sometimes by commenting my lectures, other times with a simple phrase at the café. They are too many, and it is impossible to mention everyone. However, many of their suggestions are on the following pages.

One that I can mention is instead the *Numanities* Series Editor Dario Martinelli, not only for his enthusiastic support and guidance throughout the publication process, but also for inviting me to participate in the *International Congress of Numanities* (which he organizes every year at the University of Kaunas), where I presented a tentative project of this book. As regards Springer and the editorial team, I would also like to thank the two anonymous reviewers who suggested changes and corrections to improve the final result, and Naresh Kumar Mani, who is always fast in clarifying my editorial doubts.

Alison Green has proofread the text, and my friend Carmine De Pascale took the photographs of Rome's ex slaughterhouse that are published here.

Dulcis in fundo, the biggest 'thank you' goes to my wife Tania, who for several months lived with one of the most boring entities a woman can meet in her life, that is, a husband writing a book.

Contents

1	Introduction	1
1.1	Why a Cultural History of Meat?	1
1.2	The Relevance of Meat	2
1.3	Methods	4
1.4	A Different Way of Riding Through the Last 120 Years	5
