

## **Part II**

# **Extended knowledge**

The chapters of this part correspond to the talks of the joint MSNano-EUSpec conference that was held at the University of Rennes 1 on July 1 and 2, 2016. This conference was organized both as the final conference of the MSNano network and in honor of Rino Natoli at the occasion of his 75th birthday. The talks selected here correspond to those directly related to the multiple scattering descriptions of spectroscopies.
