Contents

1	Value Creation and Competitive Advantage Models	1
1.1	Introduction	1
1.2	The Value Creation and Competitive Advantage Models	5
1.2.1	Introduction	6
1.2.2	The Influence of Technology on the Logics of Value Creation	7
1.2.3	Value Chains	10
1.2.4	Motivation for Extending the Concept of Value Chains	15
1.2.5	Value Constellations	17
1.2.6	Value Shops	18
1.2.7	Value Networks	23
1.2.8	Value Grids	33
1.2.9	Value Structures in Service-Dominated Logics	38
1.2.10	Conclusion	41
1.3	The Role of Data, Information and Knowledge in Value Generation	43
1.3.1	Knowledge as a Key Resource of an Organization	43
1.3.2	Data, Information, Knowledge and Wisdom in Knowledge Management	44
1.3.3	The Concept of the Knowledge Value Chain	46

1.3.4	Transformation Processes in the Knowledge Chain	47
1.4	The Influence of Information Technologies on Value Configurations and Competition	50
1.4.1	Liquified Information in the Value Chain	50
1.4.2	Impact of Information Technologies on the Value Chain	51
1.4.3	The Impact of Information Systems on Competitiveness and Value Structures	52
1.5	Value Networks in the Telecommunications and IT Industries	55
1.5.1	Motivation for the Development of New Methods for Assessing Business Potential in the IT and Telecommunications Industries	55
1.5.2	The Model of Control Points as the Basis of the Business Potential Analysis Method	56
1.5.3	The Value Network Models in the Telecommunications and Digital Media Industries	59
1.6	Competencies Necessary to Achieve a Competitive Advantage	63
1.7	Summary	65
	References	66
2	Artificial Intelligence Methods and Techniques	71
2.1	Data, Information and Knowledge in Contemporary Information Systems	72
2.1.1	Smart, Connected Products	72
2.1.2	Data Sources	74
2.1.3	Data Complexity	77
2.1.4	Data Processing Methods	79
2.1.5	Conclusion	84
2.2	Concept and Basic Methods of Artificial Intelligence	86
2.2.1	Definitions of Artificial Intelligence	86
2.2.2	Classification of Environments	92

2.2.3	Solving Problems by Searching	95
2.2.4	Knowledge and Planning in Certain Situations	100
2.2.5	Knowledge and Planning in a State of Uncertainty	104
2.2.6	Learning	106
2.2.7	Perception, Communication and Action	109
2.2.8	Creative and Prognostic Capabilities	110
2.2.9	Summary	113
2.3	The Most Important AI Technologies	114
2.3.1	Classification of AI Technologies	114
2.4	Cognitive Computing Systems	119
2.4.1	Features of Cognitive Computing Systems	120
2.4.2	Components and Principles of Cognitive Computing Systems Design	122
2.4.3	CC Systems as a New Quality in Management	126
2.5	Summary	129
References		130

3	Influence of Artificial Intelligence on Activities and Competitiveness of an Organization	133
3.1	Objectives, Subject, Method and Quantitative Analysis of Research Results	134
3.1.1	Objectives and the Subject of Research	134
3.1.2	Research Methodology	134
3.1.3	Detailed Analysis of Value Offered	137
3.2	Adoption of Artificial Intelligence Systems in Contemporary Organizations	143
3.2.1	Investments in AI and Adoption of This Class of Solutions	143
3.2.2	Key Success Factors	146
3.2.3	Barriers and Risk Factors	153
3.2.4	Summary	156
3.3	The Impact of AI Systems on Activities in the Value Chain	156
3.3.1	Design	156

3.3.2	Production and Logistics	174
3.3.3	Sales and Marketing	186
3.3.4	Personalization, Service and After-Sales Service	202
3.3.5	Human Resources Management	210
3.3.6	Information and Knowledge Management	214
3.4	AI Influence on Competitiveness and Markets	222
3.4.1	Manufacturers	223
3.4.2	Customers	228
3.4.3	Suppliers	230
3.4.4	New Players	231
3.4.5	Markets	232
3.4.6	Sources of Competitive Advantage	232
3.5	The Influence of Artificial Intelligence on the Role and Competencies of Employees	237
3.5.1	New Competencies	239
3.5.2	New Roles in Organizations	241
3.6	Summary	242
	References	243
4	Model for Value Generation in Companies and Cognitive Networks	247
4.1	Classification of AI Technology in the Context of Value Generation	248
4.1.1	Knowledge Value Chains and Data Transformation Processes in Information Systems	248
4.1.2	Classification of AI Systems According to a Place in the Knowledge Value Chain	253
4.1.3	Classification of AI Systems According to Cognitive Functions	260
4.2	Value Generation Model: Organization Level	263
4.2.1	Value Generation Process	264
4.2.2	Value Generation Model	274

4.3	Cognitive Networks	275
4.3.1	Classic Constellations of Values and Value Systems Based on AI	279
4.3.2	Cognitive Network Concept	293
4.3.3	Key Competencies of Organizations Operating in Cognitive Networks	298
4.4	Summary	301
	References	301
5	Summary and Recommendations for Future Research	305
	Appendices	308
	Appendix 1: Summary of Desirable Competencies in Organizations Implementing AI Solutions	308
	Appendix 2: Challenges Related to the Implementation of Artificial Intelligence Systems	312
	Appendix 3: The List of Analyzed Projects and Companies Using AI or Supporting Its Design	316
	References	327
	Index	337

List of Figures

Fig. 1.1	Porter's value chain. (Source: Own elaboration based on Porter 2008)	12
Fig. 1.2	Value configuration in value shops chart. (Source: Own elaboration based on Stabell and Fjeldstad 1998)	21
Fig. 1.3	Network value configuration chart. (Source: Own elaboration based on Stabell and Fjeldstad 1998)	26
Fig. 1.4	Dimensions of competing in value grids. (Source: Own elaboration based on Pil and Holweg 2006)	34
Fig. 1.5	Knowledge Value chain concept according to Ermine. (Source: Own elaboration based on Ermine 2013)	44
Fig. 1.6	Knowledge value chain and its management. (Source: Own elaboration based on Ermine 2013)	48
Fig. 1.7	Knowledge chain model according to Wang and Ahmed. (Source: Own elaboration based on Wang and Ahmed 2013)	48
Fig. 1.8	Knowledge transformation processes in value chains according to Ermine. (Source: Own elaboration based on Ermine 2013)	49
Fig. 2.1	Characteristics of environment in classical search. (Source: Own elaboration)	95
Fig. 2.2	Characteristics of environment in extended classical search. (Source: Own elaboration)	98
Fig. 2.3	Characteristics of competitive environments. (Source: Own elaboration)	99
